The Civil Service Commissioners are authorized by the Secretary of State for India in Council to make the following announcements :

- (i) *Selected Candidates will be allotted to the various provinces upon a consideration of all the circumstances, including their own wishes ; but the requirements of the Public Service will rank before every other consideration.*

The whole probation must ordinarily be passed at the same Institution. Migration will not be permitted except for special reasons approved by the Secretary of State.*
- (iii) *The allowance of £100 will not be paid to any Selected Candidate until he has been certified by the Civil Service Commissioners to be entitled to be appointed to the Civil Service of India ; and every Certificated Candidate must, before receiving his allowance, give a written undertaking to refund the amount in the event of his failing to proceed to India.*
- (iv) *All Candidates obtaining Certificates will be also required to enter into covenants, by which, amongst other things, they will bind themselves to make such payments as under the rules and regulations for the time being in force, they may be required to make towards their own pensions or for the pensions of their families. N.B.—A Manual of Rules and Regulations applicable to members of the covenanted Civil Service of India has been compiled by permission of the Government of India and may now be procured either from Messrs. A. Constable & Co., 2, Whitehall Gardens, S.W., or from Mr. E. A. Arnold, 37, Bedford Street, Covent Garden. Price 2s. 6d.

The Commissioners have been requested by the Secretary of State for India to draw the attention of Selected Candidates to the prefatory note attached to this manual, as it is considered important that it should be clearly understood that this compilation is not to be regarded in any other light than that of a collection, made for facility of reference, of certain information and rules, that it is by no means exhaustive, and that it is liable to such modifications as may from time to time be sanctioned by competent authority.

CIVIL SERVICE OF INDIA ; CLERKSHIPS (CLASS I) IN THE HOME CIVIL SERVICE ; AND EASTERN CADETSHIPS.

SYLLABUS showing the extent of the Examination in certain subjects.

English Composition.—An Essay to be written on one of several subjects specified by the Civil Service Commissioners on their Examination Paper.

English Language and Literature.—The Examination will be in two parts. In the one the Candidates will be expected to show a general acquaintance with the course of English Literature, as represented (mainly) by the following writers in verse and prose, between the reign of Edward III. and the accession of Queen Victoria:

Verse—Chaucer, Langland, Spenser, Shakespeare, Milton, Dryden, Pope, Gray, Collins, Johnson, Goldsmith, Crabbe, Cowper, Campbell, Wordsworth, Scott, Byron, Coleridge, Shelley, Keats.

Prose—Bacon, Sir Thomas Browne, Milton, Cowley, Bunyan, Dryden, Swift, Defoe, Addison, Johnson, Burke, Scott, Macaulay (Essays and Biographies).

A minute knowledge of the works of these authors will not be looked for in this part of the Examination, which will, however, test how far the Candidates have studied the chief productions of the greatest English writers *in themselves*, and are acquainted with the leading characteristics of their thought and style, and with the place which each of them occupies in the history of English Literature. Candidates will also be expected to show that they have studied in these authors the history of the English Language in respect of its vocabulary, syntax, and prosody.

The other part of the Examination will relate to one of the periods named below, which will follow each other year by year in the order indicated.

1. A.D. 1360 to A.D. 1600
(1904) [Chaucer to Spenser.]
2. A.D. 1600 to A.D. 1700
(1905) [Shakespeare to Dryden.]
3. A.D. 1700 to A.D. 1800
(1906) [Pope to Cowper.]
4. A.D. 1800 to A.D. 1832
(1907) [Nineteenth Century writers to the death of Scott.]

The Examination in this part will require from Candidates a more minute acquaintance with the history of the English Language and Literature, as illustrated in the chief works produced in each period, and will be based to a considerable extent, but by no means exclusively, on certain books specified each year by the Commissioners.* The names placed under the dates are intended to suggest the general character of the literary development of the period, and, consequently, the natural limits of the Examination. All the works of Shakespeare, for example, will be regarded as falling within the period 1600 to 1700; all the works of Swift within the period 1700 to 1800; all the works of Scott and Wordsworth, and all the works of Macaulay within the period 1800 to 1832.

Condition I.—The buildings to be erected on the land in accordance with the site-plan appended to the application shall be commenced within six months from the execution of the agreement, and shall be completed within the period specified in the note endorsed on such plan.

Condition II.—(1) Buildings may be erected on the land only in accordance with the site-plan appended to the application or, where a proposed building, alteration or addition is not in accordance with such plan, with the written permission of the authority which sanctioned the application.

(2) Any such permission may be given subject to any conditions which may be agreed upon between such authority and the applicant.

Condition III.—The land shall not be used for any purpose other than those specified in the applicant's application under section 89 of the Secunderabad Cantonment Code, 1903 ; nor shall the buildings erected on the land be permitted to fall into such a state of ruin as absolutely to prevent their being used for the purposes so specified :

Provided, always, that it shall be obligatory on the applicant to commence rebuilding the same, if destroyed or injured by earthquake, fire, cyclone or other act of God, within six months of such destruction or injury, and to reinstate the same fit for use for the purposes so specified as aforesaid within such period, not exceeding two years, after the same shall have been so destroyed or injured as aforesaid, as to the cantonment authority shall seem fit, provided, nevertheless, that in no such case shall the applicant be required to reinstate the same fit for use as aforesaid within a shorter period than twelve months from date of such destruction or injury.

Condition IV.—(1) Whenever the applicant intends to transfer, by sale, gift, mortgage or exchange, his interest in the land, or in buildings erected on the land, or in any part of the land or buildings, he or the intended transferee shall give the Cantonment Magistrate one month's notice in writing before the transfer is completed.

(2) The Cantonment Magistrate shall have power, within the said period of one month, and with the concurrence of the cantonment authority, to impose, by order in writing, his veto on any such transfer ; and, if in any case the cantonment authority considers it desirable that the said power of veto should be exercised, it shall report the case to the Resident at Hyderabad without delay.

(3) If notice of any such transfer is not given as aforesaid, or if any such transfer is made after the same has been vetoed, the transfer shall be void.

Condition V.—Every person on whom the applicant's interest in the land, or in the buildings erected on the land, may devolve, by transfer, by succession or by operation of law, shall send to the cantonment authority, within one month from the date of such devolution, a report in writing of the fact, together with such particulars as may be required by the cantonment authority for entry in the register maintained under section 266 of section 267, as the case may be, of the Secunderabad Cantonment Code, 1903.

Condition VI.—The Government reserves a right, subject to the conditions herein-after contained, to appropriate the house at any time for occupation by any military officer or civil officer.

Condition VII.—If the applicant lets the house to any person other than a military officer or (if the house has been set apart in accordance with Condition X for occupation by civil officers) a civil officer, possession of the house shall not be given until—

Agreement to vacate to be executed when house is let to any person other than a military or civil officer.

- (a) such person has executed a stamped agreement undertaking to vacate the house whenever required so to do in pursuance of a notice issued under Condition VIII or Condition X without claiming any compensation, and has registered such agreement under the law for the time being in force relating to the registration of documents, and
- (b) the applicant has forwarded an attested copy of such agreement to the cantonment authority.

Condition VIII.—Whenever the cantonment authority considers that the right reserved by Condition VI should be exercised in behalf of any military officer, it may, if the house is not already occupied by a military officer, and if it has not been set apart in accordance with Condition X for occupation by civil officers, by notice in writing—

- (a) require the applicant to let the house to the military officer named in the notice, and
- (b) require the existing tenant (if any) to vacate the same.

Condition IX.—If the house is occupied by a departmental military officer and the cantonment authority considers that the right reserved by Condition VI should be exercised in behalf of a regimental officer, or *vice versa*, it may, by notice in writing, require the officer in occupation to vacate the house ;

and may, if necessary, by further notice in writing, require the applicant to accept the change of tenancy.

Condition X.—(1) The cantonment authority may, at any time, with the previous sanction of the General Officer of the Command, given with the concurrence of the Resident at Hyderabad, set apart the house for occupation by civil officers.

(2) If the house has been so set apart, the arrangement shall not be revoked without the concurrence of the Resident at Hyderabad.

(3) If, while the house is so set apart, the cantonment authority at any time considers that the right reserved by Condition VI should be exercised in behalf of any civil officer, it may, if the house is not already occupied by a civil officer, by notice in writing—

- (a) require the applicant to let the house to the civil officer named in the notice and
- (b) require the existing tenant (if any) to vacate the same.

Condition XI.—(1) Whenever a military officer or a civil officer considers that a notice should be issued in his behalf under Condition VIII, Condition IX or Condition X he may request (in the case of a regimental officer) the Commanding Officer of his regiment, or (in the case of a departmental military officer) the local head of his Department, or (in the case of a civil officer) the Cantonment Magistrate, to make an application to that effect to the cantonment authority.

(2) On receipt of any such application the cantonment authority shall inquire into the case, and it shall not issue the notice unless it is satisfied—

- (a) that the officer ought to reside in the cantonment, and
- (b) that the circumstances are such as to require its intervention, and
- (c) that the rent offered by the officer for the house is reasonable, and
- (d) if the house is vacant, that it is suitable for the residence of the officer, and
- (e) if the house is occupied, that it is suitable for the residence of the officer, and that there is no vacant house in the cantonment which is suitable for his residence.

Explanation.—In considering whether a house is suitable for the residence of an officer, regard shall be had to (i) the locality in which his duties chiefly lie, and (ii) his rank.

Condition XII.—(1) The house shall not be occupied for the purposes of a bank, hotel shop or school, or by a railway company, without the previous sanction in writing of the Officer Commanding the District, given with the concurrence of the Resident at Hyderabad.

(2) Before application is made for such sanction, the Officer Commanding the District shall certify whether or not in his opinion the number of houses in the cantonment, as compared with the strength of the existing or probable garrison, renders it likely that such occupation as aforesaid would—

- (a) cause any difficulty in obtaining accommodation in the cantonment, or in the part of the cantonment in which the house is situate, for military officers or civil officers, or
- (b) necessitate the acquisition of land at some future time for the extension of the cantonment.

House not to be appropriated for military or civil officer if it is occupied, with sanction, as a bank, hotel, shop or school, or by a railway company, or is otherwise appropriated by the Government.

Condition XIII.—No notice shall be issued under Condition VIII or Condition X if the house—

- (b) is occupied with the sanction aforesaid by a railway company,
- (c) is appropriated by the Resident at Hyderabad or by the Governor-General in Council for use as a public office or for any other purpose.

Condition XV.—(1) If the house is unoccupied, any notice issued under Condition VIII or Condition X may require the applicant to give possession of the same to the proposed tenant within four days from the service of the notice.

Time to be allowed for giving possession of house.

(2) If the house is occupied, no such notice as aforesaid shall require its vacation in less than thirty days from the service of the notice.

Condition XVI.—(1) Subject to the terms of any agreement in writing between the applicant and a military officer or a civil officer, and to the terms of this Condition, every lease of the house to such an officer shall be deemed to be a lease from month to month, terminable—

Terms of tenancy applicable to military and civil officers.

- (a) without notice, in the case of the departure of the officer from the cantonment on duty or under medical certificate, or in the case of a committee of arbitration deciding that the house has become unfit for occupation, or
- (b) by one month's notice in writing to the applicant in any other case.

(2) A notice under clause (1) of this Condition must be signed by or on behalf of the officer concerned; and the Cantonment Magistrate shall, if the officer so desires, cause it to be served on the applicant free of charge.

(3) When a military officer or a civil officer has, in pursuance of clause (1) of this Condition, given up his occupation of the house without notice, and has occupied the house during a portion only of the calendar month in which his occupation ceased, he shall be liable to pay as rent for that portion a sum bearing the same proportion to the monthly rent as the said portion bears to the whole month:

Provided that the sum shall not, in any case, be less than one-fourth of the monthly rent.

Condition XVII.—If any tenant of the house, being a military officer or a civil officer, sub-lets the same without the consent of the applicant, the sub-lease shall be voidable at the option of the applicant.

Sub-lease voidable at option of applicant.

Condition XVIII.—(1) If the applicant considers that any rent offered by a proposed tenant and stated in a notice in accordance with Condition XIV is insufficient, he may, within a period of fifteen days from the service of such notice, require that the matter be referred by the Officer Commanding the District to a committee of arbitration.

(2) If the applicant does not make such a requisition within the said period, he shall be deemed to have accepted the rent so offered.

(3) After such acceptance or the decision of a committee of arbitration, the amount of such rent shall not be called in question by either party except in the circumstances mentioned in clause (a) of Condition XXI.

Condition XIX.—(1) If the applicant fails to execute any repairs to the house which any tenant, being a military or civil officer, may consider necessary, the cantonment authority may, at the request of the tenant, and if it is satisfied that such repairs or any of them are necessary, by notice in writing, require the applicant to execute such repairs, or such of them as it may consider necessary, within a period, not less than fifteen days, to be specified in the notice.

Right of applicant to require reference to arbitration on question of repairs.

(2) If the applicant objects to comply with any notice issued under clause (1) of this Condition, he may, within fifteen days from the service of the notice, require that the matter be referred by the Officer Commanding the District to a committee of arbitration.

Condition XX.—If any tenant of the house, being a military or civil officer, considers that his lease should be terminable without notice in consequence of the house having become unfit for occupation, he may apply to the Officer Commanding the District to refer the matter to a committee of arbitration.

Power of tenant to apply for reference to arbitration on question whether house has become unfit for occupation.

Power of either applicant or tenant to apply for reference to arbitration on other questions.

Condition XXI.—If the applicant and any tenant of the house, being a military or civil officer, disagree—

- (a) as to any charge in the rent of the house which is proposed in consequence of dilapidations or additions to buildings or for any other similar reason, or

(b) on any matter relating to rent or repairs, other than a matter referred to in clause (a) of this Condition or in Condition XVIII, Condition XIX or Condition XX,

either the applicant or the tenant may apply to the Officer Commanding the District to refer the matter to a committee of arbitration.

Condition XXII.—Whenever any matter is referred to a committee of arbitration in pursuance of Condition XVIII, Condition XIX, Condition XX or Condition XXI, the Committee shall be constituted as provided in Chapter XX of the Secunderabad Cantonment Code, 1903, and the applicant and his tenant shall be bound by the decision of the Committee.

Condition XXIII.—If the applicant fails to comply with any notice issued under clause (1) of Condition XIX, and has not, within fifteen days from the service of such notice, required that the matter be referred to a committee of arbitration, or,

if any committee of arbitration constituted under Chapter XX of the Secunderabad Cantonment Code, 1903, decides that repairs are necessary, and the applicant fails to execute such repairs within a period to be specified in a notice issued by the cantonment authority in that behalf,

the tenant of the house may himself cause the repairs specified in the notice to be executed at rates not exceeding those paid in the cantonment by the Military Works Department or the Public Works Department, and may deduct the cost thereof from the rent, or otherwise recover it from the applicant.

Condition XXIV.—(1) If the applicant does not commence or complete as required by Condition I the buildings to be erected on the land, the cantonment authority may, by notice in writing, require him to remove all or any buildings or materials which he may have erected or collected thereon: and, if he fails to comply with such notice, the cantonment authority may, after giving him six hours' further notice in writing, cause such removal to be effected and recover the cost from him, and may also cancel the agreement.

(2) If the applicant erects any building or makes any alteration or addition otherwise than as allowed by or under Condition II, the cantonment authority may, by notice in writing, require him to remove the building or to alter the same to its satisfaction; and, if he fails to comply with such notice, the cantonment authority may, after giving him six hours' further notice in writing, cause such removal or alteration to be effected and recover the cost from him.

Condition XXV.—(1) So long as the applicant, his heirs, executors, administrators, representatives or assigns, shall observe the conditions hereinbefore specified and on his or their part to be observed, he or they may, subject to Condition XXVII, hold the land for ever without interruption by the Secretary of State, his successors and assigns.

(2) If the applicant, his heirs, executors, administrators, representatives or assigns, shall in the event of the said buildings being destroyed or injured by earthquake, fire, cyclone or other act of God, fail to commence rebuilding the same as provided in Condition III hereof within six months of such destruction or injury and to reinstate the same fit for use as provided in the said Condition III hereof, and within such period as therein provided, or shall break any of the remaining conditions hereinbefore specified, other than Condition I or Condition II, and on his or their part to be observed, the Resident at Hyderabad may, after giving one month's notice in writing cancel the grant or any portion thereof, and may, on such cancellation, declare all or any part of the right and interest of the applicant, his heirs, executors, administrators, representatives or assigns, in the buildings erected on the land to be forfeited.

Condition XXVI.—The applicant, his heirs, executors, administrators, representatives and assigns, shall not be entitled to compensation for any loss incurred by reason of anything done in pursuance of Condition XXIV or Condition XXV, clause (2).

Condition XXVII.—The Resident at Hyderabad may cancel the grant or any portion thereof at any time after giving one month's notice in writing and on payment of compensation for such buildings or portion thereof as shall have been erected under proper authority. If there shall be any dispute as to the amount of such compensation, the same shall be referred to a committee of arbitration, which shall be constituted as provided in Chapter XX of the Secunderabad Cantonment Code, 1903, and the applicant, his heirs, executors, administrators, representatives and assigns, shall be bound by the decision of the committee of arbitration.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 a.m. on Thursday, the 13th August 1903, based on the India Daily Weather Reports of the period.

During the week under review the monsoon has been feeble along the west coast of the Peninsula and light to moderate showers have been received over that area, as well as inland, over the Deccan and Madras. On the other hand, the current has blown strongly across the Kathiawar coast and has occasioned showers over Gujarat, Rajputana and the south-east Punjab. The heaviest of these showers were 0·85" at Jaipur on the 7th; 2·80" at Ajmer, 5·16" at Jaipur and 4·17" at Kotah on the 8th; 2·97" at Ajmer, 1·99" at Jaipur, 2·82" at Kotah, 1·48" at Ludhiana and 1·26" at Lahore on the 9th; 0·73" at Ajmer and 1·30" at Rawal Pindi on the 10th; 1·44" at Sialkot on the 11th; 0·72" at Mount Abu and 0·27" at Jaipur on the 12th; and 0·90" at Mount Abu on the 13th. The above shows that a steady diminution in the amount of rainfall has taken place over north-west India during the week.

On the opposite side of India the rainfall has been general, but has been irregularly distributed in amount. On the 7th and 8th a shallow, but well-defined, depression existed over the Gangetic plain and rain was falling generally and in places heavily over north-eastern and central India. On the 7th Nowgong received 9·74" of rain and Allahabad, Calcutta, Pendra, Saugor, Sambalpur, Jhansi and Sutna over 2", while on the 8th the rainfall was equally general, though the amounts were smaller, the largest having been 3·40" at Burdwan, 2·61" at Benares and over 1" at Calcutta, Jessore, Allahabad, Lucknow, Cawnpore, Agra, Dehra, Saugor and Nowgong. On the 9th the depression practically disappeared and, for that, and the next two days only light scattered showers were received over the central parts of the country and the Gangetic plain, but on the 12th a strong flow of south-west winds set in over this region and general showers, light to moderate in amount over the open plains but heavy on and near the hills, were reported on the 12th and 13th. The heaviest amounts recorded were 5·13" at Bahraich, 2·02" at Dehra and 1·33" at Gorakhpur on the 12th, and 7·03" at Gorakhpur and over 2" at Bahraich, Bareilly and Roorkee on the 13th.

The eastern branch of the monsoon has blown steadily into Burma, Bengal and Assam during the week, and has given moderate to heavy rain to the Burma coast, the Delta of Bengal and Assam, the heaviest falls reported having been 18·59" and 18·72" at Cherra Poonjee on the 12th and 13th.

The rainfall table shows that rain has fallen during the week in all divisions of India, but that the fall has been very light in the north-west dry area and in parts of Gujarat, of the west Satpuras and of the Deccan, the average actual fall ranging from 0·11" in the north-west dry area, 0·13" in the Bijapur subdivision and 0·27" in the Rajkot subdivision to 13·26" in the Brahmaputra Valley. The week's rainfall exceeded the normal over the following divisions, *vis.* : Burma wet, Bengal, the Brahmaputra Valley, the east Himalayas, the east Gangetic plain, south India and the east coast south and the subdivisions of Cawnpore, Jhansi and Jaipur. The excess was more than 7·00" in the Brahmaputra valley, about 5·00" in the Burdwan and Jaipur subdivisions and over 3·00" in the Darbhanga and Narayanganj subdivisions. Over the remainder of India the rainfall was short of the normal and over north-west India, the Satpuras and the Peninsula (except the south) the deficiency was considerable, only about half the normal amount of the week having been received.

The seasonal rainfall is short of the normal over Upper Burma (—22%), the Calcutta subdivision of Bengal (—21%), the Bahraich subdivision (—28%), the Patna subdivision (—57%), the west Himalayas division (—26%), the west Gangetic plain (—45%), the Ranchi subdivision (—30%), the Jubbulpore subdivision (—21%) and the Jhansi subdivision (—36%).

The 13th August, 1903.

GOVERNMENT OF INDIA.
DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
8th August 1903.

Madras.—Fair to good rain has fallen in the Circars, on the West Coast and the hills and light elsewhere. Water for irrigation is sufficient except in parts of the Deccan, Nellore, Salem and Madura. Ploughing, sowing and transplanting continue. The standing crops generally are in fair condition, but some rain is required in parts of Bellary and Cuddapah. Pasture is sufficient and fodder is procurable. The condition of cattle is good. Prices are almost stationary or have fallen.

Bombay.—Heavy rain fell during the week in parts of the Konkan and Nasik; good rain in parts of Ahmedabad, the Panch Mahals, Surat, Khandesh and Poona; moderate rain in parts of Satara and Belgaum, and slight rain in parts of Sukkur, Thar and Parkar, Kaira, Broach, Ahmednagar, Sholapur, Bijapur and Dharwar. The rainfall generally is sufficient except in parts of Larkana, Nasik, Sholapur and the Carnatic where more rain is needed for autumn cultivation. Inundation in Sindh is satisfactory. The sowing of autumn crops is completed in Khandesh and Sholapur; is almost over in Karachi, Sukkur, Hyderabad and Satara; and is generally in progress elsewhere, except in parts of the Carnatic, where it is retarded for want of sufficient moisture. Transplanting is nearly completed in Sukkur, Hyderabad, the Konkan and Satara and is progressing in parts of Karachi, Larkana, the Upper Sindh Frontier, Gujarat, Nasik, Poona and Baroda. Weeding has commenced in parts of Broach, Thana, Colaba and Khandesh and continues in parts of Kaira, Ahmednagar, Satara, Ratnagiri and Baroda. Young crops have been slightly damaged by insects in parts of the Upper Sindh Frontier, Bijapur and Belgaum; by rats in parts of Dharwar and by excessive rain in parts of Ahmedabad, Surat and Baroda; and are suffering from want of sufficient moisture in parts of Sholapur and Bijapur, but are generally in good condition elsewhere. The fodder-supply is generally sufficient. Agricultural stock are in good condition and are generally sufficient. The water-supply is adequate except in parts of Hyderabad and Bijapur. Prices have fallen in ten districts; have risen in one district and are stationary elsewhere.

Bengal.—The rainfall during the week was general, but unequally distributed and in some districts very insufficient. In Patna, Gaya, Shahabad, Saran and Palamau the prospects of the early autumn crop are much improved, but more rain is still urgently needed for the winter rice crops. The standing crops in Monghyr and Bhagalpur have benefited by the recent rain, but transplantation is retarded for want of more rain. Most of the districts urgently require more rain. Prospects generally have improved, but are still unfavourable. Fodder and water are generally sufficient. The price of common rice has risen in eighteen districts; has fallen in four and is stationary in the remainder.

United Provinces.—Good rain has fallen throughout the Provinces and has considerably improved the condition of the standing crops. Three to 10 inches were recorded in Agra, 7½ in Ghazipur, 6½ in Jhansi and 5 to 5½ inches in eight districts. The falls elsewhere average from 1 to 4 inches, Gorakhpur receiving the least. More rain is still required in Moradabad and Mirzapur and in the Central and Eastern submontane districts. Sowings have recommenced and weeding has begun in parts. Rice is being transplanted in some places, but is only now being sown in others. Markets are full, but fodder is still scarce in five districts. Prices tend to fall.

Punjab.—Good rain has fallen throughout the province. Sowings of autumn crops continue. The condition and prospects of standing crops are good. Crops have greatly

benefited by the recent rain, except in parts of Amritsar, where they have been damaged by excessive rain in lowlying lands. Crops have been slightly damaged by locusts in Lodhran. Locusts laid eggs in parts of Mooltan, but measures have been taken for their destruction. Locusts appeared in parts of Ferozepur and Lahore, but did no damage. Cattle are generally in good condition. Fodder is reported to be sufficient throughout the province. The price of wheat is falling in Hissar and Umballa, but is unchanged elsewhere. The prices of other food-grains are generally unchanged.

North-West Frontier Province.—Timely and sufficient rain has fallen throughout the province excepting Bannu and parts of Peshawar where more rain is urgently needed. Prospects of the standing autumn crops are good, but on unirrigated lands their success depends on the continuance of rain. Flood and canal irrigation is generally satisfactory. Cattle are in good condition. Fodder is sufficient and stocks of food-grains ample. Prices are rising slightly in Peshawar, but falling in Dera Ismail Khan.

Burma.—The rainfall has been heavy in Akyab and Amherst; slight in the central districts, with none for Shwebo, and sufficient elsewhere. The state of wet-weather paddy cultivation is the same as last reported. The reaping of dry-weather paddy is completed in the Saljngyi township of the Lower Chindwin district and the reaping of early wet-weather paddy continues in the three districts previously named. Ploughing and sowing are retarded for want of rain in most parts of all the townships of the Thayetmyo district and in parts of Shwebo, the Sagaing subdivision of Sagaing and Myingyan in Lower Chindwin agricultural operations have been renewed. Sowing of *juar* is in progress in Mandalay and parts of Pakokku and Myingyan and ploughing is proceeding in the Ava subdivision of Sagaing. Rain is badly wanted in Thayetmyo, Pakokku, Shwebo, Sagaing, Lower Chindwin and Meiktila and is also required in Minbu, Magwe, Mandalay and the Ruby Mines district and in the Thegon and Paungde townships of Prome. In the Minhla township some of the crops have been destroyed, owing to drought, and are withering from the same cause in the Kama and Thayetmyo townships of Thayetmyo. Similarly they are drying in the Myaing, Tilin and Seikpyu townships of Pakokku and in the Chaungu township of Sagaing. Crop prospects are good in Lower Burma; poor in the dry zone tract and fair in the remainder of Upper Burma. The price of paddy has risen considerably in Prome and Thayetmyo and very largely in the Northern Shan States. In seven districts the changes are unimportant. Elsewhere they are stationary.

Central Provinces.—Light to moderately heavy rain has fallen during the week. The heaviest falls were in Saugor 5 inches 42 cents and Damoh 5 inches and 68 cents. Elsewhere the falls range between 3 inches and 43 cents in Sambalpur and 29 cents in Chanda. There has been an opportune break in the rains in the plateau districts, Narsingpur and in the Nagpur country. Weeding operations are now generally in progress. The sowing of *juar* has been resumed in Chanda, Wardha and Nagpur. A break is now desirable in Hoshangabad. Transplanting of rice and thinning operations continue. Crops are generally in good condition in parts of Seoni, Balaghat and Raipur. Heavy rain has caused some damage to crops. Some damage by grass-hoppers is reported from Saugor, Nimar and Raipur and by insects from Seoni. Fodder is sufficient. Prices are fairly steady. The lowest price in seers per rupee are :—Wheat, 18; gram, 24½; rice 13¼ and *juar*, 32. The highest prices are :—Wheat, 10; gram, 12½; rice, 8 and *juar*, 17½. The numbers on famine relief were as follows :—Road construction and repairs :—Raipur, adults, 1,747; Bilaspur—adults, 480. Gratuitous relief—otherwise relieved—Raipur—adults, 8,658; children, 2,017; total, 10,675. Bilaspur—adults, 842; children, 200; total, 1,042. Bhandara—adults, 1,251; children, 104; total, 1,355. Balaghat—adults, 310; children, 102; total, 412. Total otherwise relieved—13,484. Poor-house, Raipur—adults, 21; children, 33; total, 54. Minor irrigation grant-in-aid works—Bilaspur—adults, 301; children, 31; total, 332. Total on all forms of relief, 16,097. All the Public Works Department camps have been closed.

Assam.—Slight to moderate rain fell in all districts, but more is still wanted. Ploughing for late rice, harvesting of early rice, plucking and manufacture of tea and cutting of jute are in progress. The sowing of early rice still continues in Kamrup. Transplanting of late rice is still retarded in Goalpara, Nowgong and Manipur for want of sufficient rain. Some damage has been caused by insects to late rice in Upper Assam. The prospects of tea and sugarcane are poor in Kamrup. Elsewhere they are fair to good. The prospects of early rice are good in Sylhet, Goalpara, Darrang and Nowgong; poor in Cachar and Kamrup; and fair in other places. The prospects of jute are good in Sylhet and Goalpara and fair in the Garo Hills. Prices of common rice:—Silchar, 14; Sylhet and Tezpur, 13; Gauhati, 12; Dhubri, 11; Nowgong, Sibsagar and Dibrugarh, 10 seers per rupee.

Mysore.—Good rain has fallen throughout, but more is wanted in parts of Chitaldrug. The general prospects are good. Prices are slightly fluctuating. Cattle are healthy, except in parts of Hassan. Water and fodder are sufficient.

Coorg.—Rainfall—one inch 45 cents. Transplanting of rice continues. Prices of food-grains are stationary. Water and fodder are ample.

Berar.—The average rain during the week was 1 inch and 30 cents. The weather is cool and cloudy. The condition of crops is generally fair. The preparation of land for spring crops has commenced in parts of two districts. Sowings continue. Weeding operations are in progress. Fodder and water are sufficient. Prices are stationary.

Hyderabad.—The rainfall during the week was one inch and 54 cents. The prospects are good. The standing autumn crops are generally good. Sowings are almost finished and weeding is in progress. Early rice sowings continue. Lands are being prepared for spring sowings. Prices:—Wheat, 9½; rice, 9 and *juar*, 30 seers per *halli* rupee.

Rajputana.—Rainfall in cents:—Bikaner, average 207; Jaisalmer, average 84; Marwar, average 200; Abu, 1,024; Sirohi, 141; Mewar, 138; Kherwara, 118; Deoli, 419; Tonk, 464; Bundi, 659; Shahpura, 386; Kotah, 1,047; Jhalawar, 846; Jaipur, 745; Kishengarh, 627; Alwar, average 387; Bharatpur, 574; Karauli, 824; Dholpur, average 371; Ajmer-Merwara, average 403. Ploughing and sowings for the autumn crops are in progress. The standing crops are in good condition. The condition of cattle is good. Fodder is sufficient. The price of the cheapest food-grains per rupee was:—Kotah, 40; highest—Sirohi, 14 seers the rupee.

Central India.—The rainfall has been general and sufficient throughout Central India. Agricultural operations are in progress everywhere. Crops are good in Gwalior, Malwa, Bhopawar and Indore; fair in Bhopal and Baghelkhand and average in Bundelkhand. Crops have been slightly injured in parts of Dhar by rats, insects and locusts, and in parts of Indore by insects. Agricultural stock and pasturage are generally good, except in parts of Dhar and Indore, where some cattle-disease continues. Prices are steady in Gwalior and parts of Bhopawar; normal in Bhopal, Bundelkhand, Baghelkhand and Indore; low in Malwa and are falling in Dhar.

Kashmir.—The weather has been bright. Prices are comparatively falling. Rice is selling at 8 seers a rupee. JAMMU: Good rain which is beneficial to the standing crops has fallen throughout the province. Autumn sowings are still in progress. The condition of the standing crops is good. Fodder is sufficient except in some parts. Prices are fluctuating. The price of wheat is from 14 to 26; of maize from 16 to 26 seers the rupee.

Nepal.—Rainfall 2.56 inches for the most part at night, the days being fine and warm. Lowland rice requires more rain, but upland crops are in good condition. The price of rice is 6½ seers for the rupee.

In accordance, with instructions received from Station Staff Officer, Peshawar, the following descriptive roll of No. $\frac{R.A.}{79792}$ Trumpeter C. J. Craig, is published for general information.

This man disappeared from barracks on Sunday, 9th August, about 5 A.M., and has not since been seen. He was dressed in Khaki overalls, helmet, white shirt, no coat.

He was seen to jump into the canal about 2 P.M. that day, and was pulled out by some natives. He was then seen to move off in direction of the Budui River.

I have very little doubt that the man has drowned himself as he was in a depressed condition, owing to bad news received from his relations at home.

The police were immediately informed and are still searching and dragging the rivers and canals, but up to date without success. My instructions are to treat the case as one of desertion, under paragraphs 131 and 132, Army Regulations, India, Volume II, Part B.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 a.m. on Thursday, the 20th August 1903, based on the India Daily Weather Reports of the period.

The rainfall conditions during the present week have been peculiar. At the commencement of the week pressure was much lower than usual over Sind and considerably higher than usual over north-east India. The result was that the wind was much more southerly than the normal over north-west India. This southerly wind passed over the plains of north-west India without depositing any moisture of importance, but on reaching the barrier of the Himalayas the current was forced into ascent and heavy rain was experienced, Chakrata reporting 9·08", Mussooree 7·13", Dehra Dun 6·09", Simla 4·89", Sialkot 3·33" and Ranikhet 2·33" on the 14th and Chakrata 2·19", Simla 1·45", Murree 1·23" and Dera Ismail Khan 1·15" on the 15th. During these two days light to heavy rain was received along the west coast and over Burma and north-east India, but very little over the more central parts of the country. On the 16th conditions began to change. A shallow storm appeared at the head of the Bay. Showers were received over the southern half of the Peninsula, Burma and north-east India, but the rain had ceased over the Himalayan area and central and north-western India were practically rainless. On the 17th there was no important change to record except that the weather was more showery in the central and north-western districts. On the 18th a large shallow depression was shown covering the head of the Bay, south-west Bengal and the adjacent districts of the Central and United Provinces. The weather was fine all over north-western India, but was more or less showery elsewhere. The reports of the 19th showed that the depression had increased in extent, though not in intensity, and that the rainfall distribution was the same as on the preceding day. In the Central Provinces the fall had, however, become heavier and Pachmarhi reported 5·95". Today (20th) the depression has reached the south of the Central Provinces. Its advance has increased the strength of the west coast monsoon and heavy rain has been received along the west coast and general rain over the Deccan and Satpuras, Pachmarhi reporting a fall of 7·19".

The rainfall table shows that the rainfall during the week has been irregularly and unevenly distributed; actually or practically no rain had been received during the week over the Lahore and Rajkot subdivisions and the average actual fall elsewhere ranged from 0·20" in the Jaipur subdivision; 0·51" in the Madura subdivision; 0·53" in the Ahmedabad subdivision and 0·58" in the north-west dry area to 8·27" in the Burma coast division and to 8·23" in the Bombay subdivision. The week's fall has been more than usual over the Burma coast, the east coast (south), the west coast, the west Satpuras and the Deccan divisions and over the Narayanganj, Dinajpur, Darbhanga, Burdwan, Simla, Waltair, Raipur, Jubbulpore and Mysore subdivisions. Elsewhere the fall has been less than usual and in parts of Bengal, Assam, Bihar, the United Provinces, the Punjab, Rajputana and Gujarat the deficiency has been considerable and between 1 and 2 inches in amount.

The seasonal variations show that the rainfall from the 1st of May to date has been considerably short of the normal in the Patna subdivision (—56%), the Cawnpore subdivision (—40%), the Lahore subdivision (—55%) and the Jhansi subdivision (—40%).

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
15th August 1903.

Madras.—The rainfall has been general and good. Water for irrigation is sufficient except in parts of the Deccan, Nellore, Salem and Madura. Ploughing, sowing and transplanting continue. Generally the condition of the standing crops is fair, but some more rain is needed in parts of Bellary, while in parts of Godavari, Kistna and Tanjore they have suffered from heavy rain or submersion. Pasture is sufficient and fodder is procurable. The condition of cattle is good. Prices have fallen or are stationary.

Bombay.—Good rain fell during the week in parts of Kanara. The rainfall was moderate in parts of Colaba, Ratnagiri and Nasik, slight in parts of Kaira, Broach, Surat, Thana, Satara, Bijapur and Dharwar and very slight in parts of Hyderabad, Thar and Parkar, Ahmedabad, the Panch Mahals, Khandesh, Ahmednagar, Poona, Sholapur and Belgaum. It is generally sufficient, but more is needed for the standing crops and autumn cultivation in parts of Nasik, Sholapur and the Carnatic. Inundation in Sindh is satisfactory. The sowing of autumn crops is completed in Ahmednagar and Sholapur; is almost over in Hyderabad, the Upper Sindh Frontier and Nasik and is generally in progress elsewhere. Transplantation is completed in Sukkur, the Panch Mahals, Thana and Poona; is almost over in Larkana, Hyderabad, the Upper Sindh Frontier and is progressing in parts of Karachi, Ahmedabad, Kaira, Surat, Ratnagiri and Nasik. Weeding has commenced in parts of Surat, Colaba, Khandesh and Poona and continues in parts of Kaira, Broach, Thana, Ahmednagar, Satara and Kanara. Young crops have been slightly damaged by insects in parts of the Upper Sindh Frontier and Bijapur; by rats in parts of Belgaum; by excessive rain in parts of Belgaum and Baroda and are suffering from want of sufficient moisture in parts of Sholapur, but are generally in good condition elsewhere. Fodder is sufficient. Agricultural stock are in good condition and generally sufficient. The water-supply is adequate except in parts of Bijapur. Prices have fallen in four districts; have risen in one district and are stationary elsewhere.

Bengal.—The rainfall during the week was general, but not evenly distributed. It was heavy in some parts of North and East Bengal, but very insufficient in most of the districts of Bihar and in several other places. The standing autumn crops have further improved by the recent rain in the districts of Patna, Gaya, Shahabad, Saran, Monghyr, Bhagalpur and Palamau, but the transplantation of the winter rice is retarded for want of sufficient rain. Prospects have improved generally, but are still unfavourable. Paddy is being damaged by insects in parts of Midnapore. Some damage to Indian-corn has been caused by a flood in Champaran. The outturn of sugarcane is estimated at 92 per cent. of a normal crop. Fodder and water are generally sufficient. The price of common rice has risen in twelve districts; has fallen in eleven and is stationary in the rest.

United Provinces.—Rain has fallen throughout the Provinces. Fourteen inches were recorded in Fatehpur, 13 in Naini Tal and 11½ in Gorakhpur, while Dehra Dun, Garhwal and Pilibhit received over 10 inches, but in Bulandshahr, Aligarh, Allahabad, Benares, Jhansi, Hamirpur and Banda the fall averaged less than an inch. More rain is needed for rice. The standing crops are now doing well and prospects have much improved. The sowing and weeding of autumn crops continue, and fields are being prepared for spring crops. Floods have caused some damage in riparian tracts in Bahraich and Gorakhpur. Supplies are ample, but fodder is still reported scarce in Budaun, Hardoi and in tahsil Handia in the Allahabad district. Prices are stationary or are falling.

Punjab.—Rain has fallen in all districts except Mooltan. Transplanting of rice and sowings of other autumn crops continue in some districts. Sowings of autumn crops have been completed in the Hissar, Delhi and Shahpur districts. Ploughing for spring crops has commenced in Jullunder and Amritsar. The condition and prospects of the standing crops are good. Autumn crops have much benefited by the recent rain, except in parts of Sialkot, where they have been damaged by excessive rain in low-lying lands. Crops have been slightly damaged by locusts in parts of Hissar; by dust storms in Fazilka and by heavy floods in parts of Mooltan. Locusts appeared in parts of Ferozepur and Mooltan, but did no damage. Locusts laid eggs in parts of Mooltan, but measures have been taken for their destruction. Cattle are generally in good condition. Fodder is said to be sufficient throughout the province. The price of wheat and other food-grains is generally unchanged.

North-West Frontier Province.—Excellent rain has fallen everywhere excepting Kohat and parts of Peshawar where more is badly required. Crops promise well, but those

on unirrigated lands were sown late and their success is dependent upon the continuance of the rains. Irrigation by hill torrents and canals continues satisfactory. The condition of cattle is good. Fodder is procurable and stocks of food-grains are abundant. Prices are rising slightly both in Peshawar and Dera Ismail Khan.

Burma.—The rainfall was heavy in Akyab and sufficient elsewhere in Lower Burma and in the northern districts and moderate in the entire central tract, including Sagaing with 55 cents and Shwebo with 48 cents. Ploughing for the main paddy crop is practically over in Lower Burma and continues in Upper Burma, and sowing and transplanting are progressing. The reaping of early wet-weather paddy is approaching completion in Mandalay and parts of the Northern Shan States, and has commenced in the Kyaukse township of the Kyaukse district. The reaping of dry-weather paddy continues in the Tilin township and is completed in the Pauk township of the Pakokku district. The reaping of sesamum has begun in the Meiktila township of the Meiktila district. Ploughing for *juar* has commenced in the Myaing township of the Pakokku district and is in progress in Mandalay and the Kyaukyit township of the Sagaing district. Agricultural operations have been retarded in parts of Thayetmyo, of the Wuntho subdivision of the Katha district, Shwebo, the Sagaing subdivision and Chaungu township of the Sagaing district and in Myingyan. The standing crops are withering in all but two townships of Thayetmyo, Shwebo, Lower Chindwin and Myingyan. Rain is generally deficient in the dry zone. The light rain which fell in Sagaing benefited the sesamum and cotton crops, but more rain is still much needed here and also in Shwebo, in the Pyuntaza subdivision of the Pegu district. Some destruction has been caused to young plants by floods. The stock of food-grains is reported exhausted in three villages of the Wundwin township of the Meiktila district. The price of paddy has advanced largely in the Northern Shan States. Slight changes occur in five centres. Elsewhere they are stationary.

Central Provinces.—Light to moderately heavy rain has fallen during the week except in Nimar, Betul and Chhindwara. The heaviest falls have occurred in the Nagpur Country and Chhattisgarh. A break in the rains has proved beneficial to crops in parts of the Chhindwara and Balaghat districts, but more rain is needed in Jubbulpore. Excessive rain has caused some damage to *juar*, *til* and cotton crops in the Seoni district and parts of the Nagpur Country where a break is badly needed. Some damage by grass-hoppers is reported from the Raipur district. Weeding operations are in full swing whilst the transplanting of rice approaches completion. Fodder is sufficient. Prices are fairly steady with a slight tendency to fall. The numbers on relief were as follows:—Gratuitous relief—otherwise relieved—Raipur, adults, 7,899; children 1,852; total, 9,751. Bilaspur—adults, 650; children, 193; total, 843. Bhandara—adults, 1,198; children 101; total, 1,299. Balaghat—adults, 308; children, 103; total, 411. Total otherwise relieved—12,304. Poor-house—Raipur—adults, 21; children, 32; total, 53. Minor irrigation grant-in-aid works—Bilaspur—adults, 199; children, 14; total, 213. Total on all forms of relief, 12,570.

Assam.—Heavy rain fell in Sylhet, the Khasia and Jaintia hills and the Garo hills and slight to moderate rain elsewhere. Rain is still deficient in Manipur. Ploughing for late rice, harvesting of early rice, plucking and manufacture of tea, setting of jute and transplanting of late rice are in progress. Sowing of early rice still continues in Kamrup. Some damage has been caused by insects to late rice in Upper Assam. The prospects of tea and sugarcane are poor in Kamrup. Elsewhere they are fair to good. The outturn of early rice is good in Sylhet, Goalpara, Darrang and Nowgong; poor in Cachar and Kamrup and fair in other places. The prospects of jute are good in Sylhet and Goalpara and fair in the Garo hills. Prices of common rice:—Silchar, Sylhet and Tezpur, 13; Gauhati, 12; Dhubri, 11; Nowgong, Sibsagar and Dibrugarh, 10 seers per rupee.

Mysore.—Good rain fell throughout the province, but more is wanted in parts of Chitaldrug. The general prospects are good. Prices have slightly risen in two districts. Cattle are healthy except in parts of Chitaldrug and Hassan. Water and fodder are available.

Coorg.—Rainfall—2 inches and 17 cents. Transplanting of rice continues. Prices of food-grains are stationary. Water and fodder are ample.

Berar.—There was practically no rain during the week except at Wun where 2 inches and 51 cents were registered. The weather is warm and cloudy. Crops are doing fairly well. Preparation of land for the spring crops is in progress. Sowings have been completed in the Amraoti district. Weeding operations continue. Fodder and water are sufficient. Prices are almost stationary.

Hyderabad.—The rainfall during the week was 64 cents. The autumn and early rice crops are good. More rain is wanted in parts of Lingsagur for autumn rice. Sowings continue. Lands are being prepared for spring sowings. Prospects are good. Prices:—Wheat, 9½; rice, 9 and *juar*, 30½ seers per *halli* rupee.

Rajputana.—Rainfall in cents:—Bikaner, average 146; Marwar, average 227; Jaisalmer, average 493; Abu, 884; Mewar, 15; Kherwara, 40; Kotah, 60; Jhalawar, 12;

ipur, 263; Kishengarh, 560; Alwar, average 139; Bharatpur, 120; Karauli, 301; Dholpur, average 306; Ajmer-Merwara, average 149. Ploughing and sowings for the autumn crops are in progress. Standing crops are in good condition. The condition of cattle is good. Fodder is sufficient. The price of the cheapest food-grain was:—Kotah, 48; the highest—Alwar, 16 seers and 14 chittacks per rupee.

Central India.—The rainfall has been partial and was insufficient in Bundelkhand, but general and sufficient in other agencies. Agricultural operations are in progress everywhere. Crops are good in Gwalior, Bhopawar and Indore; fair in Bhopal, Baghelkhand and Malwa and average in Bundelkhand. Crops have been slightly injured by rats, insects and locusts in Dhar; by locusts in Jobat and Barwani and by locusts and insects in parts of Indore. Agricultural stock and pasturage are generally good and sufficient, except in parts of Dhar, Barwani and Indore. Prices are steady in Gwalior and parts of Bhopawar; normal in Bhopal, Bundelkhand, Baghelkhand and Indore; low in Malwa and are falling in Dhar.

Kashmir.—The weather is bright. Prices are normal. The price of rice is 5½ seers per rupee. **JAMMU.**—There has been good rain. The condition of the standing crops is good. Fodder is sufficient. Autumn sowings are almost complete. Prices are fluctuating. Wheat selling from 13 to 32 and maize from 16 to 35 seers the rupee.

Nepal.—Rainfall 4.92 inches. Three days' steady rain has greatly benefited the upland rice, but the weather is fine again. Indian-corn and upland rice are in good condition. The price of rice is 6½ seers for the rupee.

WAR OFFICE;

7th August, 1903.

The King has been graciously pleased to signify His intention to confer the decoration of the Victoria Cross on the undermentioned officers, whose claims have been submitted for His Majesty's approval, for their conspicuous bravery in Somaliland, as stated against their names :

—	Name.	Act of courage for which recommended.
Bikanir Camel Corps	Captain W. G. Walker, Indian Army.	During the return of Major Gough's column to Danop on the 22nd April last, after the action at Daratoleh, the rear-guard got considerably in rear of the column, owing to the thick bush, and to having to hold their ground while wounded men were being placed on camels. At this time Captain Bruce was shot through the body from a distance of about 20 yards and fell and the path unable to move. Captains Walker and Rolland, two men of the 2nd Battalion, King's African Rifles, one Sikh and one Somali of the Camel Corps were with him when he fell. In the meantime the column being unaware of what had happened were getting further away. Captain Rolland then ran back some 500 yards and returned with assistance to bring off Captain Bruce, while Captain Walker and the men remained with that officer, endeavouring to keep off the enemy who were all round in the thick bush. This they succeeded in doing, though not before Captain Bruce was hit a second time, and the Sikh wounded. But for the gallant conduct displayed by these officers and men, Captain Bruce must have fallen into the hands of the enemy.
Berbera Bohotle Flying Column.	Captain G. M. Rolland, Indian Army, Intelligence Officer.

The King has been graciously pleased, to give orders for the following appointment to the Most Honourable Order of the Bath in recognition of the services of the undermentioned officer during the recent operations in Somaliland :

Bills introduced in the Council of the Governor General of India for making Laws and Regulations, Reports of Select Committees presented to the Council, and Bills published under Rule 23.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 28th August, 1903:

NO. 13 OF 1903.

A Bill to amend the Indian Official Secrets Act, 1889.

WHEREAS it is expedient to amend the Indian Official Secrets Act, 1889; It is hereby enacted as follows:

1. This Act may be called the Indian Official Secrets (Amendment) Act, 1903.
Short title.
2. In section 3 of the Indian Official Secrets Act, 1889, the following alterations shall be made, namely:
Amendment of section 3, Act XV, 1889.
 - (a) in sub-section (1), sub-head (a), for the words "for the purpose of wrongfully obtaining information" the words "without lawful authority or permission (the proof whereof shall be upon him)" shall be substituted;
 - (b) in clause (ii) of the same sub-section and sub-head,—
 - (i) after the words "obtains" and "obtain" the words "or attempts to obtain" and "or any copy of any such document, sketch, plan or model," respectively, shall be inserted, and

(ii) the words "without lawful authority" shall be omitted;

(c) in clause (iii) of the same sub-section and sub-head, the words "without authority given by or on behalf of Her Majesty" shall be omitted; and

(d) in sub-head (c) of the same sub-section and in sub-section (2), for the words "naval or military" the words "naval, military or civil" shall be substituted.

3. For section 5 of the said Act the following Substitution of sections shall be substituted, namely:
Substitution of sections for section 5, Act XV, 1889.

"5. Notwithstanding anything in the Code of Offences under Act Criminal Procedure, 1898, every offence against this Act shall, for the purposes of the said Code, be deemed to be cognizable and non-bailable.

"6. (1) Notwithstanding anything contained in section 59 or section 60 of the said Code, any private person or police-officer who has arrested any person on a charge of an offence under section 3, sub-section (1), sub-head (a), and any police-officer to whom any person arrested on any such charge has been made over, may, instead of making over the person so arrested to a police-officer or taking him to the nearest police-station or taking or sending him before a Magistrate having, subject to the provisions of section 7, jurisdiction in the case or before the officer in charge of a police-station, as the case may be, take or send him before the commanding officer for the time being of the nearest military station or such other officer as the Local Government or the Governor General in Council may, by general or special order, direct in this behalf.

(2) Where any person has been taken or sent before the commanding or other officer in accordance with sub-section (1), such officer may, if he thinks fit, discharge such person, but, if he does not discharge him, shall, without unnecessary delay, take or send him to the nearest police-station or to any Magistrate having, subject to the provisions of section 7, jurisdiction in the case.

(3) Where any person has been taken or sent to a police-station or to a Magistrate under sub-section (2), the provisions of the Code of Criminal

Procedure, 1898, shall, save as otherwise provided by section 7, apply to him as though had been taken to such police-station or Magistrate without being taken or sent before officer commanding the station or other officer.

"7. No Magistrate or Court shall proceed with the trial of any person charged with an offence against this Act, except with the consent of the Local Government or the Governor General in Council."

Restriction on trial of offences.

STATEMENT OF OBJECTS AND REASONS.

THE present Bill is designed to remedy certain defects disclosed by experience in the Indian Official Secrets Act, 1889 (XV of 1889), and tending to render it less effective for the objects which it had in view.

Clause 2.—The criminality of the acts specified in section 3 should be made to depend less on the purpose with which they are done—which is hardly susceptible of proof—than on the fact that they are committed "without lawful authority or permission"; the burden of proof as to the grant of such authority or permission being placed on the person charged as a matter especially within his knowledge. It should also be made clear that the section applies to the divulging of secret information connected with the civil administration as well as naval and military affairs, and it is proposed to extend it so as to cover attempts, and further to apply to copies of documents the provisions at present limited to originals.

Clause 5 introduces certain amendments which are necessary to permit of offenders being arrested without delay and to authorise Courts to take preliminary action in cases brought before them in anticipation of Government sanction being obtained to a prosecution. At the same time facilities are introduced by which a person who is arrested may be taken at once before some superior and responsible officer, who will discharge him unless he sees reason for taking the matter into Court.

**GOVERNMENT OF INDIA.
LEGISLATIVE DEPARTMENT.**

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 28th August, 1903 :

NO. 14 OF 1903.

A Bill to give effect to the Foreign Marriages Order in Council, 1903.

WHEREAS it is expedient to give effect to the Foreign Marriages Order in Council, 1903 ; It is hereby enacted as follows :

Short title, extent and application. 1. (1) This Act may be called the Indian Foreign Marriage Act, 1903.

(2) It extends to the whole of British India, inclusive of British Baluchistan, the Santhal Parganas, the Shan States, and the Pargana of Spiti ; and

(3) It applies also to all British subjects and to all servants of the King, whether British subjects or not, in the territories of any Native Prince or State in India.

2. (1) Notice in writing of a marriage which it is intended to solemnize under the Foreign Marriage Act, 1892, may be given by one of the parties intending such marriage, to—

(a) a Marriage Registrar appointed under the Indian Christian Marriage Act, 1872, where either of such parties is a person professing the Christian religion ;

(b) a District Magistrate, Chief Presidency Magistrate or Political Agent, where

neither of such parties is a person professing the Christian religion :

Provided that the party giving such notice as aforesaid shall have had his usual place of abode for not less than three consecutive weeks immediately preceding the giving of notice within the local limits of the area for which the Marriage Registrar, Magistrate or Political Agent to whom the notice is given, is appointed.

(2) Every notice given under this section shall state—

(a) the name and description of each of the parties intending marriage ;

(b) the residence of each of them ;

(c) the time during which each of them has dwelt there ; and

(d) the place in which the intended marriage is to be solemnized ;

and it shall contain a declaration by the party giving the notice to the effect that he believes that there is no impediment of kindred or affinity or other lawful hindrance to the solemnization of the said intended marriage.

(3) A copy of every notice given under this section shall be published by being affixed in some conspicuous place in the office of the officer to whom the notice is given.

(4) On the expiration of four clear days after such notice as aforesaid has been published in the manner prescribed by sub-section (3), the officer to whom the notice is given, unless he is aware of any impediment of kindred or affinity or other lawful hindrance to the solemnization of the said intended marriage, shall, on payment of such fee (if any) as the Governor General in Council may fix in this behalf, furnish the party by whom the notice was given, with a certificate, under his hand and seal, to the effect that the notice has been so given and published.

STATEMENT OF OBJECTS AND REASONS.

THE Foreign Marriages Order in Council, 1903, directs that, if a marriage officer proceeding under the Foreign Marriage Act, 1892 (55 & 56 Vict., c. 23), is satisfied that such notice of an intended marriage has been given by a party dwelling in India as may be required by any law of the Governor General in Council giving effect to that Order, such notice shall be sufficient for the purposes of the Statute; and it is further explained that a law of the Indian Legislature shall be deemed to give effect to the Order if it provides—

- (1) that notice of a marriage intended to be solemnized under the Statute referred to may be given by one of the parties intending such marriage, who has had his or her usual place of abode for three consecutive weeks immediately preceding in some place in India, to such marriage registrar or other officer as may be designated by the law in this behalf;
- (2) that such notice shall be published either by proclamation of banns or in such other manner as the law may provide; and
- (3) that such marriage registrar or other officer, unless he is aware of any impediment or objection which should obstruct the solemnization of the marriage, shall, on payment of such fee, if any, as the law may fix, give a certificate that the said notice has been so given and published as aforesaid.

The present Bill is intended to give effect to this Order in Council.

The 21st August, 1903.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on 28th August, 1903:

NO. 15 OF 1903.

1 *Bill further to amend the Lepers Act, 1898.*

WHEREAS it is expedient further to amend Lepers Act, 1898, by providing for the segregation and medical treatment in British India of lepers belonging to Native States; It is hereby enacted as follows:

This Act may be called the Lepers (Amendment) Act, 1903.
Short title.

2. After section 18 of the Lepers Act, 1898, III of the following section shall be added, namely:
Addition of new section after section 18, Act III, 1898.

" 19 The Governor General in Council may, by notification in the Gazette of India, direct that any leper or class of lepers, with respect to whom an order for segregation and medical treatment has been made by a Magistrate having jurisdiction within the territories of any Native Prince or State in India, may be sent to any leper-asylum specified in such order; and thereupon the provisions of this Act and of any rules made thereunder shall, with such modifications not affecting the substance as may be reasonable and necessary to adapt them to the subject-matter, apply to any leper sent to a leper-asylum in pursuance of such notification as though he had been sent by the order of a Magistrate having jurisdiction under this Act "

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is, as stated in the preamble, to provide, by an amendment of the Lepers Act, 1898 (III of 1898), for the segregation and medical treatment of lepers belonging to Native States. The Act extends as a territorial law only to British India, a person brought from a Native State in police custody is not a "pauper leper" within the meaning of section 2, and a Local Government cannot, under section 3 as it stands, specify local areas in Native States from which lepers may be sent, for the purposes of the Act, to a British Indian leper-asylum.

INDIAN TARIFF (AMENDMENT) BILL.

The Hon'ble SIR EDWARD LAW moved that the Bill further to amend the Indian Tariff Act, 1894, be taken into consideration. He said:—"I believe that the situation rendering legislation advisable is fully understood, and I think it is

unnecessary for me now to add anything to the statement made on the subject when I introduced the Bill."

The motion was put and agreed to.

The Hon'ble SIR EDWARD LAW moved that the Bill be passed.

The Hon'ble MR. CABLE said :—" Before the Bill now under consideration is passed, I desire to congratulate Your Excellency's Government upon having come to the decision of extending for a further period the present Act, thereby carrying to a successful conclusion the object of the original legislation. I note that the Hon'ble Member in charge of the Bill alluded on a previous occasion to the possibility of a further extension being necessary. It is well of course to be prepared for any eventuality, but the mercantile community, whom I represent and who are fully in accord with the provisions of this Bill, hope and expect that no further extension may be necessary.

" The reasons for the extension of the provisions of the present Act up to the 31st March next have previously been referred to by the Hon'ble Member in charge of the Bill. The facts are well known to the public and need not be referred to by me. All that has ever been asked for is fair play for the refining industry of India. That was the intention, and has been the effect, of the present Act. In this connection I may usefully quote from the Hon'ble Mr. Finlay's speech when the present scale of duties was imposed :

' The Government of India,' said Mr. Finlay, ' has never proposed or contemplated giving to the sugar industry of India protection against the fair and ordinary competition of foreign sugar. The protection has been restricted to that against the unfair competition of bounty-fed sugar, and the countervailing duties have been limited to the amount of the bounties.'

' If a defence of the present Bill were necessary, I should take as my text those words of the Hon'ble Mr. Finlay. If the refining industry of India cannot thrive under conditions of fair and ordinary competition with foreign sugars, I for one should say, let it perish.

" I am led to make these observations because I have heard it alleged that the present Bill is of a protective character ; but I do not so regard it. Nor do I look upon it—as I believe some do—as an indication that the Government of India are favourably inclined towards those views of the nation's fiscal policy which have been of late so closely associated with the name of the Secretary of State for the Colonies. A moment's consideration will be sufficient to show that there is no sort of resemblance between the present measure—which is purely defensive—and any scheme of preferential tariffs. I do not know how the Government of India view the difficult questions which the Colonial Secretary has raised, but I have no doubt that in due course the commercial bodies in India will be given an opportunity of expressing their opinions."

The motion was put and agreed to.

INDIAN OFFICIAL SECRETS (AMENDMENT) BILL.

The Hon'ble MR. ARUNDEL moved for leave to introduce a Bill to amend the Indian Official Secrets Act, 1889. He said :—" The object of the Bill is to remedy certain defects which have been found in the Indian Official Secrets Act, 1889.

" With regard to section 3 of the Act, it is difficult, if not impossible, for the prosecution to give actual proof that an accused person was actuated by a wrongful intention in endeavouring to procure information. Clause 2 of the Bill therefore proposes to substitute the words ' without lawful authority or permission the proof whereof shall be upon him,' that is, upon the accused person.

" It is also considered necessary to make it clear that secret information relating to civil as well as to naval and military affairs is protected by the law.

" Provision has also been made to guard against attempts to commit the offences specified in the Act, and also to treat copies of documents in the same way as originals.

" Clause 3 of the Bill provides for the arrest of offenders and authorizes Courts to take preliminary action pending the orders of Government as to whether a prosecution should be instituted. It also provides for the immediate

release of an accused person by a responsible officer if the latter considers that there is no need to take the case into Court."

The motion was put and agreed to.

The Hon'ble MR. ARUNDEL introduced the Bill.

The Hon'ble MR. ARUNDEL moved that the Bill, together with the Statement of Objects and Reasons relating thereto, be published in the Gazette of India in English, and in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The motion was put and agreed to.

INDIAN FOREIGN MARRIAGE BILL.

The Hon'ble MR. ARUNDEL moved for leave to introduce a Bill to give effect to the Foreign Marriages Order in Council, 1903. He said:—"On several occasions difficulties have arisen in connection with the intended marriage of British subjects under the provisions of the Foreign Marriage Act and Foreign Marriages Order in Council, 1892, in cases where one of the parties has been resident in India.

"The Foreign Marriages Order in Council requires that in cases where one of the parties has not been resident within the district of the Marriage Officer, who is to celebrate the marriage, that party shall produce a certificate from the Marriage Officer of the place in which he or she has been resident, that proper notice has been given of the marriage; but these requirements of the Order in Council relate only to foreign countries and to the United Kingdom, while no instructions are given concerning notice of marriage by persons resident in India.

"After some correspondence between the Secretary of State and the Government of India an Order in Council was issued on the 12th March, 1903, to the following effect:

'1. The following further modifications of the requirements of the Foreign Marriage Act, 1892, as to residence and notice which appear to His Majesty to be consistent with the observance of due precautions against the solemnization of clandestine marriages, shall have effect in cases where one only of the parties has dwelt within the district of the Marriage Officer and the other of such parties has dwelt in a Colony or in India, that is to say:

- (1) if the Marriage Officer is satisfied that such notice has been given by the party dwelling in such Colony or in India as may be provided by any law in that Colony or of the Governor General of India in Council (as the case may be), giving effect to this Order;
- (2) in any such case the oath, affirmation or declaration required by section 7 of the Foreign Marriage Act shall be made subject to the modifications thereof to which effect is given by article 6 of the Foreign Marriages Order in Council, 1892.

'2 A law enacted by the Legislature of a Colony or by the Governor General of India in Council shall be deemed to give effect to this Order if it makes provision (in whatever terms expressed) as follows:

- (1) that a notice of a marriage intended to be solemnized under the Foreign Marriage Act may be given by one of the parties intending such marriage who has had his or her usual place of abode for three consecutive weeks immediately preceding in some place in that Colony or in India (as the case may be) to such Marriage Registrar or other officer as may be designated by the law in this behalf;
- (2) that such notice shall be published either by proclamation of banns or in such other manner as the law may provide; and
- (3) that such Marriage Registrar or other officer, unless he is aware of any impediment or objection which should obstruct the solemnization of the marriage, shall, on payment of such fee, if any, as the law may provide, give a certificate that the said notice has been so given and published as aforesaid.'

"The Bill which I beg for leave to introduce is intended to give effect to this Order in Council. It extends to the whole of British India, and applies to all British subjects and to all servants of the King, whether British subjects or not, in the territories of any Native Prince or State in India.

"The Bill is purely permissive and nothing in it affects a valid marriage solemnized outside its provisions."

The motion was put and agreed to.

The Hon'ble MR. ARUNDEL introduced the Bill.

The Hon'ble MR. ARUNDEL moved that the Bill, together with the Statement of Objects and Reasons relating thereto, be published in the Gazette of India in English, and in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The motion was put and agreed to.

LEPERS (AMENDMENT) BILL.

The Hon'ble MR. RALEIGH moved for leave to introduce a Bill further to amend the Lepers Act, 1898. He said:—"The object of the Bill is to provide for the segregation and treatment of lepers belonging to Native States. Under the law as it now stands, a Local Government cannot specify areas in Native States from which lepers may be sent to asylums in British India. It is obviously expedient that this power should be exercised in certain cases, and, as the Bill can hardly be said to raise any disputed question, it will not, I think, be necessary to refer it to a Select Committee. At a future meeting of the Council, I propose to move that the Bill be taken into consideration and passed."

The motion was put and agreed to.

The Hon'ble MR. RALEIGH introduced the Bill.

The Hon'ble MR. RALEIGH moved that the Bill, together with the Statement of Objects and Reasons relating thereto, be published in English in the Gazette of India and in the local official Gazettes.

The motion was put and agreed to.

The Council adjourned to Friday, the 18th September, 1903.

QUESTION OF THE FUTURE ORGANIZATION OF THE CANTONMENT MAGISTRATES' DEPARTMENT.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

JUDICIAL.

NOS. 1507—1521.

Simla, the 24th August, 1903.

RESOLUTION.

The Government of India have recently considered, in communication with the Secretary of State, the question of the future organization of the Cantonment Magistrates' Department. The difficulty of obtaining a regular supply of efficient Cantonment Magistrates does not now come before the Government of India for the first time. Attempts have been made to remove it by various systems of recruitment, all of which have proved more or less unsatisfactory. Before the year 1864 Military Officers had been employed as Magistrates and Superintendents of Abkari and Bazaars in Cantonments; but, in that year, the passing of Act XXII (an Act to make provision for the administration of Military Cantonments) afforded new reasons for requiring from such officers special qualifications for their civil duties. It was accordingly ruled that they should pass the examination prescribed for officers entering the Staff Corps through the Civil Department, and that they should be regarded as officers in civil employ, liable to the departmental examination for civil officers, and eligible for general promotion in the Civil Department. Cantonment Magistracies were then divided into two grades, on a consolidated pay of Rs. 1,000 and Rs. 700 a month respectively. The tenure of the post was unlimited, and the holder retained it on being admitted to Colonel's allowances or on attaining the age of 55 years. This scheme failed to afford an inducement to officers to enter the Department. By the year 1875 no appointments had been made in the ordinary civil line from among Cantonment Magistrates in the North-Western Provinces and the Punjab, and only one such appointment had been made in Bengal. In consequence of a representation made to the Commander-in-Chief in 1886, that the system was working badly mainly because suitable officers had been appointed as Cantonment Magistrates and could not be removed, the Government of India, in August 1887, ordered, as a provisional arrangement, that the tenure of Cantonment Magistracies should in future be limited to five years, with a possible extension to seven years. The consolidated rates of pay fixed in 1887, which would have been needlessly high for officers appointed for this limited period, are revised as follows:—

Rank of officer.	Initial pay.				On passing the Higher Standard Examination.
	Rs.				Rs.
Subaltern	600	700
Higher rank	700	800

To meet the objection arising from the periodical admission to civil employ of untrained Military Officers, who would be engaged in important magisterial work, candidates for the Cantonment Magistrates' Department were required to pass a qualifying examination in the Civil and Criminal Procedure Codes, the Indian Penal Code, and other laws commonly administered by Cantonment Magistrates. These orders had not been in force more than three years when Lord Roberts, who was then Commander-in-Chief in India, took strong exception to the new arrangement. The main objection urged from a military point of view was that officers lost in efficiency through absence from military duty, and, after having been for five years in an independent civil position, were disinclined to perform such duty on their return. From the civil point of view it was represented that an officer had barely time to become an efficient Cantonment Magistrate before he had to make way for an inexperienced successor. It was then decided to abandon the system tentatively introduced in 1887 and to revert to the one previously existing, with the important difference that, whereas the highest pay (Rs. 1,000) under the earlier system had proved insufficient to induce competent officers to adopt the career permanently, the pay of the higher grades was to be so regulated as to make the appointments sufficiently

attractive for this purpose. With the same object it was resolved to reserve the appointments in the Judge Advocate General's Department preferentially (though not exclusively) for qualified Cantonment Magistrates. It was also arranged that officers appointed as Cantonment Magistrates should be seconded in the Military Department after a year, and should, after five years, either return to their regiments or be struck off the strength. The following allowances were provided in addition to Staff Corps pay of rank :

	Rs.
On first appointment	200
On passing the Departmental Lower Standard Examination ...	250
On passing the Departmental Higher Standard Examination ...	300
After five years' substantive service as Cantonment Magistrate ...	400
After ten years' substantive service as Cantonment Magistrate ...	500

2. These conditions of service, which were approved by Lord Kimberley in October 1892, have remained in force up to the present day. Experience has shown that they do not ordinarily secure a suitable stamp of officer for the Department, and great difficulty has been experienced in recruiting, especially in the case of leave vacancies. The system is defective in failing to provide a stimulus to effort and a check upon inertness, in the shape of promotion by selection. Good work is done in individual cases, but speaking generally the Government of India observe a tendency among officers to assume that their position is assured, and that further advancement is only a matter of length of service, with the inevitable result that the energies of the Department as a whole are impaired. The reluctance of Military Officers to enter the Department under existing conditions has made it almost impossible to replace an officer taking leave except by another simultaneously returning. In some cases it has been possible either to depute a civil or a regimental officer to perform the Cantonment Magistrate's duties in addition to his own, or even to leave the Cantonment Magistracy unfilled for a time. Such arrangements are not satisfactory, but, in many recent cases, even their adoption was impossible, and the leave applied for had to be postponed or refused altogether. Further, the Government of India have received a representation from the Military authorities that the executive duties of Cantonment Magistrates are either neglected or inefficiently performed, owing to the appointment of incompetent officers.

3. In these circumstances the Government of India determined to refer the whole question of the constitution of the Cantonment Magistrates' Department and the causes of its unpopularity and inefficiency to a competent Committee, consisting of Mr. J. P. Hewett, then Home Secretary, Major-General G. Henry, then Quarter Master General in India, and Lieutenant Colonel H. B. Thornhill, then Cantonment Magistrate of Bareilly. The Committee considered that, in order to attract officers with the necessary qualifications to the Cantonment Magistrates' Department, it was essential that the prospects of the Department should be improved. In order to effect the required improvement, they recommended—

(a) the addition of two new grades of selected Cantonment Magistrates, *vis.* :

	Officers.	Staff pay. Rs.
1st grade	3	700 a month,
2nd grade	6	600 a month ;

(b) the creation of a reserve consisting of two officers ;

(c) the creation of five new appointments of Assistant Cantonment Magistrates at Umballa, Meerut, Mhow, Poona-Kirkee, and Quetta ;

(d) the creation of two new appointments of Cantonment Magistrate at Nowshera and Jubbulpore ; and

(e) the appointment of an Inspecting Officer of Cantonments on a staff pay of Rs. 1,000 a month.

4. These recommendations have been accepted by the Secretary of State, except that the appointment of an Inspecting Officer of Cantonments has been sanctioned, in the first instance, for a period of five years ; and, in promulgating them for general information, the Government of India invite attention to the following remarks and instructions regarding the several matters referred to by the Committee.

5. The Government of India trust that the improved prospects which these arrangements offer will attract suitable officers to the Department. In future promotion to the two highest grades, which carry a staff pay of Rs. 700 and Rs. 600 a month respectively, will be made entirely by selection, vacancies, whether permanent or temporary, being filled as a rule by officers who have completed ten years' departmental service. Cantonment Magistrates of ten years' service will ordinarily, unless adversely reported on, be eligible for a staff pay of Rs. 500 a month. Recommendations for the grant of this rate of pay, as well as for promotion to the grades of Rs. 600 and Rs. 700, permanent or temporary,

will be made by the Quarter Master General in India (who receives the confidential reports regarding the administrative capacity and judicial work of Cantonment Magistrates) to the Government of India, by whom they will be carefully considered, first in the Military Department and then in the Home Department. The Government of India will examine separately, in consultation with the Quarter Master General in India and Local Governments, the claims of officers to promotion to the two highest grades, and of officiating officers to confirmation in the Department in connection with the new appointments which have been sanctioned.

6. The object of the creation of a reserve of officers is to provide for leave vacancies ; but it is obvious that no reserve of reasonable strength will serve this purpose if an unlimited number of officers are simultaneously allowed to avail themselves of leave. The Government of India have accordingly decided that the number of Cantonment Magistrates who may be on furlough in future shall not exceed 20 per cent. of the cadre posts and that all applications for ordinary furlough in excess of this proportion must be refused. To facilitate the making of the necessary arrangements for the grant of leave, officers should be required to intimate to the Local Government at a date not later than the 1st March their intention to apply for leave during the ensuing hot weather, and Local Governments should give demi-official intimation of the fact to the Government of India. Such intimation is indeed already required by existing orders, but these are not always complied with : and the Government of India desire it to be known that omission to give notice as directed will, unless satisfactory explanation of such omission accompanies the leave application, in future prejudice the officer's chances of obtaining leave.

7. Officers appointed to be Assistant Cantonment Magistrates will receive staff pay as if they were Cantonment Magistrates up to a maximum of Rs. 300 a month, and their services as Assistants will count towards their staff pay when confirmed as Cantonment Magistrates. Regarding appointments to the newly sanctioned Cantonment Magistracies at Jubbulpore and Nowshera, and to the five new Assistant Cantonment Magistracies further orders will be issued subsequently.

8. The appointment of an Inspecting Officer of Cantonments has been decided on, with a view to the improvement of the standards of executive and sanitary work in Cantonments throughout India. The cost of the appointment will be debited to the Military estimates, and the officer will be under the orders of the Commander-in-Chief and attached to the Department of the Quarter Master General in India, being graded as a Deputy Quarter Master General ; but he will be selected from among the senior Cantonment Magistrates in the Department. The Inspecting Officer will spend the greater part of the year on tour, examining the working of Cantonments, co-ordinating results so that the experience gained in one place may be utilized elsewhere, and advising the Military authorities generally as an expert in matters of Cantonment administration. He will also be expected to acquaint himself with the financial position of Cantonments generally and to advise how that position may be improved. It must be clearly understood, however, that he will inspect and report only on the executive work of Cantonment Magistrates, and that his concern with their judicial work will be restricted entirely to the question of how far its nature or amount may interfere with their other duties.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 a.m. on Thursday, the 27th August 1903, based on the India Daily Weather Reports of the period.

The monsoon currents have been light on both sides of India during the week under review, but on the whole fair rain has been received over the greater part of the country.

Except on the 21st and the 27th, the rainfall was light along the west coast and the monsoon current hardly extended into the interior of the Peninsula where, as well as over the Madras coast districts, the rainfall was scanty throughout the week. A fair monsoon however prevailed across the Kathiawar coast and the rainfall in Gujarat was about normal, though further to the northward in Rajputana the weather was fair and a break in the rains prevailed during a considerable part of the week. Over the Central Provinces and the Gangetic plain the weather was variable. Scattered showers fell over this area on the 21st, but on the 22nd the rainfall ceased and only a few occasional showers were received. On the 23rd and 24th, when a shallow storm was forming over the east Satpuras, the rainfall again increased and on the 25th, when the storm had developed somewhat and drifted into the central districts of the United Provinces, rain was falling generally over northern and part of central India. The more important amounts reported on this day were 2'44" at Lucknow, 2'97" at Chakrata, 2'63" at Bareilly, 2'19" at Ranikhet, 2'26" at Jhansi, 2'62" at Pachmarhi and 2'20" at Hoshangabad. On the 26th the storm had still further developed and rain had extended into the Punjab, though it had fallen off over the central parts of the country. On this day over 2" of rain in twenty-four hours were reported from Allahabad, Lahore and Ludhiana and over 1" from a large number of stations. Between the 26th and the 27th the storm retreated eastward to the neighbourhood of Benares and rain ceased in the Punjab, though it continued and increased over the United Provinces. The largest amounts reported were 9'00" at Allahabad, 4'56" at Bahraich, 2'50" at Cawnpore, 1'95" at Lucknow and 1'84" at Gorakhpur.

The Bay of Bengal branch of the monsoon appears to have hardly fed into this storm, but to have been largely directed towards north-east India and Burma, to which areas however it gave fairly heavy rain. Cherra Poonjee reported 3" on the 22nd; Jalpaiguri and Cherra Poonjee over 4" on the 23rd; Patna and Cherra Poonjee over 2'5" on the 24th; Cherra Poonjee 4'5", Diamond Island and Darjeeling 3" and Moulmein, Akyab, Bogra over 2" on the 26th; and Saugor Island 3'4" on the 27th. At the close of the week a fresh storm was apparently developing in the north of the Bay.

The rainfall table shows that rain fell in all divisions during the week, the average actual fall ranging from 0'35" in Burma (dry), 0'26" in the north-west dry area and about 0'35" on the east coast to 7'50" in the Burma coast division, 6'68" in the Dinajpur subdivision, 6'45" in the Brahmaputra division and 6'78" in the Jubbulpore subdivision. The week's rainfall was considerably heavier than usual over the Burma coast, Brahmaputra valley and west Satpuras divisions and the Dinajpur, Bahraich, Ludhiana, Cawnpore, Lahore, Jubbulpore, Jhansi, Bombay and Ahmedabad subdivisions, while it was considerably lighter than usual over the Burma (dry) division and the Burdwan, Waltair, Cuttack, Ranchi and Jaipur subdivisions. Elsewhere the variations from the normal amounted to less than 1".

The seasonal variations show that from the 1st of May to date (August 27th) the rainfall has been considerably short of the normal in Burma (dry) division (—27%), the Patna subdivision (—52%), the Lahore subdivision (—41%) and the Jhansi subdivision (—32%).

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
22nd August 1903.

Madras.—The rainfall has been heavy on the West Coast and the Nilgiris, light in the south and generally good elsewhere. Water for irrigation is sufficient, except in parts of the Deccan, Nellore, Salem and Madura. Ploughing, sowing and transplanting continue. Generally the standing crops are in good condition. Some crops in Godavari and Kistna have been injuriously affected by the heavy rain. Pasture is sufficient and fodder is procurable. The condition of cattle is good. Prices have fallen in some parts; elsewhere they are stationary.

Bombay.—Heavy rain fell during the week in parts of Surat, the Konkan, Nasik and Ahmednagar; good in parts of Sholapur, Bijapur and Belgaum; moderate in parts of Kaira, Khandesh, Poona and Satara and slight in parts of Ahmedabad, the Panch Mahals, Broach, Dharwar and Thar and Parkar. The rainfall is generally sufficient, but more rain is needed for the autumn crops in parts of Larkana, Ahmedabad, Khandesh, Nasik, Sholapur and the Carnatic. Inundation in Sindh is satisfactory. The sowing of autumn crops is completed in Sukkur, Hyderabad, the Upper Sindh Frontier, Poona and Wadhwan; is almost over in Thar and Parkar, Nasik and Satara and generally continues in parts of Larkana, Gujarat, Rajkot and the Carnatic. Transplantation is completed in Larkana, Hyderabad, Surat, Thana, Colaba and Poona; is almost over in Karachi and is progressing in parts of Ahmedabad, Kaira and Nasik. Weeding has commenced in parts of Khandesh and Nasik; continues in parts of Kaira, Broach, Thana, Colaba, Ahmednagar, Satara, Belgaum and Rajkot and is almost completed in Kanara. Young crops have been slightly damaged by insects in parts of Larkana, the Upper Sindh Frontier, Thar and Parkar, the Panch Mahals, Sholapur, Bijapur and Belgaum; by rats in parts of Belgaum and by excessive rain in parts of the Panch Mahals and Surat, but are generally in good condition elsewhere. The preparation of lands for spring cultivation has commenced in parts of Sukkur, Larkana, the Upper Sindh Frontier, Nasik, Ahmednagar, Poona, Sholapur, Belgaum and Dharwar. Fodder is sufficient. Agricultural stock are in good condition and sufficient. Water is adequate. Prices have fallen in three districts; have risen in one district and are stationary elsewhere.

Bengal.—Rain fell during the week in every district, but the fall was generally light and in some districts insufficient. The recent rain has further improved the prospects of the early autumn crop in the districts of Patna, Gaya, Shahabad, Saran, Monghyr, Bhagalpur, the Southal Parganas, Hazaribagh and Palamau, but more rain is urgently needed for the winter rice crop. More rain is required almost everywhere, except in East Bengal and Orissa. The harvesting of early rice and jute continues. Sugarcane is doing well. Transplantation of winter rice is going on, but is somewhat retarded by insufficient rain. Prospects generally have improved. Some damage to crops has been caused by floods in Saran. Fodder and water are generally sufficient. The price of common rice has risen in seven districts; has fallen in twelve and is stationary in the rest.

United Provinces—Rain has fallen in every district, the falls averaging from a few cents. in Muttra, Agra and Etawah to 3 inches in Dehra Dun, Pilibhit and Jaunpur. More rain is needed in the Lower Doab and the south-eastern districts. Weeding and the preparation of fields for spring crops continue. Damage by floods in riparian tracts is reported in Bahraich, Gorakhpur and Gonda. Fodder continues scarce in Budaun, Hardoi, Bahraich and Benares. Supplies adequate and prices stationary.

Punjab.—Rain has fallen in Hissar, Amritsar, Mianwali and Mooltan and in parts of Sialkot and Rawalpindi. A slight fall is also reported from other districts. Sowings of autumn crops are completed in Delhi, Ferozepur, Shahpur and Mianwali and continue in Sialkot, Mooltan and Lahore. Ploughing for spring crops is in progress in Jullundur and Amritsar. The condition and prospects of the standing crops are good. Crops have been slightly damaged by locusts in parts of Hissar, Ferozepur and Mianwali and by floods in parts of Shahpur and Mooltan and by rains in low-lying lands in parts of Sialkot. Cattle are generally in good condition. Fodder is sufficient in all districts. The prices of wheat and other food-grains are generally unchanged.

North-West Frontier Province.—There was no rain during the week except in the hilly tracts of Hazara. More rain is required everywhere. Sowing of maize and other autumn crops are in progress and prospects of the standing crops are good on irrigated and fair on dry lands. Irrigation from canals and hill torrents is satisfactory. Fodder is sufficient and stocks of food-grains are ample. Prices are slightly falling both in Peshawar and Dera Ismail Khan.

Burma.—The rainfall was good in the lower and northern tracts and fair in the central area. There was no rain in Pakokku and Meiktila and only 2 cents in Sagaing. Shwebo received over one inch. In Lower Burma the sowing of wet-weather paddy is nearly completed and transplanting is progressing. In Upper Burma the cultivation is less advanced. Reaping of early wet-weather paddy is completed in Mandalay and is in progress in Kyaukse and the Southern Shan States. The reaping of sesamum has commenced in Myingyan. The sowing of cotton and sesamum is completed in the Yenmabin subdivision of Lower Chindwin. In Shwebo ploughing and sowing have commenced in low lands and land in places is being ploughed for dry crops and sown for broadcast rice in Sagaing. The sowing of maize is completed in the Sagaing subdivision. Ploughing for *juar* and sesamum is in progress in the Myotke subdivision and cotton is being replanted in the Otaungu township. Crops are withering for want of rain in Pakokku and parts of Shwebo, Sagaing, Lower Chindwin, Meiktila and Myingyan. Rain is most wanted in Sagaing, Shwebo, Pakokku, Meiktila and Myingyan and in parts of other districts. The recent rain has improved the sesamum and cotton crops in the Myotha subdivision of Sagaing and in Meiktila. Most of the ground nut crop in the Taze tract of Myingyan has been destroyed by floods from the Irrawaddy. The Thayetmyo report has not been received. Fodder and water are insufficient in Shwebo, the Myinmu subdivision of Sagaing, the Pagan subdivision of Myingyan, the Pauk township of Pakokku, but fodder only in the Meiktila subdivision of Meiktila. The food-stock in three villages of Meiktila is reported as still short. Crop prospects are good in Lower Burma and have improved slightly in Upper Burma, though still poor for the most part. The price of paddy has risen considerably in Pegu and Bassein and slightly at two centres. Elsewhere there is no change. Prices generally are much above normal.

Central Provinces.—Heavy rain has fallen generally throughout the Provinces. Damage has been caused by excessive rain to cotton, *juar* and *til* in the Nagpur Country, Seoni and Chindwara where a break is very urgently needed. Elsewhere prospects are good. Weeding operations are in progress and transplanting of rice is almost completed. Prices have fluctuated but slightly. Gratuitous relief—Raipur, adults, 6,605; children, 1,580; total, 8,185. Bilaspur, adults, 677; children, 139; total, 816. Bhandara, adults, 1,189; children 98; total, 1,287. Balaghat, adults, 306; children, 99; total, 405. Total gratuitous relief, 10,693. Poor-house relief—Raipur, adults, 17; children 29; total, 46. Total on all forms of relief, 10,739.

Assam.—There was moderate rain in all districts. More is still wanted in Manipur. The rice crop has been slightly damaged by floods in Nowgong and Sibsagar and by rain and insects in Darrang. Ploughing for late rice, harvesting of early rice, plucking and manufacture of tea, cutting of jute and transplanting of land-rice are in progress. Prospects of tea and sugarcane are poor in Kamrup. Elsewhere they are fair to good. The outturn of early rice is good in Sylhet, Goalpara, Darrang and Nowgong; poor in Cachar and Kamrup and fair in other places. The prospects of jute are good. Prices:—Common rice—Silchar, 14; Sylhet and Tezpur, 13; Dhubri and Gauhati, 11; Nowgong, Sibsagar and Dibrugarh, 10 seers per rupee.

Mysore.—Rainfall 1 inch and 39 cents in the Civil and Military station of Bangalore: good rain has also fallen throughout the province. General prospects are good. Cattle are healthy except in parts of Mysore, Tumkur and Hassan. Water and fodder are sufficient. Prices are slightly fluctuating.

Coorg.—Rainfall—7 inches and 84 cents. The transplanting of rice continues. Prices of food-grains are stationary. Water and fodder are ample.

Berar.—The average rainfall during the week was 3 inches and 85 cents. The weather is cool and cloudy. Crops are in fair condition. Land is being prepared for the spring crops in three districts. Sowings of *bajra* and other minor monsoon crops still continue. Weeding operations are in progress. Fodder and water are ample. Prices are almost steady.

Hyderabad.—The rainfall during the week was 3 inches and 95 cents. Prospects are good. The autumn and early rice crops are good. More rice is being sown. Lands are being prepared for spring crops. Prices:—Wheat, 9½; rice, 9 and *juar*, 30½ seers per *halli* rupee.

Rajputana.—The rainfall has been slight to deficient in the Eastern and Western Rajputana States, but sufficient elsewhere. The condition and prospects of standing crops are good. Slight damage to crops in Mewar, Kotah and Jhalawar has been caused by excessive rain and insects. Cattle are in good condition. Fodder is sufficient. The prices of food-grains are steady in nine States and are falling in the rest. The price of the cheapest food-grains was:—Kotah, 48; highest, Sirohi, 14 seers the rupee.

Central India.—The rainfall has been general in all Agencies, but was insufficient in parts of Indore and Barwani; but sufficient elsewhere. Agricultural operations are in progress everywhere. Crops are good in Gwalior, Bhopal, Bundelkhand and Bhopawar and fair in Baghelkhand, Malwa and Indore. Crops have been slightly damaged by locusts, insects and continuous rainfall in Dhar and Jhabua and by locusts and insects in

Barwani and parts of Indore. Agricultural stock and pasturage are generally good, except in Dhar, Barwani and parts of Indore, where some cattle-disease continues. Prices are steady in Gwalior, Bundelkhand and Bhopawar; normal in Bhopal, Baghelkhand and Indore and low in Malwa.

RESULTS OF THE MEASURES ADOPTED FOR THE EXTERMINATION OF WILD ANIMALS AND POISONOUS SNAKES DURING THE YEAR 1902.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

PUBLIC.

Nos. 3043—57.

Simla, the 3rd September, 1903.

RESOLUTION.

In Home Department Resolution Nos. 2741—54, dated the 9th September 1902, it was stated that the mortality amongst human beings reported to have been caused by wild animals in 1901 had been greater than that reported in any previous year except one since 1875. In 1902 the total mortality (2,836) from the same cause was considerably below that in 1901 (3,651). The number of deaths caused by hyenas was, however, 64 as compared with 26, and by "other animals" 713 as compared with 479 in the previous year. The deaths reported from snake-bite numbered 23,166 in 1902 compared with 22,810 in 1901.

2. Of the total number of deaths (1,046) reported to have been caused by tigers, more than half (544) occurred in Bengal, the largest number (65) being reported from the district of Singhbhum. In Hazaribagh the number of deaths from this cause rose from 31 in 1901 to 63 in 1902. The increase was due to the depredations of a man-eating tiger, for the destruction of which a special reward of Rs. 250 was offered without result. In Palamau, of the 43 persons killed, most were the victims of another man-eater, for the destruction of which a special reward was also sanctioned. In the Central Provinces the number of deaths caused by tigers fell from 357 in 1901 to 185 in 1902. In Assam too the mortality declined from 88 to 63, and in Burma from 72 to 49. The number of deaths in the Madras and Bombay Presidencies rose from 83 and 28, respectively, in 1901 to 99 and 46 in 1902. In the United Provinces the mortality was the same as in 1901, *viz.*, 39.

3. The number of deaths caused by wolves fell from 403 in 1901 to 377 in 1902. There was a satisfactory decrease in the United Provinces, which usually show the greatest number, from 285 in 1901 to 204 in 1902. The campaign undertaken against wolves in the Rohilkhand and Allahabad Divisions met with a considerable measure of success; and these animals have been almost exterminated from the Cawnpore district, where they used to abound. In the Rohilkhand Division, though the loss of life is still heavy, the large number of wolves destroyed had a distinct effect in reducing the mortality.

4. Bengal as usual accounts for the largest number of deaths from snake-bite, the mortality in that Province amounting to 11,130 out of a total of 23,166 for the whole of British India. The number of deaths reported from the Patna Division alone was 3,258 and from the Presidency Division 1,617. In the United Provinces 5,110 deaths from the same cause were reported, and 1,902, 1,160, 1,123, and 1,304 deaths respectively, were reported in the Madras and Bombay Presidencies, Burma, and the Central Provinces.

5. The number of cattle killed by wild animals rose from 78,896 in 1901 to 80,796 in 1902, while the number killed by snakes fell from 9,123 to 9,019. In Bengal alone 24,777 cattle were destroyed by wild animals; while the figures for Madras, the Central Provinces, and Assam were 11,005, 14,135, and 15,372, respectively. The total number destroyed by tigers amounted to 30,555; by leopards 38,211; by wolves 4,719; and by hyenas 2,387.

6. The number of wild animals for whose destruction rewards were paid during the year under review was 14,983 as compared with 14,301 in 1901. The numbers of tigers, leopards, bears, wolves, and hyenas destroyed were 1,331, 4,413, 1,858, 2,373, and 706, respectively. The amount of the rewards paid for the destruction of animals rose from Rs. 96,952 in 1901 to Rs. 1,00,987 in 1902. The total number of snakes killed was 72,595 as compared with 70,289 in 1901, and the rewards paid for their destruction amounted to Rs. 3,529 as compared with Rs. 2,978.

7. The number of licenses (in Form XI) issued free of cost under the Indian Arms Act, 1878, for the destruction of wild animals or the protection of crops was 9,006 against 8,840 in 1901, and the total number of licenses of this nature in force in 1902, including such as were valid from previous years, amounted to 37,933 as compared with 41,249 in 1901.

ORDER.—Ordered, that a copy of this Resolution be forwarded to Local Governments and Administrations* and that it be published in the *Gazette of India* for general information; also that a copy be forwarded to the Director General of Statistics.

* Including the Hon'ble the Chief Commissioners of the North West Frontier Province and Ajmer-Merwar and the Hon'ble the Resident in Mysore.

H. H. RISLEY,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 a.m. on Thursday, the 3rd September 1903, based on the India Daily Weather Reports of the period.

A break in the rains has prevailed throughout the week under review over north-west India, including Kathiawar, the north-west dry area, the Lahore subdivision of the west Gangetic plain and the Jaipur subdivision of the Central India plateau. Over these areas practically no rain has been received. In all other parts of the country more or less rain has fallen.

On the 28th August the monsoon was light on both sides of India, but light to moderate rain was reported over a large part of the Peninsula, north-east India and the Burma coast. Mergui reported over 4" and Bahraich, Ratnagiri, Karwar, Goa and Hyderabad Deccan 2". On the 29th a fairly well marked storm lay over the north-west of the Bay. The presence of this storm occasioned good rain over the Peninsula and the Burma coast where Karwar and Sholapur reported 3" of rain and Mergui, Moulmein, Goa, Kurnool and Raichur over 2". On the other hand, the storm prevented the flow of monsoon winds into northern India and, with the exception of some showers, generally light, over north-east India, northern and part of central India was practically rainless on this day. On the 30th the storm was crossing the coast. No important change had occurred except that the Bay monsoon current penetrated more freely into north-east India and the rainfall was heavier in that region. The more important amounts on this day were over 3" at Cherra Poonjee and Hanuinkonda and over 2" at Sibsagar and Balasore. Central and north-west India remained practically rainless. The storm passed north-westward into the east of the Central Provinces on the 31st and rain increased at the central stations. Otherwise there was no important change. The more important falls reported on this day were over 3" at Cherra Poonjee and Amraoti and over 2" at Akyab, Sibsagar and Hoshangabad. On the following day, 1st September, the storm had practically filled up and scattered showers were reported from the greater part of the country, except the north-west. Gopalpur reported over 3" and Tavoy, Barisal, Cherra Poonjee, Mussooree and Chanda over 2". Conditions remained practically unchanged on the 2nd and 3rd, during which days more or less heavy showers continued to fall, except in the north-west. The more important amounts of rainfall were over 4" at Pachmarhi and Hoshangabad, over 3" at Diamond Island and over 2" at Gaya and Seoni on the 2nd and over 3" at Moulmein and Dibrugarh and 2" at Sibsagar on the 3rd.

The rainfall table shows that actually or practically no rain fell during the week over the north-west dry area and the Lahore, Jaipur and Rajkot subdivisions. In all other places rain was received, the average actual fall ranging from 0.29" in the Cawnpore subdivision and 0.30" in the Burma dry division to 5.95" in the Burma coast division, 5.03" in the Brahmaputra division and 5.41" in the Bombay subdivision. The week's rainfall was lighter than usual, except in the east-coast (north), the west coast, the west Satpuras and the Deccan divisions and the Raipur, Jubbulpore and Mysore subdivisions, where it was more or less in excess. The deficiency exceeded 1" over a large part of northern India.

The deficiency in the seasonal rainfall is most marked in the Burma dry division (—30%), the Patna subdivision (—49%), the Cawnpore subdivision (—34%), the Lahore subdivision (—45%) and the Jhansi subdivision (—31%).

Pasture is sufficient and fodder is procurable. The condition of cattle is good. Prices have fallen or are stationary.

Bombay.—Good rain fell during the week in parts of Surat, the Konkan and Nasik; moderate in parts of the Panch Mahals, Broach, Khandesh, Poona, Sholapur, Satara and the Carnatic; slight in parts of Ahmedabad and Kaira and very slight in parts of Karachi, Thar and Parkar and Ahmednagar. The rainfall generally is sufficient, but more rain is needed for the autumn crops in parts of Larkana, Ahmedabad, Kaira, the Deccan and the Carnatic. Inundation in Sindh is satisfactory. The sowing of autumn crops is completed in Hyderabad, Thar and Parkar, Nasik and Dharwar; is almost over in Ahmedabad and Broach and continues in parts of Larkana, the Panch Mahals, Surat, Rajkot and Baroda. Transplantation is completed in Hyderabad and Thana; is almost over in Nasik and is progressing in parts of Ahmedabad and Kaira. Weeding is completed in Kanara; is almost over in Khandesh and generally continues elsewhere. Young crops have been slightly damaged by floods in parts of Karachi; by insects in parts of Larkana, the Upper Sindh Frontier, the Panch Mahals and Belgaum; by rats in parts of Sholapur; by excessive rain in parts of Ahmedabad, the Panch Mahals, Surat and Belgaum, and are suffering from insufficient moisture in parts of Nasik, but are generally in good condition elsewhere. The preparation of lands for spring cultivation has commenced in parts of Larkana and Satara and continues in parts of Sukkur, the Upper Sindh Frontier, Nasik, Ahmednagar, Poona, Sholapur and the Carnatic. The fodder-supply is sufficient. Agricultural stock are in good condition and are generally sufficient. The water-supply is adequate, except in parts of Bijapur. Prices have fallen in four districts; have risen in two and are stationary elsewhere.

Bengal.—The rainfall was general but not evenly distributed. The fall was heaviest at Bettiah where the maize crop is reported to have been damaged by excessive rain. In Patna, Gaya, Shahabad, Monghyr, Bhagalpur and Pabna, the standing early autumn crops have benefited by the recent rain, but more rain is still needed for the transplantation of the winter rice. The harvesting of early rice and jute is in progress. Sugarcane is doing well. Prospects have improved generally. Fodder and water are generally sufficient. The price of common rice has risen in twelve districts; has fallen in nine and is stationary in the rest.

United Provinces.—Rain is reported from every district and has greatly benefited standing crops. Fifteen inches were recorded in Partabgarh, 13 in Fyzabad and Sultanpur, 12 in Gonda and 10 in Bara Banki and Allahabad. Only in Meerut and Aligarh has the fall been less than an inch. More rain is said to be needed in Aligarh and tahsil Mat in the Muttra district, but prospects are good. Weeding is in progress. The transplanting of late rice continues. Damage from floods is reported from six districts. Markets are well supplied, but fodder is reported to be still scarce in Hardoi. Prices tend to fall.

Punjab.—Good rain has fallen in Delhi, Umballa, Jullundur, Amritsar, Sialkot, Shahpur, Rawalpindi and in parts of Ferozepur. Slight falls are also reported from other districts. Sowings of autumn crops have been completed in the Sialkot and Shahpur districts, and continue in Lahore and Mooltan. Ploughings for spring crops are in progress in Jullundur, Amritsar and Sialkot. The condition and prospects of the standing crops are good throughout the province except in parts of Ferozepur where unirrigated crops are withering. Crops have been slightly damaged by excessive rain in parts of the low lying lands in Sialkot and by floods in parts of Mooltan. Young locusts are being destroyed in the Mianwali, Leiah and Bhakkar tahsils. Cattle are generally in good condition. Fodder is said to be sufficient in all districts. The price of wheat is rising slightly in Jullundur, Ferozepur and Amritsar but is falling in Shahpur. The prices of other food-grains are fluctuating.

North-West Frontier Province.—The rainfall during the week was less than an inch in all districts. More rain is required everywhere. The condition of the autumn crops is good on irrigated and fair on unirrigated areas. Land is being prepared for spring cultivation in Dera Ismail Khan. Irrigation from canals and hill torrents is satisfactory.

Fodder is procurable and stocks of food-grains sufficient. Cattle are in good condition. Prices show a slight rise both in Peshawar and Dera Ismail Khan.

Burma.—The rainfall has been sufficient and well distributed outside the Dry Zone. There was rain in Lower Chindwin, Meiktila, Myingyan, Pakokku and Kyaukse and only 2 and 8 cents respectively in Sagaing and Shwebo, though fair showers fell in the Ungu township of Sagaing. Transplanting for the main paddy crop is completed in Akyab and Sandoway and is progressing elsewhere. The reaping of dry-weather paddy is completed in Minbu and continues in Pakokku. The reaping of early wet-weather paddy is in progress in Kyaukse and the Southern Shan States. The reaping of early sesamum continues and crops are being gathered in Minbu. The sowing of *juar* is in progress in the flooded tracts in Pegu and Amherst and it is being replanted in Shwebo. Low-lying lands are under water owing to the size of the river. The Shwetachaung tract of Mandalay is again inundated and much damage has been done to late transplanted paddy in the Kyan-kyit township of Sagaing. The sowing of wet-weather paddy is retarded and in the unirrigated area of Kyaukse agricultural operations are at a stand still for want of rain. Rain is mostly needed in Shwebo, Sagaing, Lower Chindwin, Meiktila and Myingyan and also in the remainder of the central tract. Fodder and water are insufficient in Shwebo, and parts of Pakokku, Sagaing, Lower Chindwin, Meiktila and Myingyan. Test works have been started in distressed area in the Budalin township. The attendance was 1,117 on 31st August. Prospects are good in Lower Burma, but generally poor in Upper Burma. The price of paddy has risen largely in Mandalay; slightly at five centres and has fallen in one centre.

Central Provinces.—Rain has fallen in all districts, but a partial break has proved beneficial in Mandla, Chhindwara and Raipur. Further damage to cotton, *juar* and *til* has been caused by constant showers in the Nagpur country, Seoni, Betul and Chhindwara. The condition of crops elsewhere is generally good. Weeding is in progress and the preparation of land for spring sowings has commenced. Insects in Seoni and Wardha and grass-hoppers in Raipur and Sambalpur have caused some damage. Prices have risen slightly in Jubbulpore and Damoh, but are fairly steady elsewhere. The following were the numbers on relief works:—Gratuitous relief—Raipur, adults, 6,469; children, 1,370; total, 7,839. Bilaspur, adults, 628; children, 131; total, 759. Bhandara, adults, 1,183; children 97; total, 1,280. Balaghat, adults, 306; children, 98; total, 404. Total gratuitous relief, 10,282. In poor-houses—Raipur, adults, 8; children, 23; total, 31. Total on all forms of relief, 10,313.

Assam.—Heavy rain fell in Upper Assam and the Garo Hills. Moderate rain elsewhere. Ploughing for and transplanting of late rice, harvesting of early rice, plucking and manufacture of tea and cutting of jute are in progress. Late rice has been slightly damaged by insects in Sibsagar and Lakhimpur and by floods in Cachar and Nowgong. The outturn of early rice is good in Sylhet, Goalpara, Darrang and Nowgong; poor in Cachar and Kamrup and fair in other places. The prospects of jute are good and of tea and sugarcane fair to good, except in Kamrup, where prospects of sugarcane are reported poor. Prices:—Common rice—Silchar, 14; Sylhet and Tezpur, 13; Dhubri, Gauhati and Sibsagar, 11; and Nowgong and Dibrugarh 10 seers per rupee.

Mysore.—Rainfall 88 cents in the Civil and Military station of Bangalore: good rain has also fallen throughout the province. General prospects are good. Prices are slightly fluctuating in three districts. Cattle are healthy, except in parts of Mysore and Hassan. Water and fodder are sufficient.

Coorg.—Rainfall—6 inches and 5 cents. Prices of food-grains are stationary. Water and fodder are ample.

Berar.—Average rain during the week was 2 inches and 2 cents. The weather is cool and cloudy. Crops have been damaged by excessive rain in parts of Akola, Amraoti and Buldana. Elsewhere they are in a tolerably fair condition. The preparation of land for the spring crops continues. Weeding is in progress. Fodder and water are sufficient. Prices are almost stationary.

Hyderabad.—The rainfall during the week was 1 inch and 54 cents. Prospects are good. The standing autumn and the rice crops are good. Lands are being prepared for spring cultivation. Prices:—Wheat, 9½; rice, 9 and *juar*, 31 seers per *halli* rupee.

Slight damage by locusts is reported in Jaipur, Kishengarh and Ajmer. Cattle are in good condition. Fodder is sufficient. Prices of food-grains are steady in five States and are falling in the rest. The cheapest price was: Kotah, 60½; the highest: Sirohi, 16 seers the rupee.

Central India.—The rainfall has been general in all Agencies, insufficient in parts of Barwani and sufficient elsewhere. Agricultural operations are in progress everywhere. Crops are good in Gwalior, Bhopal, Baghelkhand and Bhopawar; fair in Malwa and Indore and average in Bundelkhand. Crops have been slightly damaged by locusts, insects, rats or

excessive rain in parts of the Bhopawar Agency and Indore. Agricultural stock and pasturage are generally in good condition and sufficient. Prices are steady in Gwalior, Bundelkhand and parts of Bhopawar; normal in Bhopal, Baghelkhand and Indore and are falling in Dhar and are low in Malwa.

Kashmir.—The weather is bright and warm. Prices are above normal and fluctuating. The price of rice is from 6 to 7 seers the rupee. **JAMMU:**—There has been good rain. The condition of the standing crops is good. Fodder is sufficient. Recent rains are beneficial to the standing crops. Prices are fluctuating. Wheat is selling from 13 to 32 and maize from 16 to 35 seers the rupee.

Nepal.—Rainfall 3·69 inches. Weather fine. Upland and lowland rice are in good condition. Indian-corn is being gathered in. The price of rice is 5½ seers for the rupee.

LAND-SURVEYS.

Simla, the 26th August, 1903.

Read—

The General Report on the operations of the Survey of India Department during the year 1901-02.

RESOLUTION.

Field operations were carried on by three double and fifteen ordinary parties and two detachments; one party was employed on trigonometrical surveys; one double and six ordinary parties on topographical surveys; one double and two ordinary parties on forest surveys; one double and two ordinary parties on cadastral surveys; two detachments on traverse surveys; and four parties on scientific operations. In addition to the above, traverse and cadastral surveys were continued in the United Provinces by Local Agency under the general supervision of the Deputy Surveyor General. The total outturn of detail survey during the year amounted to 104,794 square miles, including 68,162 square miles of reconnaissance surveys on the $\frac{1}{4}$ inch and smaller scales. The total area of rigorous surveys on all scales was 36,632 square miles. The total area triangulated was 99,496 square miles, which includes 83,790 square miles triangulated in connection with reconnaissance surveys, while the total area traversed for cadastral purposes was 5,424 square miles.

2. Of the parties engaged on topographical operations, Nos. 11 and 21 Parties were amalgamated and were engaged in a topographical survey of the Shan States. No. 3 Party was employed in Lower Burma and No. 10 in Upper Burma, mainly in the work of compiling topographical maps from the cadastral sheets. No. 18 Party was employed on similar work in the Punjab. No. 14 Party was engaged on original topographical work in the United Provinces. The subject of topographical surveys in Burma has been under consideration during the year. The completion of the topographical revision of the cadastral maps, and the survey of tracts which have not been cadastrally surveyed, but which are likely to be developed and brought under cultivation in the near future, or of which maps are required for administrative, engineering or railway purposes, will, for some years to come, provide ample work for the two Parties which are at present at work in the Province; while it is desirable that the 1-inch survey, which is at present being carried on in the Shan States, should be continued along the whole of the tracts bordering on the Siamese and Yunnan frontiers. The three Parties which are now employed in Burma and the Shan States will therefore continue to carry on work there for the present, and the Surveyor General has been requested to prepare and submit in consultation with the Local Government a programme for their employment during the next five years. It is satisfactory that arrangements have been made for the topographical survey of certain districts in the United Provinces, of which topographical maps do not exist and cannot be provided by reductions of cadastral maps.

3. The question of the condition of the existing topographical maps of the country and of the measures to be taken for bringing them up to date is at present engaging the serious attention of the Government of India. In Burma and the Punjab a satisfactory commencement has been made in the work of compiling correct topographical maps from the cadastral sheets; but the facts stated in paragraph 50 of the present report indicate that elsewhere the district maps are in a most unsatisfactory condition. The attempt to keep up the maps in the manner there described has evidently led to unsatisfactory results, and it is obvious that more systematic arrangements will have to be made for the revision of topographical maps generally. The question is now being fully considered in consultation with the Surveyor General.

4. Paragraphs 46-68 of the Report deal with the state of work in the Drawing and Issue Offices at Head Quarters. The details of maps issued are somewhat difficult to follow, but it is stated that there are still a large amount of arrears to be worked off in the way of bringing sheets out of stock up to date for publication, and that the publication of the results of the surveys completed by the Department is being greatly delayed owing to the congestion of work. This congestion is in great measure due to the large and increasing amount of extra departmental work which the Survey Department is called on to undertake, and which interferes considerably with the ordinary work of the Department. It will be necessary to consider the desirability of either strengthening the Head Quarters Offices or of relieving them of the extraneous work by which they are at present overburdened. In any case, the necessity is apparent of introducing stricter rules as to the conditions under which such extra departmental work is to be attempted.

5. The Government of India are glad to observe that the recent changes in the organization of the Mathematical Instrument Office, besides resulting in considerable saving, have enabled the whole of the accumulated stores to be put into proper order.

6. The Government of India fully concur in the opinion expressed by the Surveyor General in paragraph 79 of the Report as to the desirability of exhibiting clearly the financial results of the working of the Head Quarters Offices in a regular profit and loss account, and it is hoped that the arrangements which are reported to be now under consideration will enable this to be done in the Report for next year.

7. In conclusion, the Governor General in Council again desires to acknowledge the manner in which the Department generally under the direction of Colonel Gore has endeavoured to cope with the large and increasing amount of work devolving on it.

RESOLUTION REVIEWING THE PROVINCIAL JAIL ADMINISTRATION REPORTS FOR
THE YEAR 1902.

GOVERNMENT OF INDIA.
HOME DEPARTMENT.
(JAILS.)

NOS. 621—33.

Simla, the 5th September, 1903.

Read—

The Reports on the Administration of Jails in the Provinces of British India (except that for Coorg) for the year 1902, with the orders of the Local Governments and Administrations thereon.

RESOLUTION.

The general distribution of prisoners of all classes in the Jails in British India during the calendar year 1902 is shown in Statement No. I, appended to this Resolution. The total number (471,529) of prisoners, including under-trial prisoners, admitted to jail was less by about 3 per cent. than in 1901. The decrease occurred in every Province except Bombay, the Punjab, and Burma and was largest in the case of the Hyderabad Assigned Districts (19 per cent.) and the Central Provinces (15 per cent.). The total daily average population decreased by nearly 4 per cent., the figures (106,375) being practically the same as in 1898. In Bengal, however, the daily average population was the highest recorded since 1876, while in the Hyderabad Assigned Districts it was less than in any year since 1891.

2. The total number of convicts admitted to jail (171,256) decreased by 3 per cent. The improvement was much greater in the case of female convicts than in that of males. There was further a decline of 9 per cent. in the number of persons imprisoned for offences connected with property, while those convicted for offences against the person increased by 7 per cent. The number of persons convicted under the preventive sections of the Criminal Procedure Code, particularly in Northern India, showed a considerable increase.

3. Seventy-four prisoners in all escaped during 1902 compared with 126 in the preceding year. At the close of the year 30 fugitives, compared with 54 in 1901, remained uncaptured. The number of escapes is again the largest in the Madras Presidency. The report appears to attribute the frequency of escapes partly to the circumstance that it is unusual to impose fetters upon prisoners even when engaged on extra-mural work, although the explanation does not appear to apply to the case of three fugitives from the Coimbatore Jail. It is no doubt advisable if possible to avoid hampering prisoners employed out-of-doors by the imposition of fetters; and the possibility of reducing risks of escape by the due selection of the convicts for such employment and their guards is shown by the experience of the Henzada Jail where no escapes occurred, although as many as 200 prisoners were employed at a time extra-murally without fetters.

4. The proportion of juveniles to the total number of prisoners admitted to jails was practically the same as in 1901. The Government of India have frequently commented on the inexpediency of committing juveniles to prison, except when no alternative is possible, and they think that a further diminution in the number of child prisoners may be expected to result from the development and extension of the Reformatory School system. They are glad to see that the Governments of Madras and the Punjab, and the Chief Commissioner of Assam have again called attention to the objections to subjecting juvenile offenders to the demoralizing influence of jail life. The high proportion of female offenders continues to be a characteristic of juvenile crime in the Madras Presidency.

5. The statistics relating to the occupation of prisoners previous to admission show no striking variations from those of the preceding year. The only increase (9 per cent.) occurred in the case of "professional persons." There was a decrease of 12 per cent. under personal servants, of 9 per cent. under artisans and mechanics, of 8 per cent. under employés

of Government or of local authorities, of 6 per cent. under shop-keepers and traders, and of 1 per cent. under agriculturists. The number of "miscellaneous persons" remained practically unchanged. There was an increase in the number of literate persons admitted to jail.

6. The percentage of persons previously convicted to persons admitted to jail fell from 14.68 to 13.7. A large proportion of the volume of crime in 1902 evidently consisted of casual offences: and the Government of the Punjab has noted that in many cases action might suitably have been taken under section 562 of the Code of Criminal Procedure, 1898. In the case of hardened criminals the sentences awarded by the courts do not appear to have been always of the deterrent and preventive character for which the circumstances called. As in 1901 a comparatively small number of persons was sentenced to solitary confinement in some Provinces. This was more especially the case in the Bombay Presidency where the convicts sentenced to solitary confinement amounted to only about 2 per cent. of the total number of habitual offenders who were identified as such before conviction. The Inspector General has noted that the courts "appear to be now inclined to award this class of punishment" and the Government of India cannot doubt that far more use might advantageously be made of it in dealing with hardened offenders. Cases have also come to the knowledge of the Government of India which indicate a tendency on the part of the courts to refrain from passing sentences of transportation where the habitual character of the offenders, as shown by their repeated convictions for serious offences, rendered such punishment appropriate.

The Government of India notice with satisfaction that in all Provinces attention continues to be paid to the methods adopted for the identification of habitual offenders.

7. Statement No. 7 shows the offences committed by convicts and the punishments inflicted on them. The ratio of punishments to the total daily average population increased by nearly 4 per cent. The largest increase was in Burma where the proportion rose by nearly 31 per cent. The question continues to receive careful attention in the different Provinces and the Government of India are satisfied that the increase cannot be ascribed to undue severity. The larger proportion of punishments was connected with offences relating to work. The Inspector General of Jails, Bengal, remarks that the tasks assigned to an able-bodied and well-fed prisoner are not harder than he would have to perform for the support of himself and his family if he were living a free life. The regular habit of labour, moreover, is the principal reforming influence in an Indian jail. It is absolutely essential therefore that an honest day's work should be exacted from each prisoner and that idleness should be corrected by punishment. The aggregate number of corporal punishments decreased from 1,364 to 1,315, though inconsiderable increases occurred in the Madras Presidency, in Bengal, the North-West Frontier Province, Burma and Assam. In the Punjab there were three cases in which illness ensued directly or indirectly in consequence of whipping, and in one instance in Burma death resulted. The matter was duly reported to the Local Government which has satisfied itself that no one was to blame. The Government of India are glad to notice a growing tendency on the part of the jail authorities to resort to flogging only in cases in which either the offence was of a serious character or in which other forms of punishment have failed. The proportion of floggings to the total number of punishments is lowest in the Punjab, and the Government of India note the opinion expressed by the Inspector General that, speaking generally, the more experience an officer gains in jail management the less ready he becomes to employ this form of penalty. Punishments by solitary confinement and by the imposition of fetters decreased during the year. The aggregate number of cases in which prisoners were awarded the punishment of penal diet increased by 390. The largest increase was in Burma, where the number of punishments of this class was far larger than in all the rest of British India, presumably because experience has shown that they are peculiarly adapted to the disposition of the prison population of the Province.

8. The number of convicts who came under the mark system increased very slightly but only 93 failed to gain some remission of their sentences as compared with 235 in the previous year. The Government of India decided last year that the rules shall be applied to persons committed to prison in default of furnishing security. The balance of opinion continues to be in favour of the system. The complaint is still made that the rules are too complicated and involve much clerical labour, but no way has been suggested of obviating these objections without leaving the award of marks too much to the discretion of subordinate officers. As was remarked in last year's Resolution the system is still on its trial, and the Government of India will be prepared to consider any definite proposals designed to simplify it or to enhance its efficacy. They are inclined to agree with the Inspector Generals of Jails, Bengal and the Punjab, who point out that the prospect of advantage which it offers is too remote to appeal strongly to a body of men, most of whom are greatly wanting in intelligence. The Government of India will consider the matter further in connection with the proposal to institute a system of remission by days which the Inspector General of Jails, Bengal, has undertaken to formulate.

9. In the provision of separate accommodation for prisoners at night good progress continues to be made. At the end of the year 608 cells were in course of construction in

the Madras Presidency. When these are completed the total cellular accommodation will amount to 3,201 or 27·2 per cent. of the total accommodation in that Presidency, an increase of 16 per cent. since 1892. The question of constructing a new Presidency Jail near Madras on the latest approved cellular principle is also under consideration. In the Bombay Presidency cubicles are to be erected in the new Karachi and Sukkur prisons. In Bengal some more cubicles were completed during the year, and there are now in the Bhagalpur and Alipur Central Jails 464 cubicles. In the United Provinces the Local Government has made a special grant for the construction of cubicles and all Central Jails have now been provided with them. Cubicles have also been erected or are in course of construction in the habitual wards of three District Jails, and steps have been taken to provide them in two other such jails. One hundred and eighty-five cubicles were erected in the Punjab, and the jails at Lyallpur and Mianwali are being built on the cellular system. The Jubbulpore Jail in the Central Provinces has now 753 cubicles. The two remaining Central Prisons, as well as all 1st Class District Jails in those Provinces, are also to be provided with cubicles. In the North-West Frontier Province a cubicle barrack to accommodate 50 prisoners in the Bannu Jail was completed during the year and 6 cells were provided in the Peshawar Jail.

10. The gross cost of maintaining prisoners fell from Rs. 65-4-2 per head of average strength to Rs. 64-5-11, the decrease being distributed over all Provinces, except the Punjab, the North-West Frontier Province and Burma. The cost varied from Rs. 101-9-11 in Coorg to Rs. 49-3-0 in the United Provinces. In consequence of the fall in prices of food-grains, dieting charges per head of average strength were everywhere, except in Coorg, less than in the previous year. In the United Provinces the storage of grain after the harvests resulted in a loss to Government of Rs. 4,076, and in the Hyderabad A signed Districts a similar loss of Rs. 389 accrued, while a saving of Rs. 3,993 was effected in the North-West Frontier Province and a saving of Rs. 17,158 in the Punjab. The question whether a central agency for the purchase of supplies for all jails may not prove more economical and efficient than the present system under which each jail makes its own purchases, is under consideration in the latter Province.

11. The cash earnings of prisoners increased in a highly satisfactory manner from Rs. 10-11-9 to Rs. 14-3-10 per head of average strength. In Coorg they are, as usual the highest. The reforms effected in financial control in the Central Provinces resulted in a striking increase in the cash earnings of prisoners from Rs. 18-13-0 to Rs. 51-1-0. The earnings of prisoners in the Nagpur Jail sufficed to defray the cost of their maintenance, while those of the Jubbulpore Jail, after meeting all expenses, left a profit to Government of over Rs. 10,000, a result highly creditable to the Superintendent. In Bengal also the cash earnings showed a satisfactory increase, from Rs. 12-14-0 to Rs. 21-5-0. If the cash earnings of prisoners are deducted from the gross cost of maintenance, the average net cost of each prisoner is reduced from Rs. 54-8-5 to Rs. 50-2-1. The Government of India regret to notice that consuming departments do not in all cases observe the orders issued in 1886 by which they are directed to obtain from jails articles which they require, so long as such articles can be supplied by the jails of the same quality and at the same price as they can be obtained in the open market. The Inspector General of Jails, United Provinces, thinks that Government officers frequently obtain tents from private firms without first ascertaining whether they can be supplied by the Jail Department, while the Inspector General of Jails, Bengal, complains that the Army and other Government departments do not make full use of the prison factories in that Province. In the Madras Presidency a special officer of the Supply and Transport Department inspected certain large manufacturing jails with a view to the adaptation of jail-made goods to meet the requirements of that Department.

12. The note by the Sanitary Commissioner with the Government of India, which is appended to this Resolution, contains a detailed examination of the statistics of sickness and mortality in the Central and District Jails of British India during 1902. The total death-rate was 24·85 per mille, as compared with 26·87 in 1901 and 32·80 in 1900. The improvement was most marked in Bombay and Berar. Excluding Provinces for which all the necessary data are not available, the death-rate among prisoners was 22·73 per mille, as compared with 31·68 among the general population. The health of the prisoners in all Provinces, except the Andamans, the North-West Frontier Province, and the Central Provinces, was better than during the previous year. The highest death-rates were recorded in the Andamans, Assam, the North-West Frontier Province and Bombay. Certain improvements recommended by a small special Commission have been carried out, or are in progress, in the Jubbulpore Central Jail.

In all the jails of India there were only 36 cases of cholera with 24 deaths during 1902, as compared with 211 cases and 106 deaths during 1901. Malarial fevers were somewhat less prevalent than during the previous year, though no decrease in the death-rate from these diseases was noted. The admission-rate on account of cerebro-spinal fever was the same as in 1901, but the disease was slightly more fatal. It is prevalent among the general population and epidemics were recorded in the Delhi, Hissar and Ahmedabad Districts. Cases occurred in jails of six Provinces, but were most numerous in the Punjab.

There was an outbreak of relapsing fever in the gang employed on extra-mural labour in the Deccan. This disease was almost entirely confined to the Bombay Presidency. No cases of typhus fever occurred. A decrease in the prevalence of dysentery was again noted, and the death-rate from this disease was less than that of the previous year in all Provinces, except the Andamans, the North-West Frontier Province, Burma and Assam. A point to which further attention should be directed is the effect which the unaccustomed quantity and quality of the food received by prisoners on admission to jails has in producing or encouraging bowel derangements.

In the jails of India, as a whole, the proportion of admissions and deaths on account of tubercle of the lungs was unfavourable, the death-rate from this cause being the highest recorded during recent years. But, excluding the Andamans, the increase in mortality was confined to three administrations—Assam, the Punjab and the Central Provinces. In the jails of India generally during the last five years except in 1901 there has been a tendency for the mortality from tubercle to increase. In providing new buildings for the relief of overcrowding, care should be taken that the number of men allotted to each is properly calculated with reference to its capacity; that in every barrack and hospital each prisoner actually has to himself the sanctioned amount of floor and cubic space; and that in no case does any barrack or hospital contain more than two rows of beds.

13. The question of reducing the bulk of the statistics appended to the Annual Reports is now under the consideration of the Government of India, in communication with Local Governments, and it is hoped that the final orders on the subject will be issued shortly.

14. In respect of the decrease in the prison population, the diminution in the mortality, and the reduction of the net charges of the Department, the history of the year is a record of successful results. A further satisfactory incident is the punctuality with which the Provincial Reports on Jail Administration have reached the Government of India. In the opinion of the Governor General in Council, these reports without exception show that the Jail Department continues to receive an ample measure of attention from those responsible for its administration. Prison work is always laborious, frequently monotonous, and in many of its aspects irksome, and towards the end of the year under review its burdens were greatly enhanced by the labour of arranging for the releases granted in connexion with His Majesty's Coronation. His Excellency in Council is pleased to take this opportunity of acknowledging the assiduity and care with which officers and subordinates have discharged their duties.

ORDER.—Ordered that a copy of this Resolution be forwarded to all Local Governments and Administrations for information and guidance, to the Department of Finance and Commerce and to the Foreign Department for information.

Ordered, also, that the Resolution be published in the Supplement to the *Gazette of India*.

Offg. Secretary to the Government of India.

H. H. RISLEY,
Offg. Secretary to the Government of India.

Note by the Sanitary Commissioner with the Government of India on the sickness and mortality in the jails of India in 1902.

The year 1902 was hot and rather dry, the rainfall being, however, only very slightly deficient. The monsoon began feebly, but the rainfall over the greater part of the country in July was approximately normal. In August there was a long break in the rains, followed in September by a rainfall in excess of the average in practically all parts of the country. The health of the general population and of the prisoners was good.

The chief causes of admission to hospital were ague, dysentery, abscess, and diarrhoea. The only diseases with raised admission rates as compared with those of the previous year were tubercle of the lungs and enteric fever. Ague caused 41 per cent. of the total sickness, and bowel complaints 16 per cent. The chief causes of death were dysentery, tubercle of the lungs, and pneumonia. Among the diseases with lowered mortality were dysentery, cholera, and pneumonia. Dysentery and diarrhoea caused 26 per cent. of the total deaths, tubercle of the lungs 17 per cent., and pneumonia 14 per cent.

The health statistics of the prisoners in all administrations except in the Andamans, the North-West Frontier Province and the Central Provinces, were more favourable than those of the previous year. **Administrations. Appendix N.** The most unhealthy administrations were, in order, the Andamans, Bengal, Assam, the Punjab, and the North-West Frontier Province; and the three most healthy in order, Madras, Burma, and Berar. Of the former group, the first, fourth, and fifth were worse than in the quinquennium. As compared both with the previous year and with the quinquennium, the year 1902 had increase of mortality in the Andamans from remittent fever, tubercle of the lungs, pneumonia, other respiratory diseases, and dysentery; in Burma from respiratory diseases other than pneumonia; in Assam from tubercle of the lungs and pneumonia; in the Punjab from tubercle of the lungs, pneumonia, diarrhoea, remittent fever and small-pox; in the North-West Frontier Province from pneumonia, tubercle of the lungs, and dysentery. Thus, four of the provinces just mentioned had increased mortality from tubercle of the lungs and pneumonia, as compared both with the previous year and the quinquennium.

Some explanatory details with regard to the unhealthiness of individual jails are given in Appendix R.

The rainfall of 1902 was heavy, 6 inches more than in 1901, and 25 inches more than the average of the preceding five years. The unhealthiness which marked the year is stated not to have been confined to the convicts and the police, but to have affected all classes of the community. **Andamans.** The free population suffered much from malaria, and it is said that phthisis is increasing among them. Besides the general medical and sanitary report, the Senior Medical Officer submitted separate special reports on malaria, on tubercle of the lungs, and on dysentery, the three scourges of the settlement. He pointed out that sickness and mortality were highest wherever hard work and exposure in the open were most in force. Frequent use was made of the microscope in the diagnosis of malaria and tubercle. The type of malaria in the female jail is said to be more virulent than in previous years, and many of the children harbour malarial parasites. Recently admitted prisoners suffered most from remittent fever. The measures adopted more or less extensively, and believed to have obtained a certain amount of success, were the institution of mosquito brigades, the use of mosquito nets, the prophylactic issue of quinine, and the protection of prisoners from the risk of exposure. With regard to the prevalence of tubercle of the lungs, it was shown that the floor space per prisoner is not sufficient and that four rows of prisoners sleep in a barrack, and that care is not taken to ensure that clothing is dry. It was proposed to facilitate the early detection of cases by frequent inspections and regular weighments, and sanction had been asked for the necessary increase in establishment. A special ward to hold fifty phthisis patients was nearly ready, but another is needed. As to accommodation, it was proposed to begin with the invalid and convalescent gangs, and obtain for them, by building, a floor space of 50 square feet per man. Arrangements were made, or proposed, to keep clothing dry, to disinfect barracks from which cases came, to boil infected clothing, to watch over the milk supply, and to inform prisoners regarding the nature of the disease and the danger of infection.

The stools of patients suffering from phthisis and dysentery were burned in special incinerators at the various hospitals.

The classes which suffered most from dysentery were the invalids, the prisoners recently admitted and those employed on hard outdoor labour. Infection was considered to occur directly, through the soil, or by the medium of flies. Since the adoption of special dysentery wards with separate latrines and disinfecting apparatus for the hospitals, hospital-dysentery is stated to have become uncommon. The Senior Medical Officer would add a separate dysentery convalescent gang, as an additional means of preventing the spread of infection. Efforts are also being made to ensure that clothes worn by the prisoners are

thoroughly dry. The frequency of self-induced dysentery is noted, and a list of the principal irritants taken with the object of inducing this disease is given. At every station there is a boiler, from which a plentiful supply of boiled drinking water is available. Reforms were carried out in the dieting and cooking, in the milk supply, and in the vegetable ration. Vegetables were divided into first class and second class in respect of their antiscorbutic value, and orders were issued that at least one-third of the ration should be of the first class. Scurvy is stated to be rare in the settlement now-a-days, and the gum affections which occur are put down to malaria and to the fact that prisoners do not pay sufficient attention to the cleanliness of their mouths and teeth. All the measures enumerated are good on paper, but the result depends on how they are carried out. In the meantime the statistics of sickness and mortality do not indicate even the beginning of success.

The health of the Burma prisoners, like that of the general population, was better than in the preceding years, the admission and constantly
Burma. sick ratios being the lowest on record. Occasional overcrowding occurred in district jails, but was relieved by transfer. Boiling and permanganating of water is carried out in all the jails of the province. There is room for improvement in the method of distributing water in some of the jails; but in the central prisons and in some of the district jails it is pumped up and then distributed by pipes to prevent contamination by handling. In the Ma-ubin jail the "meat-safe arrangement" to protect the prisoners from mosquitoes rendered the atmosphere of the wards very stuffy. The arrangement should be abandoned, and more trust put in quinine. There was a marked improvement in the health of the Moulmein jail. On the other hand, the Rangoon jail was considered to be showing signs of unhealthiness. For the first time in ten years, cholera did not make its appearance in any of the jails.* As a rule, cases of tubercle of the lungs, dysentery, and pncumonia were isolated. Separate tubercle wards exist in ten jails, and the question of the desirability of a separate tubercle jail is being considered. The practice of producing abscess by the use of a poisoned seton was detected in the Monywa jail. The reduction of dysentery in the Moulmein jail was attributed to the facts that no water is now drunk in that jail unless it is first boiled, and that the water of the distrusted workyard wells has been rendered unpalatable by treating it with coal-tar. The scurvy admission rate of Burma, though lowered, continued high, and was surpassed by that of Bombay only.

The general health in the province of Assam was "extremely good." The sick ratios of the prisoners were also low, but an outbreak of "beri-beri"† in the Gauhati jail caused some increase of the death rate. Special precautions were taken in the case of prisoners suffering from tubercle of the lungs. A Committee was appointed to inquire into the causes of the unhealthiness of the subsidiary jails at Kohima. Among administrations Assam had the highest death rate from ague, and from anemia and debility, and a high death rate from dysentery; but a low death rate from tubercle of the lungs. There was only one case of cholera. It occurred at Silchar, in the person of a man who had just travelled from Aijal.

The health of the general population of the Bengal Province was bad, but that of the prisoners was, on the whole, somewhat improved, and the death-rate lower than in preceding years. There was, as usual, a high death-rate from dysentery, but it was not the highest. The jail population increased and overcrowding consequently occurred in some of the jails. In most jails the question of water-supply has been satisfactory solved. There are Pasteur filters in eight jails, but on the whole they have not given satisfaction. With regard to the eight jails with the highest death-rates, the causes most frequently mentioned were in order, poor health of prisoners on admission, overcrowding, defective water-supply, dampness of a barrack. The Barisal jail was visited by an outbreak of epidemic dropsy. There occurred 12 cases of cholera distributed over 10 jails, and 2 cases also occurred in subsidiary jails. The disease was usually prevailing in the neighbourhood of the jail; and most of the prisoners affected were men under trial or recently admitted into jail or into the quarantine wards of the jail. Where two cases occurred, no connexion was discovered between them. At Monghyr a paid warder who was supposed to have drunk infected milk was first attacked. Every jail patient and his contacts were isolated, and, where necessary, a barrack was evacuated and disinfected. No less than 20 jails were without death from dysentery, but malaria was more prevalent and severe. The Inspector-General believes that the statistical increase in tubercle of the lungs is the result of greater care in the correct registration of disease, and of the recognition that it is a common affection of the free population and of prisoners at the time of admission to jail. In most jails cases were isolated, and treated, as far as possible, in the open air; while care was taken to provide spittoons, and to disinfect clothes and bedding used by phthisical patients. The Inspector-General notes in this connection that the floor space allowed per prisoner in wards does not err on the side of liberality, being less than that considered necessary for the native soldier; and that for this

* There were two cases of "Choleraic diarrhoea."

† Returned as "Multiple neuritis."

reason a full ward is not very far removed from being an overcrowded one. In speaking of the Rangpur jail, an unhealthy one, he remarks that "in wards with ten rows of prisoners the floor space should be much more than it is." But there ought never to be ten rows of prisoners in a barrack: no modern ward should contain more than two rows. The four and ten row barracks which exist in the Andamans and Bengal are a sanitary mistake and are no doubt responsible for much avoidable sickness.

The death rate among the general population of the United Provinces was higher than

United Provinces.

in 1901, but not far removed from the average. On the other hand the prisoners had an unusually low death rate. There was decided improvement in the health of five formerly unhealthy district jails, ascribed in the case of Moradabad partly to reforms in the water-supply and in site ventilation. Among the causes mentioned for high death rates in individual jails the most frequent are the poor health of prisoners on admission into jail and defective water-supply. The site ventilation of several jails was improved by lowering internal walls and removing unnecessary walls and buildings. Pumps were provided for the wells, and other measures taken to improve the water-supply and prevent pollution during distribution, in the Fatehgarh Central Prison and in eight district jails; and the two Benares jails are being connected with the municipal water-works. On the whole, the accommodation was more than sufficient for the daily average number of prisoners. Night latrines are being provided gradually for all barracks. The isolation of cases of tubercle was believed to have already produced good results in the Agra Central Prison. The isolation of dysentery patients and the disinfection and incineration of their evacuations were more carefully attended to than formerly. Plague occurred in three jails, and cerebro-spinal fever in four. In the Benares Central Prison cholera caused 12 admissions and 6 deaths. The epidemic was soon checked by movement into camp. How the jail became infected is not known; but the disease prevailed in the surrounding villages, and the medical officer mentions as a possible source that a tank outside the jail communicates with one inside, and that the first man attacked, as well as two others, were on duty near the latter tank. A sweeper who removed the cholera excreta was among those attacked. In the infirm gang of the Ghazipur jail 3 cases and 2 deaths were recorded, and in another barrack a fatal case. The origin could not be traced, but there were cases in the city and neighbourhood at the time. The disinfectant measures adopted by the medical officer for the barracks had special reference to the destruction of flies.

The increased mortality among the general population of the Punjab was due to plague,

there having been hardly any cholera, less fever, and the same proportion of bowel complaints. Though the disease extended so widely in the Punjab, only 3 deaths from plague occurred in jails. Cerebro-spinal fever, on the other hand, was more frequently imported into jails from outside. The general health of the prisoners was considerably better than in the preceding year; but the constantly sick and death rates do not compare favourably with those of the quinquennium. As compared with 1901, there was increased mortality from small-pox, remittent fever, tubercle of the lungs, pneumonia, other respiratory diseases and diarrhoea; but a considerable decrease in dysentery and debility. Overcrowding, when it occurred, was met by transfer or by the use of tents. Improvement of the lateral ventilation of cells and barracks has been taken in hand, and is well advanced. Various improvements were also carried out or arranged for in the water-supply of jails. High mortality in individual jails was in three cases due to cerebro-spinal fever. Quinine prophylaxis was carried out in all jails, but not always with sufficient system or earnestness. A beginning has been made in the provision of special tubercle wards, and further projects are under consideration; and great help against the disease is hoped for from the improvement in lateral ventilation. There was no cholera in the Punjab jails.

As regards the health of the inhabitants of the North-West Frontier Province the year

North-West Frontier Province.

was a favourable one; for, though there was more fever and small-pox, there was no cholera, and very little plague. The jail statistics were less favourable than in the previous year, there being increased mortality from tubercle of the lungs, pneumonia, dysentery, and diarrhoea. The Inspector-General does not consider the number of tubercle cases sufficient to warrant the cost of providing special wards. The increase of dysentery at Peshawar was ascribed to high winds bringing dust into the food.

The health statistics of the prisoners of the Bombay Presidency showed much improve-

Bombay.

ment, while the total mortality ratio of the general population was raised by the ravages of plague. Overcrowding occurred in 9 out of the 15 prisons; and was treated by transfer, and by the use of tents, temporary sheds, worksheds, etc. The use of worksheds for the purpose is an undesirable expedient. Cerebro-spinal fever broke out in the Ahmedabad Central Prison, relapsing fever in the Deccan Gang, and 2 cases of plague were distributed over 6 prisons. In the Sind Gang the proportion of pneumonia deaths was, as usual, high; and new barracks with improved ventilation have been built. Many of the men who developed pneumonia in the Hyderabad Central Prison had suffered previously from scurvy. The only case recorded as cholera occurred in the Thana Special Prison. The attack began with indigestion and

there was no cholera in the town and district at the time. Prophylactic measures in regard to diet and clothing were adopted, among them the issue of potatoes in lieu of green vegetables. The description of the prophylactic use of quinine in the Yerrowda Central Prison shows that the dose was too small and the interval between doses too long.

The year 1902 saw the beginning of plague in Berar. There was less bowel complaint, little cholera, and the general mortality, though higher than in 1901, was not high as compared with former years. The general health of the prisoners was satisfactory. The improvement at Akola was ascribed to diminution in the number of prisoners. The medical superintendent at Amraoti dreads the cost of the extensive use of quinine as a prophylactic; but there is good evidence to show that the least wasteful method is to repeat doses of not less than 15 grains at suitable intervals for a period of about three months. In the end less quinine is used than when smaller doses are given unsystematically; and the general hospital expenses are lowered. Though there was plague in the station and district of Buldana, the jail escaped. All newly admitted men were kept under observation and in segregation for ten days, all the prisoners and the establishment were inoculated, and the mouths and outlets of drains were so fixed as to prevent the ingress of rats. There was no cholera.

In the Central Provinces the year was considered to be a healthy one, there being little cholera, and diminished bowel disease, though the general mortality was somewhat increased, perhaps partly from plague. Among the prisoners, sickness was greater than in the previous year, but the mortality was nearly 3 per mille less. The apparent increase in sickness seems to have been due, partly, if not wholly, not so much to increase of disease as to greater liberality in the admission of sick men to hospital. There does not seem to have been any serious overcrowding of the jails, but timely transfer might have made it even less. The construction of tubercle isolation wards is under consideration. Under the orders of the Government of India a special investigation was made into the sanitary conditions of the Jubbulpore Central Prison, and the circumstances which had conduced to the high mortality of 1901. As a result, structural improvements were sanctioned, a complete change was made in the diet, and prisoners were more freely admitted to the infirm gang. In the jails of the Central Provinces mortality from dysentery was still further reduced, and there was no cholera.

As cholera, fevers, and bowel complaints were less prevalent, the mortality of the population of the Madras Presidency diminished. For the prisoners, too, it was "an exceptionally favourable year," the general ratios of sickness and mortality being diminished, as well as the death rates from cholera, tubercle of the lungs, pneumonia, and dysentery. In the case of those jails where mortality was high, the cause was stated to have been the poor health of the prisoners on admission. Cholera occurred only* in the Palamcottah jail, and there appeared to be no connexion between the three cases. The disease was prevalent in the town and district at the time. The patients were removed, their contacts were isolated, and the cells were thoroughly disinfected. Notwithstanding the prevalence of plague in the vicinity of several jails, only one prisoner was attacked. In the malarious Rajamundry jail quinine prophylaxis was combined with the attempt to destroy the larvæ of *anopheles* mosquitoes in the vicinity of the jail. But the principle adopted by the medical officer of treating "trivial ephemeral cases" by detention and not by admission to hospital is bad, and has been condemned by authority. Tuberculous patients are treated separately, measures are taken for the thorough disinfection and destruction of their excreta, the open-air treatment is as far as possible enforced, and plans are being considered for the provision of special wards.

The health statistics of the Mercara jail showed considerable improvement, the mortality being less than a quarter of that of 1901. At Ajmer and at Quetta, though there was an increase of sickness, there was a considerable reduction in mortality. At Quetta the ratios both of sickness and mortality compare very unfavourably with those of the quinquennium. The average numbers of prisoners in this jail is, however, only between 60 and 70.

In 1902 Group I had, as before, the highest admission ratio from malarial fevers; Group II, the highest from tubercle of the lungs; Groups III and V, the highest from cholera; Group IV, the highest from influenza and from dysentery; Group VII, the highest from small-pox and pneumonia; Group IX, the highest from remittent fever; Groups X and XII, the highest from enteric fever, and Group X, the lowest from pneumonia and from dysentery; Group XI, the highest from simple continued fever, and the lowest from ague. For the quinquennium also Group I had the highest malaria ratio, Group IV, the highest influenza and dysentery ratios, and Group X, the highest enteric fever ratio.

* There was one case of "Choleraic diarrhoea" at Madura.

There was a decided decrease in influenza, a return to the rule of waxing and waning in alternate years. It was proportionally most prevalent in the Bengal-Orissa group and in the Central Provinces administration. Thirty jails were more or less affected, against fifty-eight in the preceding year; but by far the largest outbreaks were those of Alipur Central and Cawnpore District jails. At Alipur the disease was present throughout the year, with the maximum in May; while in Cawnpore it lasted for the first ten months, and was at its maximum in April. Only two other jails had more than 50 cases.

There were only 36 cases of cholera with 24 deaths during 1902 as compared with 211 cases and 106 deaths during 1901. As usual, there was no cholera in the Andamans; and there was none also in Burma (except two cases of "choleraic diarrhoea" at Akyab), the Punjab, the North-West Frontier Province, Berar, and the Central Provinces. Including choleraic diarrhoea cases were returned from seventeen jails; but the greatest number was 12 in the Benares Central Prison. The maximum prevalence was in September. The circumstances under which certain of the outbreaks occurred have been noticed above in the paragraphs regarding administrations. The measures adopted by administrations of segregation of new prisoners, of isolation of cholera patients and their contacts, of evacuation and disinfection of rooms in which cases occur, and of attention to sanitary detail, seem to have been effectual.

There was a further decrease in the admission and death rates from small-pox; and there were 47 admissions (59 cases treated) and 6 deaths against 63 admissions (80 cases treated) and 10 deaths in the preceding year. The Midnapur Central Prison had 11 admissions and 1 death. Then came the Madras Penitentiary and the Shikarpur jail, each with 4 admissions, but no deaths. Four jails had 2 admissions, both fatal in the case of Mooltan; and twenty jails recorded 1 admission each. The prisoner who died at Cawnpore was suffering from the disease when admitted into the jail.

Ague furnished about 41 per cent. of the total number of admissions; but the ratio to strength was somewhat diminished. As usual, October was the most malarious month, and February the least malarious. The most malarious groups were, as before, I, which includes the Andamans, and VI; and the most malarious administrations, as before, the Andamans and the Punjab. Of these, Burma Coast and the Andamans had higher ratios than in the previous year. In the Andamans, says the Senior Medical Officer, it is the men doing hard outdoor work that furnish the bulk of the malarial cases. At the same time he reports that the female prisoners and children are severely infected, and that there is a large swamp which, "must afford a breeding ground for numberless mosquitoes." The use of mosquito nets gave good results, but interfered too much with ventilation, and the result of mosquito brigade work was encouraging. The result of quinine prophylaxis was not up to expectation, probably because the efforts made towards it, though enthusiastic, were not sufficiently concentrated. For a beginning, the attempt was made over too wide an area and attention should have been focussed upon a limited and selected portion of the settlement, one of the islands perhaps. The Senior Medical Officer points out the importance of ensuring that prisoners always wear dry clothes and that a sufficient number of suits are provided for each man. In the paragraphs regarding administrations something has already been said on malaria prevention. Medical officers in Burma paid more attention to the surroundings of their jails, filled up swamps, pits, and pools, and cleared away long grass and jungle. In numerous Bengal jails attention was directed to the destruction of mosquito larvae, to the abolition of useless pools, to protection from mosquito bites, to the disinfection of infected prisoners and the protection of others by the use of quinine. It was found that large doses twice a week gave the best results. The Punjab Inspector-General found in some jails a want of system and earnestness in the matter; and it is generally these defects which result in ambiguous or unfavourable reports. At the same time a large reduction in the admission rate was effected in the Lahore Central Prison. The fever having been broken, a good method of disinfecting an infected man seems to consist in the exhibition of 15 grains of quinine on three successive days at intervals of a week for a period of three months. For the uninfected or disinfected, as a prophylactic, a dose of 10 grains on two successive days at the same intervals during the fever season would probably be sufficient. It is very doubtful whether small doses of 3-5 grains are effectual; even when given daily, as recommended by Celli.

Although there was a slight decrease in the admission rate for remittent fever the mortality on account of this disease was somewhat greater than during the preceding year. It was most prevalent in Bombay and the Andamans, and most cases occurred during the months of August and September. In three fatal cases (Muttra and Sylhet) there was lymph on the brain, which is suggestive in view of the wide prevalence of cerebro-spinal fever. In one fatal case the disease had probably been pneumonia, in

another there was sloughy ulceration of the large intestine, while in a third there were signs of tubercle. No *post mortem* records were furnished for the 49 deaths which occurred in the Andamans or for some of those elsewhere. Most of the cases were put down to malaria, of some the etiology was classed as unknown, while exposure to the sun, chills, and syphilis were mentioned as causes.

The most common causes assigned for the cases returned as simple continued fever were exposure to rain, chills, climate and changes of weather, exposure to the sun and to heat, over-exertion, bathing and drinking when hot, indigestion, gastric disturbance, constipation, over-eating. Cases of fever which gave no Widal reaction, which were non-malarial, and for which no cause could be discovered, were so returned. Finally, cases of vaccination fever, nasal catarrh, and malarial fever, were wrongly recorded as simple continued fever; and it was suspected that some obscure cases of tubercle were similarly treated statistically. In the only fatal case no *post mortem* examination was made.

Throughout the jails of India there were returned 69 admissions (70 cases) of enteric fever with 15 deaths. These were distributed over 31 jails, of which 18 had only one case each. The diagnosis is said to have been confirmed by Widal's test in some cases. On the whole the *post mortem* records support the diagnosis, though there are some anomalous cases. With regard to four patients it is mentioned that they came into jail already infected. Otherwise the returns furnish no information as to causation, or say that the origin could not be traced. The Sanitary Commissioner of Madras furnishes two reports affirming the existence of enteric fever among both the free and the imprisoned inhabitants of South Canara and Malabar, due to contamination of the water by polluted soil. It is stated that since November 1899 the drinking water in the Mangalore jail has been passed through a Berkefeld filter and also boiled during the enteric fever season, and the well also regularly treated with potassium permanganate. There were two cases in the Mangalore jail in 1902. The Western Coast Group had the highest proportion of cases; but the Hizaribagh and Rohtak jails the greatest numbers in individual outbreaks. In the former the dysentery and enteric fever were traced chiefly to one enclosure which contained the cowsheds, and arrangements were being made to remove these sheds. Only the fatal case at Rohtak is noticed, and the patient was supposed to have brought the infection from Delhi. The man who died of enteric fever at Mirzapur was already moribund when admitted into the jail.

There were 136 cases of cerebro-spinal fever with 108 deaths, as against 141 cases with 102 deaths in the preceding year. The yearly total admissions from 1896 have been 7, 13, 24, 29, 99, 141 and 136. Besides these 136, several of the 18 fatal cases of the local disease "meningitis" from various jails were probably cases of cerebro-spinal fever. In 1899 six jails were attacked, in 1900 seventeen, in 1901 twenty, and in 1902 nineteen. Eight of the nineteen of 1902 had had none in the preceding year, and Ferozepore, Rohtak, Hissar, and Sambalpur returned cases for the first time in 1902. Only the Bhagalpur Central Prison had cases in each of the six years 1897—1902, the Alipur Central in four of the six.

For each of the last three years the Allahabad and Fatehpur District jails and the Jubbulpore Central Prison have had cases; but the Fatehpur case in 1902 occurred in the quarantine camp outside the jail, and was really imported from the Allahabad District jail. Ten of the jails had but one case, and four from two to seven cases. The larger outbreaks were 42 cases at Ahmedabad, distributed monthly as follows: 0, 10, 16, 11, 2, 0, 0, 3, 0, 0, 0, 0; 35 cases at Mung Rasul—5, 7, 8, 5, 2, 2, 0, 0, 0, 3, 0, 3; 14 cases at Delhi—0, 0, 0, 1, 12, 0, 0, 1, 0, 0, 0, 0; 11 cases at Bhagalpur—3, 2, 2, 0, 0, 1, 0, 3, 0, 0, 0, 0; 10 cases at Allahabad—4, 4, 2, 0, 0, 0, 0, 0, 0, 0, 0, 0. The deaths in these jails were respectively 37, 23, 10, 7 and 10. Perhaps also cases occurred which were not recognized. The fatality for all the jails of India taken together was just over 77 per cent. of cases treated. A number of the fatal cases at Mung Rasul and Ahmedabad were not examined *post mortem*; the results as recorded at Fyzabad, Hissar, and Jubbulpore do not unmi-takably support the diagnosis; and the case at Myaungmyo may possibly have been tubercular; but in most cases the *post mortem* records leave no doubt that cerebro-spinal fever was correctly diagnosed. It seems to be now generally acknowledged that the disease exists among the free population; and measures were accordingly taken by jail medical officers to prevent the importation of infection. With regard to Ahmedabad it is reported that it was found that people in the districts and famine camps were dying of the disease. One new prisoner who fell ill of it after he had been seven days in quarantine, could not have contracted the disease in the jail. The infection was believed to have been first imported and then spread by means of dust-storms. The first case was diagnosed as sunstroke. The cases were scattered and did not seem to depend on the hardness or lightness of the work. None of the hospital staff were attacked. Similar measures were adopted as for plague. Materials for bacteriological examination were regularly sent to the Bombay laboratory. At Mung

Kasul pneumonia was very fatal in the beginning of the year, and the medical officer considers that these cases were probably of the same etiology as the cerebro-spinal cases. He was unable to discover how the disease got into and spread in the jail. At Delhi the fever had been epidemic among the free population for several months, and was introduced into the jail. No case occurred in which infection from a previous case could be traced. The prisoners were placed in camp in the jail garden for about a month. The barracks were disinfected with perchloride of mercury, and all the clothing was boiled. The first case of 1902 at Bhagalpur was a man engaged in cleaning rice, and the second a sweeper, but the disease had been present in the last month of 1901. The dust theory continues to receive support at Bhagalpur. Cerebro-spinal fever was prevalent in the district and town of Hissar when the first case occurred in the somewhat overcrowded jail, but it was not discovered how it was conveyed. The second case was in the person of an under-trial prisoner who had been only eight days in jail. One under-trial prisoner was released while suffering from the disease. Newly arrived prisoners were made to bathe and to wash their clothes, and they were giving clean clothing and kept under observation. Evacuation and disinfection were resorted to. The cerebro-spinal fever in the Allahabad District Jail was continued from the preceding year and the prisoners had all been removed into camp in that year. In February, as the prevalence of plague rendered it desirable that the camp should be moved while there was no convenient site available, the prisoners were transferred in gangs of a hundred or fifty to camps pitched in the neighbourhood of the jails of seven districts, precautions being taken to prevent infection being carried by the prisoners. They were kept in these camps for six weeks, and the Fat-hpur case, mentioned above, was the only one that occurred after Allahabad had been left. The Allahabad District jail was re-occupied after thorough disinfection in the month of June. The tiles had been removed from the barrack roofs in January; and the jail had remained empty with the interiors of the barracks freely exposed to sun and air. No more cases occurred during the year. No connexion could be discovered between the two cases that were observed in the Fyzabad jail, but it had also had two cases in 1901. The affected barracks were evacuated, the inmates sent into tents, and barracks and clothing disinfected. The Fyzabad jail is never overcrowded, is well ventilated, without site overcrowding, and of good general sanitary condition. At Akyab the cases did not appear to be connected, all three had been over eight months in jail, and the jail was well ventilated and not overcrowded. The origin of the disease could not be traced. The cases were isolated, the buildings disinfected and white-washed, the patients' clothes burned, etc.

From all that has just been said it is evident that nothing new was anywhere discovered as to the causation and spread of the disease. But Captain Robertson Milne, I.M.S., was placed by Government on special duty to study the matter. He employed himself, to begin with, in reading the literature of the disease, in studying the records of Indian outbreaks, in visiting affected jails, and in the practical elucidation of certain bacteriological points. In Europe a difference of opinion exists between Jaeger supported by Lepierre, who maintains that the meningococcus is the sole cause of the disease, but is a very variable organism; and Albrecht and Ghon, supported by Weichselbaum, who declare that the meningococcus proper is not variable, and that the disease may be caused by any one of a number of similar cocci. At present the last word is with Jaeger, who has adduced in his favour some facts of agglutination tests obtained by himself. The difference is of practical importance; because Weichselbaum states that, as it does not seem to have been the real meningococcus that Jaeger and Germano worked with, their conclusions as to the epidemiological importance of its great resistance to drying are valueless, it being, on the contrary, very easily destroyed. Some apparently mysterious cases of infection may be explicable, according to him, by the fact that the microbe may occur in the nasal secretion not only of meningitides but of healthy people. Sorgente and also Salomon have reported the finding of the micrococcus in the blood. Balthazard has reported a case caused by a new microbe, the *Diplococcus meningitidis aureus*.

There was no case of typhus fever. Relapsing fever caused 220 cases with 4 deaths:

210 of the cases and all the deaths occurred in the Deccan Gang, 7 cases at Bijapur, 1 at Dharwar, and 2 in the Bhagalpur Central Prison. In the blood of some of the Deccan Gang patients the specific spirilla were found. The measures adopted were:—increase of space to each prisoner, reduction of task, and extra diet. This fever did not occur in the neighbouring Famine Relief Camp. There were no deaths among the 186 cases of dengue recorded. In the Madras Penitentiary 50 cases occurred, and 46 in the Thayetmo Central Prison. The disease was prevalent throughout Burma, and the prisoners are said to have suffered less in proportion than others, owing to their isolation. Of plague 27 cases with 20 deaths occurred; 16 in the two jails of Bombay city, 8 in other jails of the Bombay Presidency, 3 in the Punjab, 3 in the United Provinces, 6 in Bengal, and 1 in Madras. The cases in the United Provinces occurred in the quarantine camps outside the jails, and the disease did not gain actual entrance into any jail. The small number in the Punjab is ascribed to the good sanitary state of the jails and to the precautions taken. Some of the Bombay jail medical officers mention thorough inoculation of the prisoners, and consider it the cause of the comparative immunity of the prisoners, notwithstanding the prevalence of the disease round about, and the finding of dead rats.

The admission ratio for scurvy was the same as in the 'previous year, 14 per mille.

Scurvy. There were 145 admissions, of which 27 per cent. were in the Bombay jails, 26 per cent. in the Burma jails, and 24 per cent. in the Bengal jails, 26 per cent. in the Rangoon Central Prison, 13 per cent. in the Hyderabad Central Prison, and 11 per cent. in the Mymensingh District jail. The medical officer at Rangoon ascribes the prevalence of the disease to the inferior quality of the vegetables produced in the garden in the rains. Extra tamarind and sweet potatoes were issued. The medical officer at Hyderabad says that the prisoners were debilitated by scurvy before a supply of vegetables had grown up; but he does not state whether any preserved antiscorbutics were used in the meantime. In the Andamans systematic efforts were made to place the vegetable supply on a satisfactory footing.

There was an increase both in the number of admissions and in the mortality from tubercle of the lungs. The increase was shared by the Andamans, Assam, the North West Frontier Province, the Punjab, and the Central Provinces. Much the highest mortality ratio was that of the Andamans, and it was more than twice as high as that of the Punjab, which came next. The Andamans, Assam, the United Provinces, the Punjab, the North-West Frontier Province, Bombay, and Madras had all mortalities higher than their quinquennial mean. Some of the increase may be due to the greater attention now paid to the subject. A few remarks on the disease have already been made in the paragraphs treating of the various administrations. In the Andamans the questions of air space and ventilation are evidently of the first importance. In Burma the disease was most marked in the large jails containing long-term prisoners. The open-air treatment was more successful in Thyetmyo than in Rangoon, owing to the dry climate of the former. Endeavours were made to make patients use the special receptacles containing carbolic acid solution, and to refrain from indiscriminate spitting. More care in diagnosis is required in order to discover cases early. In the United Provinces the attention of medical officers was drawn to the necessity for isolation of cases and disinfection of sputum. The Inspector-General of the Punjab draws attention to the danger to the free population of released tuberculous patients. Considering the amount of sputum swallowed by phthisical patients and the frequency of intestinal ulceration in men who die in jail of phthisis, the destruction of the stools of such patients, a measure adopted by some medical officers, seems justified. Hillier has endeavoured to estimate the infectivity of phthisis, and the relative importance of dust and cough-spray in the propagation of the disease. Milchner has published a fresh case in which false tubercle bacilli were found in the sputum, the presence of which might have led to error in diagnosis. As a result of his experiments, Prettner announces that the buffalo is insusceptible to tubercle; and not a sign of tubercle was found in any one of 5,000 buffaloes slaughtered.

The number of cases returned as non-tubercular phthisis was 16, of which 3 were fatal; but it is probable that the tubercle bacillus was not really absent in all of these.

There was again a decrease of sickness and mortality from pneumonia. The North-West Frontier Province had the highest death-rate, followed by Bombay and the Punjab. The ratios of the first and third were higher than in 1901 and in the quinquennium. The only other provinces which had ratios higher than both those standards were the Andamans and Assam. All the other provinces had ratios lower than in the quinquennium, and only three of them ratios higher than in 1901. The admission ratio in Indus Valley was slightly less than in 1901, but still much higher than the decennial ratio. Much the highest admission ratios were those of the Sind Gang, the Quetta jail, and the Shikarpur jail, but of these only the Quetta ratio was higher than in the previous year. Barracks with improved ventilation were built at the present camp of the Sindh Gang. In the Andamans pneumonia is said to be about four times as common in the southern as in the northern district, and to attack all classes of convicts, but especially elderly men debilitated by malaria or other sickness, and men exposed to heavy rain and chills. In the sputum of more than one case the pneumo-bacillus of Friedlaender, or one resembling it, was observed. Pneumonia cases in Burma were usually isolated for treatment; and the men affected were chiefly such as had been transferred up-country to stations where the diurnal variation of temperature was great. The Inspector-General of Bengal recognises that pneumonia is a disease eminently fostered by bad ventilation and by overcrowding; and that it is foul, not fresh, air which favours its spread. The diminution of pneumonia in the jails of the United Provinces is ascribed by the Inspector-General to the lessened prevalence of influenza. The measures urged upon his officers by the Inspector-General of the Punjab are based upon the strongly held view that the incidence of the disease is largely affected by dirty bodies and foul bedding and clothing, the evil effects of which are aggravated by overcrowding and defective ventilation. It appears, therefore, that the importance of fresh air for the prevention or reduction of pneumonia is widely understood.

Other respiratory diseases were most prevalent in proportion to strength in the Andamans, and then in the Punjab, the North West Frontier Province and Bengal. Chills in the rains appear to be regarded as the usual cause in the Andamans. Among individual jails, the Lahore Central had again a very high ratio.

Once more there was a decrease of dysentery, both as to admissions and as to deaths. Only in the Andamans and the North-West Frontier Province was the mortality greater than in the preceding year and the quinquennium. The Burma and Assam ratios, though higher than those of 1901, were below the lustral ratios. In all the other provinces the ratios of 1902 were lower than both those standards. The groups with the highest admission ratios were Bengal—Orissa Assam and the Andamans, and all the jails with admission ratios above 400 per mille (except Pauri, the strength of which was only 11), and many of the other jails with high ratios were in Bengal. The highest admission ratio of the year was 879·8 at Jessore, against 1,031·3 at Hooghly in 1901. In the Andamans the spread of the disease was supposed to take place by means of contaminated soil rather than by water, through flies, from infected clothing, from dirtied floors; and those prone to be attacked were such as were already reduced by malaria or other sickness or such as were exposed on hard labour to the influences of the weather. Some points regarding dysentery have already been noticed in the paragraphs dealing with administrations. At Bhamo in Burma the medical officer ascribed the fall in dysentery to the adoption of cleaner methods in the cooking and serving of food. The same officer obtained in his cases a serum reaction with Shiga's bacillus, and considered that he had succeeded in isolating that bacillus from the stools of two cases. The reduction in dysentery in Bengal is attributed by the Inspector-General to a recognition of the necessity for prompt and thorough treatment of the disease, to care in cooking and cleaning food, to the careful dieting of newly admitted prisoners, to the provision of a good water-supply, and to the isolation of cases. The "careful dieting of newly admitted prisoners" mentioned by the Inspector-General is an important point, which has lately been emphasized by Assistant Surgeon Nobin C. Dutt in a paper on the relation of "unaccustomed plenty" to the prevalence of bowel complaints in the Bengal jails. The Inspector-General of the Punjab ventures to think that it ought to be possible to banish the infection so thoroughly from jails that a death from dysentery contracted during imprisonment would be quite an exceptional event. One difficulty is that prisoners are continually bringing in the infection with them.

Medical officers appear to have settled down to the belief that there are two forms of dysentery the amœbic and the bacillary, and that the latter is the form which occurs in Indian jails. Shiga's bacillus, priority in the discovery of which is claimed by Chantemesse and Vidal in France, has been found in cases in different parts of the world. But from Holland it is reported that cases of sporadic dysentery there occurring are due to a different bacillus, distinguished by a different serum reaction, and in Norway an epidemic was studied in which neither the Shiga bacillus nor an amœba could be found and in which the blood of the patients did not agglutinate the Shiga bacillus. Again, Duval and Bassett appear to have lowered the specific importance of Shiga's bacillus by showing that it is also the cause of summer diarrhœa in children. The bacillus is closely allied to the enteric and colon bacilli, and has to be carefully distinguished from them. Work is now being done on diagnostic agglutination and serum therapy, and even on the problem of preventive inoculation. The bacillus is said to have been found in the blood, but this appears to be a rarity. Rosenthal found that bacilli in the stools at room temperature were still alive in 8 days, at 0° C in 12 days; and that agar cultures spread on fruits were alive after 7—8 days. According to Lentz they are easily killed in the rivalry with other microbes and by disinfectants. In water, milk, butter, cheese they did not usually live more than 8 days; in dry sand or dried on linen than 12 days. Direct sunlight or boiling heat killed them in a few minutes, moist heat at 58° C in an hour, while they could resist moderate frost for several months. But in moist garden earth or on damp linen they survived some months, being protected from sunlight, from drying, and from rivalry. Carbolic acid solution, 1—20, and mercuric perchloride, 1—20,000, killed them at once; and alcohol, from 1—20 to 1—10, in a few minutes. In last report Shiga was quoted on the differences between the *Amœba dysenterix* and the *Amœba coli*. Since then Schaudinn has treated of the same subject, naming the two amœbæ respectively the *Amœba histolytica* and the *Amœba coli*. He states that bacillary dysentery is diphtheritic, amœbic ulcerative; and suggests that the two may sometimes co-exist. Careful studies of amœbic dysentery and its differentiation from bacillary have been published by Captain L. Rogers, I.M.S., who states, *inter alia*, that the lesions of amœbic dysentery are usually in the upper part of the large intestine, and that the common type of dysentery in Calcutta is the bacillary.

The mortality from diarrhœa was somewhat increased. Between dysentery and diarrhœa the line is not very clearly drawn in jails. The highest admission ratio was 428·2 at Hooghly, but Darbhanga, Jhang and Saugor had ratios over 250 per mille of strength.

Nine cases of beri-beri were reported; five from Burma and four from Madras. The occurrence of epidemic dropsy was reported only from the Barisal jail. After an absence of years the disease had re-appeared in Calcutta in 1901. Lieutenant-Colonel Cobb, I.M.S., has published an account of the disease as it was observed at Barisal. An epidemic of catarrhal jaundice was reported from the Buxar Central Prison. The causation was not ascertained. The outbreak was considered to be probably of the nature of Weil's disease, but no bacteriological investigations are recorded.

In the Dacca Prison 371 prisoners, out of 559 examined, had intestinal parasites, 191 Trichocephalus, 87 Ascaris, 79 Ankylostomum, 2 Oxyuris, 12 other worms.

Of 1,194 new prisoners admitted into the Cuttack jail, 2.6 per cent had elephantiasis. In some form, and embryos of the filaria which causes the disease were found in 26 per cent. of the affected. Hydrocele was present in 22 per cent. of newly admitted prisoners and in 24 out of 100 cases examined filarial embryos were found in the blood, but in three cases only were the embryos found in the fluid of the hydrocele.

Cases of guinea-worm were, as usual, most frequent in the jails of the Deccan and Southern India; and, as usual, the administrations with the greatest number of cases were Bombay, Madras and the Punjab. The Dhulia and Yarrowda jails had 54 and 51 cases respectively, the highest number for individual jails.

The Andamans and the North-West Frontier Province returned not a single death from anæmia and debility; and the ratio was diminished in every province except Burma, Bengal, and Madras. The *post mortem* records show that there are still some cases so returned which ought to have been returned under a definite disease, the original entry having been carelessly allowed to stand after the autopsy had revealed the true lesion.

R. ABSTRACT of the SANITARY SHEETS of the most UNHEALTHY JAILS. SANITARY DEFECTS, IMPROVEMENTS, SUGGESTIONS, etc.

BENGAL.

Barisal.—The sickness and mortality were mainly due to the bad water-supply, and partly to overcrowding, which lasted throughout the year in all the wards except those of the hospital. The workshops had to be used at night. The surroundings are very insanitary, the jail being situated in the midst of the native town. Dysentery was very prevalent in the district and a large proportion of the prisoners were admitted with the disease. The drainage has been much improved. The drinking water is purified and boiled before use. Representation was made to the local authorities regarding the proposed installation of water-works in the town. There was "epidemic dropsy" in October and November.

Hooghly.—There was no overcrowding in the jail. The wards are old, and four rows of prisoners sleep in each. The wards form three sides of a square, so that free perfusion of air is impossible in all. The sickness and mortality (malarial fever, dysentery, and diarrhoea) were owing, in most cases, to the condition of the prisoners on admission to jail. In all the phthisis cases the disease was contracted before admission to jail. Crowded *bustis* surround half the jail and approach very close to its walls on the north-west. The district is a very unhealthy one.

Krishnagar.—Overcrowding lasted for more than three months during the year. No particular local condition can account for the prevalence of occasional dysentery and malarial fever. Climatic conditions and those inseparable from jail life account for 64 cases of dysentery. For the sanitary improvement of the jail sanction has been obtained for cross ventilators to all night latrines, and for a new boiler for the drinking water, etc.

Murshidabad.—The municipal water-works having got out of order in September, the supply of water from them was either deficient or altogether wanting up to the end of the year. There was a large increase in the amount of dysentery and malarial fever, as compared with last year. As regards the former disease, it was coincident with the failure of the water-works, as also with the receipt of a batch of prisoners from Barisal jail, many of whom were not in good health, and suffered from dysentery soon after arrival at Berhampore; and as regards malarial fever the jail shared equally with all parts of the district in a severe autumnal "fever season," in spite of prophylactics having been given. There were four cases of enteric fever, the source of which was not traced. Three of the cases had been some time in jail. The fourth was suffering from the disease on admission: he was second in the series, in point of time.

Rangpur.—Overcrowding lasted more or less throughout the year in almost all the barracks. To relieve it the superintendent's office, as well as the verandah of the two storied barrack, had to be occupied for some time during the year. Wards Nos. 4, 5, 6, 7, 8 and 9, which are all on the ground-floor, and were actually constructed to serve the purposes of godowns and stables (and never meant for human beings to live in) are altogether defective in ventilation and light. They are very lowly situated, dark, and damp. The doors and windows face north and south, but there are ten beds in a row with very thick partition walls separating the different rows of beds. The surface drainage inside the jail is very defective. The central block of building having sunk during the late earthquake to a depth of about two feet and a half, the water collects and floods the jail and godown at each heavy shower of rain, the few narrow drains being quite insufficient to carry off the water quickly. None of the urinals have been properly made: the urine tubs are placed on the bare ground in the open, and not on a *pucca* raised plinth. The day latrines in the female and segregation wards are so built of corrugated iron with thatched roofs like domes, entirely walled without any opening or ventilators, that they see no light of the day, nor permit of any ventilation, and so always keep damp and stuffy, though the dry-earth system is in use. The water, which is obtained from one ordinary and one tube well, is densely charged with iron salts, giving it a strong metallic taste, and turning it almost black when treated with tannic acid; and wherever the water collects, it leaves a thick yellow precipitate, as on the bathing platforms. When the water is boiled however, the salts get precipitated. The land immediately outside the jail enclosure, which belongs to the jail and forms the garden, and upon which the outhouses stand, is fairly healthy; but beyond the jail compound on the south and the east there are two deep *katcha* drains belonging to the municipality, where water collects during the rains, and stands deep and stagnant on occasions; and on the north and the west there are extensive marshes growing rice and jute at a distance of about 400 yards from the jail premises. Besides, there is a deep canal, which crosses the marsh on the west. There is no proper flow: the water remains stagnant the greater part of the year, and is very often found choked with weeds. It is a most congenial habitat for mosquitoes. The district itself is notoriously unhealthy from its medico-topographical characteristics. Sickness and mortality were due to the conditions noted above, and to the generally poor physique of the people, whose economic condition is bad, and whose general health is far below par. The three workshops are very badly constructed: none of them have got a plinth of any height, and they are mostly exposed to rains and storm. These defects tell upon the health of the prisoners, few of whom are fit to bear any sort of exposure. As the place gets very much infested with mosquitoes during the rains, the prisoners living in the lower barrack should be provided with mosquito curtains, and all the sick prisoners in the hospital should be provided with the same throughout the year. The prisoners do not, as a rule, wash and clean their mouths properly: the use of charcoal powder for the purpose may be allowed. The cubic and superficial area allotted to each prisoner in the lower barrack ought to be the maximum allowable (100 square feet and 1,200 cubic feet), and dysenteric patients who are only allowed accommodation for ordinary prisoners, should have at least 100 square feet and 1,200 cubic feet.

Midnapore.—There was overcrowding more or less throughout the year, which was prevented by making the excess number of prisoners sleep in the workshops, the cell verandahs, and the central tower. Ventilation in the old hospital buildings is not sufficient. Estimates have been submitted for allotment of funds to provide improved means of ventilation. The water-supply was scanty in the hot weather, when all the wells inside the jail always dry up. The drinking water had to be brought for about five months from the church well, the water of which was found (in a chemical examination) usable for drinking purposes. Fever and dysentery are the two diseases which have to be contended with in this jail. Dysentery is largely a food disease. Attention to the cooking and variation of food would largely reduce the incidence of the disease. A more generous diet should be allowed (more fish included); and particular care paid to cleanliness and to thorough cooking of the rations. The present kitchen is small and crowded, and so no proper supervision is really possible. The hospital kitchen is also too small and is badly ventilated: open sheds with *pucca* floors would be better. Fever is climatic: the provision of mosquito nets has been arranged, which may help. Chicken-pox accounts for 108 cases: these infectious diseases, when once introduced, are hard to check. There should be a separate ward for itch cases, and more care will be taken to disinfect the patient's clothes and bedding thoroughly before they return to the general file. The most important sanitary improvement effected during the year was the fixing of a new pump in the *pucca* well near the church, and laying pipes from this well to the jail reservoir, a distance of about a mile, and the construction of a corrugated shed for prisoners to work under, while pumping. The most important recommendation during the year was to provide for additional ventilation to the two old hospital buildings. Mosquito nets have been provided for all "fever cases" in the hospital. The nets are opened at lock-up and are closed again in the morning. It is too early to say whether this has effected any improvement in the number of cases of fever. The mud used for cleaning the cooking vessels and food dishes is now boiled before use, with a view to checking, if possible, the spread of dysentery.

Darbhanga.—There was temporary overcrowding in the female ward for four days in October, and for three days in November. The defects regarding ventilation have been remedied to a large extent. Ventilators have been put in the sleeping wards, and an arrangement has been made to enable the windows to be kept open. The latrines are low and badly ventilated; and the warders' quarters, female ward and civil jail want more ventilation. As regards drainage, a scheme has been drawn up, and estimates submitted for the improvement of the whole of the present system. The well, from which water was obtained, was silted up in the early part of the year; and the admission from diarrhoea and dysentery suddenly rose. The silt was then removed, water being supplied from the well outside the jail. Bowel complaint were prevalent: the floods in the Sahana Serai, no doubt, affected the health of the jail. There were seven admissions and four deaths from pneumonia in the early months of the year, when the quadrennial repairs were being done. All these cases are attributable to the fact that the Public Works Department took up their work in half of the number of wards all at the same time, and the prisoners in those wards had to sleep in rooms the floors of which were kept damp to allow the plaster and cement to set.

R. ABSTRACT of the SANITARY SHEETS of the most UNHEALTHY JAILS. SANITARY DEFECTS, IMPROVEMENTS, SUGGESTIONS, etc.

UNITED PROVINCES OF AGRA AND OUDH.

Allahabad District.—The village of Malaka, which lies to the south-east of the jail and close to the warders' quarters, is in a very bad sanitary condition. The appearance of malarial fever, dysentery, and diarrhoea was due to the admission of prisoners suffering from malarial cachexia. Pneumonia was due to the prisoners being in camp throughout the winter season, and suffering from exposure to changes of temperature. The large number of admissions from abscess and ulcer was in a great measure due to the prisoners being in camp for about six months; because they were kept in fetters, and the irritation of the leg irons was the probable exciting cause. As regards cerebro-spinal fever both the Sanitary Commissioner and the Chemical Examiner to Government were consulted, but could arrive at no definite conclusion as to its origin. It began in November 1901, and only ceased in March 1902. All the prisoners were kept in camp during this time. One case of plague (which recovered) occurred among the prisoners in camp. The *hawalat* and female barracks were provided with more iron gratings with a view to improve the ventilation. The walls of the inner circle were lowered to 8 feet. The new pattern of night latrine is under construction, which will be a great improvement. The night soil was incinerated outside the jail throughout the year. Every part of the jail was thoroughly disinfected and the roofs were kept opened up till June. The prisoner's clothing was stocked after boiling and carefully disinfected by carbolic acid. Owing to the epidemic of plague in the city an observation camp was opened from October. All new admissions were kept outside for fourteen days. The disinfection of their clothing was carefully attended to.

Karwi.—Overcrowding lasted for 72 days throughout the year. Cases of dysentery were cases of simple entero-colitis caused by a change in diet and recovered within a week of admission into hospital. Similarly, cases of intermittent malarial fevers were of ordinary type. The case of pyremia was admitted suffering from an abscess on the head, and on *post-mortem* examination part of the skull bone was found necrosed. There is no separate room in the jail hospital to keep the contagious disease patients.

Banda.—There was no overcrowding. Five barracks for males and two for females have flat stone roofs, and are very hot indeed during May and June before the rains set in. They are accountable for two deaths from sun-stroke this year. All water was boiled for drinking purposes, a Larymore's boiler being in use. The prisoners are, in the great majority of cases, in very poor health on admission. The number of deaths this year is the smallest for some time.

Cawnpore.—Overcrowding lasted for 9 days in July and 2 days in August. There was no disease in the jails at all ascribable to defective hygiene, intrinsic or extrinsic.

Mainpuri.—Very slight overcrowding existed during the month of October. A large number of prisoners was sent direct to hospital on their admission to the jail. The condition of the prisoners on admission in the latter part of the year was poor.

Dehra Dun.—No overcrowding. There were no local conditions within the jail which would account for the malarial fever, and it was not of a severe type. The sanitary condition of the jail is moreover satisfactory, and there is no standing water in or around the jail from defective drainage.

Saharanpur.—There was overcrowding amongst all classes of prisoners from the 14th June to the 27th July and again from the 26th September to the 27th October. The overflow of the prisoners was accommodated in factories, until the overcrowding was relieved by transfers. The water-supply was tested from time to time by the Chemical Examiner, and reported free from contamination. The district is notoriously malarious. Malaria was the chief cause of sickness. The mortality was also to a large extent indirectly due to this cause, owing to the fact that many of the prisoners on admission into the jail were suffering from malarial cachexia, which had so undermined their constitution that they readily succumbed to the attacks of other diseases, such as dysentery and diarrhoea. The open drains passing through some of the barracks were lined with galvanised iron pipes and covered in. The ablution platforms were remodelled. A germ destructor was installed for the incineration of dysenteric stools. The floors of all the barracks were washed down with disinfectant (phenyle) solution once a week. The excessive prevalence of dysentery and the high mortality from this disease constitute an outstanding feature of the sick report of this jail for the year. It has been suggested above that much of the mortality from this cause was referable to the asthenic and anæmic condition of many of the prisoners who were overtaken by dysentery while suffering from malarial cachexia. It is difficult, however, to assign a cause for the unusual prevalence of the disease.

PUNJAB.

Hissar.—The jail was overcrowded for 181 days; when the *durree* and polishing sheds were used as temporary dormitories in addition to tents outside the jail. The malarious condition of the district, from which the prisoners are drawn, naturally affects the jail population and accounts for the large number of admissions from fever. The district was severely affected by cerebro-spinal fever in the early part of the year, and the disease appeared in the jail in April and again in November and accounted for half the mortality. Beyond these two causes the sickness and mortality were not unusual; and the diseases were those common to all parts of the country and season of the year. New earthen glazed vessels were obtained from Lahore Central Jail after the first outbreak of cerebro-spinal fever, the old ones being destroyed. The flooring of all the latrines was removed and fresh earth laid down. The wall plaster of all the dormitories, sheds, and workshops, and of the latrines attached to barracks was entirely removed and fresh plaster laid on. The prophylactic issue of quinine was again adopted and was of undoubted value in modifying the cases due to malaria.

Lahore Central.—Ague, as usual, was the chief cause of sickness. It was, however, well controlled by the issue of quinine during the autumn months. Dysentery is treated as due to a specific organism and to infection. The cases were therefore segregated, and the excreta burnt. Pneumonia has decreased in the jail since greater attention was bestowed on the free ventilation of the sleeping barracks. Now with increased ventilation in the barracks and improved methods of disinfecting clothing, bedding, etc., there is every prospect of the mortality from pneumonia still further decreasing. There can be no doubt that the majority of prisoners who have shown symptoms or died from tubercle, contracted it whilst incarcerated in this jail. Therefore, the virus of this disease is flourishing in this locality. Whether it be in the barracks, dust, clothing or what not, it is present somewhere, and is giving rise to much sickness and mortality. The serious point in the medical history of the year is the infection of the jail with tuberculosis; and great efforts have been and are being made to fight the disease. The whole of the hospital buildings have been renovated, the hospital area laid down in lawns, to prevent dust, and the hospital clothing boiled most thoroughly every week. Every sleeping barrack and cell has been scraped bare of old plaster, and clay from outside the jail used to replace it. The floors have also been relaid. A tubercle ward with a view of giving thoroughly satisfactory open air treatment is nearing completion, and lastly, though most important of all, greatly increased lateral ventilation is being given to the sleeping barracks at a very heavy cost. These are some of the measures which are being taken to arrest the increase of tuberculosis.

(Note by Inspector-General of Prisons.—The dormitories being insufficiently ventilated and their floors being of mud and their walls mud plastered, there are in existence factors calculated to produce sickness and mortality from diseases such as dysentery, pneumonia, and tuberculosis. There is also behind the jail a main drainage channel in which pools form, which may be so many breeding grounds for mosquitoes. These causes of disease have been removed as far as possible.)

Jhang.—Overcrowding lasted for 53 days. The wards for convicted prisoners were partially overcrowded. The prisoners in excess of the capacity were never shut up in any of the wards. The pressure on the accommodation of the buildings was relieved by placing prisoners in tents. The lateral ventilation of the barrack, cells, and hospital is defective. Measures to improve it are under the consideration of the Public Works Department. The mortality was apparently due to bad or indifferent health of the prisoners on admission into the

jail and to advanced age. The increase in admissions from fever and diarrhoea was probably due to climatic influences. The increase in admissions from diarrhoea in July and August was also to some extent due to the coarser cereals being given to the prisoners, because when wheat was issued instead the diarrhoea stopped. The barracks, the hospital and the walls of the jail enclosure were white-washed; and the floor of the latrines was scraped and plastered. The wells were cleaned and treated with potassium permanganate. Sulphate of quinine was given to all the prisoners as a prophylactic against malarial fevers during the autumn months, and boiled water was also given to all the prisoners during the same period.

(Note by Inspector-General of Prisons—The defective ventilation of the barracks and inadequate ablutionary arrangements are probable causes of sickness.)

NORTH-WEST FRONTIER PROVINCE.

Abbottabad.—The female ward was only overcrowded on the 14th and 15th January, and the male ward on the 21st August.

The general sickness was due to climatic causes. No particular cause of the sickness was ascertained in any of the fatal cases which occurred.

BOMBAY.

Ahmedabad Central.—Overcrowding existed more or less in all the barracks during the rainy season, and in the jail as a whole throughout the year. Temporary sheds and tents were used from 1st January to 6th July and from 1st November to 31st December. The first case of cerebrospinal fever was imported into the jail from an infected locality; and afterwards, it appears, the disease spread through the agency of duststorms, which were very frequent during those months. Malaria was less prevalent during the year than in the preceding one. Pneumonia was due in many cases to exposure. Mumps occurred in an epidemic form from January to May. There were admissions all through the year from dysentery, and during the rains the number was greater than usual. As the drinking water has been declared unfit for potable purposes, it must have some causal relation with diarrhoea and dysentery. Eleven deaths occurred from tubercle of the lungs and most of the prisoners were in bad health at the time of their admission into the jail. A new additional ward has been built to increase the hospital capacity, accommodating 12 beds.

Thana.—Overcrowding lasted till the 23rd of September, except in the month of August. This might have had a prejudicial effect on the general health of prisoners. Two barracks were used as workshops in the day-time, but at night were occupied as dormitories. The chief factor in the causation of sickness and mortality is climatic. But prisoners are also admitted in a weak state of health, and are soon attacked with disease incidental to the unhealthy condition of prison life. Ridge ventilation has been provided in the contagious disease hospital, and the mud floor paved with stone. The moat around the prison had been filled in in 1901. Although precautionary measures had been in vogue since the previous year against the importation of plague into the prison, one case of the disease occurred in March among the prisoners. The victim had been employed on flower garden work, where one dead rat had been discovered a month before. The disease was then still prevalent in the town. A female prisoner developed genuine symptoms of cholera. On inquiry it appeared that that evening's meal had not agreed with her, and had caused symptoms of indigestion, which passed into cholera. It must be added that the disease was not then prevalent in the town or the several talukas of the district.

CENTRAL PROVINCES.

Saugor.—There was no overcrowding. The rains were not up to normal, and hence there was no flooding of mosquito puddles, which consequently produced their full number of *anopheles* mosquitoes. There was great prevalence of malaria in the district this year. Bowel complaints must be considered to be a sequela of the long-continued scarcity from which this district has suffered. A pump has been erected at one of the two wells within the jail.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 a.m. on Thursday, the 10th September 1903, based on the India Daily Weather Reports of the period.

During the week under review the monsoon currents have remained feeble on both sides of India and the rainfall has been irregularly distributed.

On September 4th rain was falling along the Burma coast, along the foot of the eastern Himalayas and over the west of the Central Provinces, but there was no rainfall of any importance elsewhere. The largest amounts reported on this day were 6·62" at Jalpaiguri and 5·13" at Saugor. On the following day, the 5th, rain continued along the Burma coast and showers were moderately general in north Bengal and over the Gangetic plain, but elsewhere there was little rain and the only heavy falls were 2" at Moulmein, Jalpaiguri and Gorakhpur. On the 6th a very feeble depression appeared over the east Satpuras and the rain increased both in amount and extent, Silchar reporting over 5", Benares over 3" and several stations over 2". On the 7th rain extended along the hills to Sialkot and Murree, but otherwise the distribution was little changed and showers of between 1" and 3" were reported from several scattered stations. On this day rain extended into the dry area of Burma where it was much needed. On the 8th the barometer was falling everywhere and showers were reported from nearly all parts of the country except the north-west dry area. Mandalay reported a fall of nearly 4" and all the other stations in this district received showers. Fairly general showers continued during the 9th and 10th, the only important feature of the rainfall having been the continued rain in the dry district of Burma.

The rainfall table shows that little or no rain fell during the week over the Deccan or the Burdwan and Lahore subdivisions, but that in all other parts of India effective rain was received, the average actual fall ranging from 0·80" in the Ahmedabad subdivision and 0·77" in the Bahraich subdivision to 8·72" in the Burma coast division. The week's rainfall exceeded the normal in all the Burma divisions, the Central India plateau, the west Himalayas, the north-west dry area and the east coast (south) as well as in the Darbhanga, Patna, Cawnpore, Raipur, Jubbulpore, Calicut, Rajkot and Madura subdivisions. In all other parts of the country the rainfall was in defect, the deficiency having been considerable in Assam, Lower Bengal, Bihar, the Bombay coast and the Deccan.

There has been no important change in the seasonal variations.

Season and Crop Prospects for the week ending Saturday,
5th September 1903.

Madras.—The rainfall has been fair in the Deccan, parts of the Carnatic and in the central and southern districts. Elsewhere it was good. Water for irrigation is sufficient, except in parts of the Deccan, Salem and Madura. Ploughing, sowing and transplanting are going on. Generally the condition of the standing crops is good, but some damage has been done through excessive rain in Godavari and by breaches in Tanjore. Pasture is sufficient and fodder is procurable. The condition of cattle is good. The price of rice is stationary. The price of dry grains has fallen generally.

Bombay.—Good rain fell during the week in parts of Surat, the Konkan, Khandesh and Nasik. The rainfall was moderate in parts of Ahmedabad, the Panch Mahals, Kaira and Ahmednagar; slight in parts of Broach and Poona and very slight in parts of Sholapur, Satara and the Carnatic. It was generally sufficient, but more rain is needed for standing crops in parts of Larkana, Thar and Parkar, Ahmedabad, Kaira, the Deccan and the Carnatic. The sowing of autumn crops is completed in Nasik; is almost over in Ahmedabad and continues in parts of Broach, Surat and Rajkot. Transplantation has been completed in Hyderabad, the Panch Mahals and Kaira and is progressing in parts of Ahmedabad. Weeding is completed in Khandesh and generally continues elsewhere. Standing crops have been slightly damaged by insects in parts of Sukkur. Hyderabad, the Upper Sindh Frontier, the Panch Mahals and Belgaum; by locusts in parts of the Panch Mahals; by rats in parts of Ahmednagar and Sholapur and by excessive rain in parts of the Panch Mahals, Surat and Thana. They are suffering from insufficient moisture in parts of Larkana, Ahmedabad and Belgaum and are generally in good condition elsewhere. The sowing of cotton is nearly completed in Broach and is progressing in parts of Nasik, Ahmednagar, Sholapur and the Carnatic, but is retarded for want of sufficient moisture in parts of Dharwar. The preparation of lands for spring cultivation has been commenced in parts of Karachi and continues in parts of Sukkur, Larkana, the Upper Sindh Frontier, Nasik, Ahmednagar, Poona, Satara, Bijapur and Dharwar. The fodder-supply is sufficient. Agricultural stock is in good condition and generally sufficient. The water-supply is adequate, except in parts of Bijapur. Prices have fallen in three districts; have risen in one district and are stationary elsewhere.

Bengal.—Rain fell during the week all over the province, but the fall was insufficient in some districts. The districts of Patna, Gaya, Shahabad, Muzaffarpore, Darbhanga, Monghyr, Bhagalpur, the Sonthal Parganas, Hazaribagh and Palamau are still in need of more rain for the winter rice crop. Transplantation of winter rice is going on and the harvesting of early rice and jute continues. Sugarcane is doing well. Fodder and water are generally sufficient. The price of common rice has risen in twelve districts; has fallen in eleven and is stationary in the rest.

United Provinces.—Rain has fallen throughout the Provinces, the falls averaging from 4 cents. in Bara Banki to 5 inches in Fyzabad, Jaunpur and Basti. More rain is said to be required in Meerut, Aligarh, Muttra and pargana Dudhi in the Mirzapore district. Prospects are generally good. The early autumn crops are being harvested in places and the transplantation of rice is nearly completed. Weeding continues and fields are being prepared for spring crops. Some damage by floods to standing crops is reported from Fyzabad. Supplies are adequate. Prices are stationary or are falling.

Punjab.—Rain has fallen in all districts, except Delhi, Shahpur, Mianwali and Mooltan. Sowings of autumn crops are finished. Ploughings for spring crops have commenced in Lahore, Shahpur and Mooltan, and are in progress in Amritsar and Sialkot. Sowings of gram and *toria* (*Brassica campestris*) has commenced in parts of Sialkot. The condition and prospects of standing crops are good in all districts, except Rawalpindi and Mianwali, where they are average. Unirrigated crops are withering for want of rain in Hissar and parts of Ferozepur. Young locusts are said to have done some damage to the crops in Fazilka. Cattle are generally in good condition. Fodder is said to be sufficient throughout the Province. The price of wheat is falling in Delhi, Umballa, Jullundur and Amritsar. The prices of other food-grains are fluctuating.

North-West Frontier Province.—Good rain fell in Hazara and slight showers in Peshawar. There was no rain elsewhere. More rain is badly wanted throughout the

province. The standing crops are flourishing on irrigated lands and are fair on dry lands in Dera Ismail Khan. Ploughings for spring crops have begun. Flood and canal irrigation continues satisfactory. Cattle are in good condition and fodder is sufficient. Stocks of food grains are ample. Prices of wheat are falling slightly in Peshawar, but rising in Dera Ismail Khan.

Burma.—The rainfall was general and sufficient outside of the dry zone where it was light with 42 cents in Shwebo, 8 cents each in Sagaing and Lower Chindwin and none in Mandalay. Transplanting for wet-weather paddy is finished in Hanthawaddy, Thongwa and the Northern Shan States. It is approaching completion in Lower Burma and continues in Upper Burma. The reaping of dry-weather paddy is progressing in Pakokku and of early wet-weather paddy in Kyaukse and the Southern Shan States. The reaping of early sesamum has been completed in Myingyan and of sesamum and *juar* in the Yinnabin sub-division of Lower Chindwin. Owing to drought a considerable portion of the sesamum crop has failed in Minbu, Yamethin and Magwe. A large portion of the cotton crop in Sagaing and of the paddy crop in the Ruby Mines district has not been matured for want of rain. The recent rain has benefited the standing crops in Shwebo and Myingyan. Rain is much needed in Sagaing, the Yamethin sub-division of Yamethin, Meiktila and Lower Chindwin. Fodder and water are insufficient in five districts, but the greatest deficiency is felt in Sagaing, where cattle are fairing badly. The numbers on test-works in the Budalin township of Lower Chindwin remain as last week, *viz*, 1,117. Prospects are bad in Sagaing and also in the Yindaw and Pyawbwe townships of Yamethin where test-works are being opened. Otherwise prospects are as in previous reports. Sagaing notifies 2 inches and 34 cents of rain on the 7th. The price of paddy has risen considerably in the Southern Shan States. It has changed slightly in four districts and is stationary elsewhere.

Central Provinces.—Moderate to heavy rain has fallen throughout the provinces. Weeding operations and the preparation of land for spring sowings have consequently been retarded everywhere. The rainfall has not been so heavy in the Nagpur country, so that no further damage has been caused to cotton and *juar*, but the plants are stunted and urgently require a break with sunshine to permit weeding and encourage growth. A break is urgently needed throughout the provinces, except in the districts of the Chhattisgarh division. Grass-hoppers have caused some damage to crops in the Nimar and Raipur districts. Prices are generally steady, but owing to good prospects the price of rice has fallen in Chanda, Bhandara, Balaghat and Chhattisgarh. Gratuitous relief—Raipur, adults, 5,475; children, 1,065; total, 6,540. Bilaspur, adults, 596; children, 111; total, 707. Bhandara, adults, 1,042; children, 85; total, 1,127. Balaghat, adults, 268; children 92; total, 360. Total on gratuitous relief, 8,734. Poor-houses—Raipur, adults, 11; children, 25; total, 36. Total on all forms of relief, 8,770.

Assam.—The rainfall has been sufficient. Ploughing for and transplanting of late rice, harvesting of early rice, plucking and manufacture of tea and cutting of jute are in progress. Late rice has been slightly damaged by insects in Sibsagar and Lakhimpur and by floods in Cachar. The outturn of early rice is good in Goalpara, Darrang and Nowgong; poor in Kamrup and fair in other places. The prospects of jute are good and of tea and sugarcane fair to good, except in Kamrup, where prospects of sugarcane are reported poor. Prices:—Common rice—Silehar, 14; Sylhet and Tezpur, 13; Gauhati, 12; Dhubri and Sibsagar, 11 and Nowgong and Dibrugarh, 10 seers per rupee.

Mysore.—One inch and forty-eight cents of rain fell in the Civil and Military station of Bangalore. The rainfall was good generally throughout the province. General prospects are good. Prices have fallen in five districts. Cattle are healthy, except in parts of Mysore and Hassan. Water and fodder are sufficient.

Coorg.—Rainfall—1 inch and 19 cents. The transplanting of rice has been almost completed. Prices of food-grains are stationary. Water and fodder are ample.

Berar.—The average rain during the week was 2 inches and 30 cents. The weather is cool and cloudy. Crops are in fair condition, though slightly damaged in some localities owing to excessive rain. The preparation of land for spring crops continues. Weeding is in progress. Fodder and water are sufficient. Prices are fluctuating in the Wun district and are stationary elsewhere.

Hyderabad.—The rainfall during the week was 2 inches and 72 cents. Early rice sowings continue. Lands are being prepared for spring crops. Prospects are good. Prices:—Wheat, 9½; rice, 9 and *juar*, 31 seers per *halli* rupee.

Rajputana.—The rainfall was good in Mewar and Eastern Rajputana. The condition and prospects of standing crops are good. Slight damage has been done by locusts in Kishengarh and by excessive rain in Mewar. Cattle are in good condition. Prices of food-grains are steady in eight States, rising in four and falling in three districts. The cheapest price was: Bundi, 43; and the highest: Sirohi, 16 seers per rupee.

Central India.—The rainfall was general and sufficient. Agricultural operations are in progress everywhere. Crops are good generally in Gwalior, Bhopal, Bundelkhand and Baghelkhand; fair in Malwa, Bhopawar and Indore, but have been slightly damaged by vermin and rain in parts of the Bhopal, Malwa and Bhopawar Agencies and Indore. Agricultural stock and pasturage generally are good. Prices are steady in Gwalior, Bundelkhand and Bhopawar; normal in Bhopal, Baghelkhand and Indore and are low in Malwa.

Kashmir.—The weather is slightly rainy and cooler. Prices are stationary. **JAMMU.**—There has been good rain. The condition of the standing crops is good. Fodder is sufficient. Prices are fluctuating. Wheat is selling from 13 to 32 and maize from 16 to 35 seers the rupee.

Nepal.—Rainfall 4.35 inches. The nights are wet, but days fine. Indian-corn is still being gathered in. Rice crops are progressing well. The price of rice is 5½ seers for the rupee.

RESOLUTION.

Simla, the 11th September, 1903.

SUBJECT.—Review of the reports of the Registrars of Joint Stock Companies on the working of the Indian Companies Act, VI of 1882, during the official year 1902-03.

The number of companies, and the capital invested in them, stood as follows at the end of each of the last five years :

	18,8-99.	1899-1900.	1900-01.	1901-02.	1902-03.
Number of companies	1,417	1,340	1,366	1,405	1,440
Nominal capital ...	51,30,97,190	50,16,59,360	51,74,18,550	53,04,41,120	53,55,80,940
Paid-up capital ...	35,59,89,490	35,43,87,750	37,06,29,870	38,25,98,530	39,30,19,770

There was thus a net increase of 35 in the number of companies, of Rs. 51,39,820 in the nominal capital, and of Rs. 1,04,21,240 in the paid-up capital during the year under review.

An analysis of the reports shows that—

- (1) the nominal capital of 434 companies was increased by Rs. 53,41,520 and the paid-up capital by Rs. 2,09,38,990 ;
- (2) the paid-up capital of 49 companies was reduced by Rs. 5,61,640 ;
- (3) 83 companies with a nominal and paid-up capital of Rs. 2,32,69,080 and Rs. 1,19,37,410, respectively, ceased to work ; and
- (4) 118 new companies, with a nominal and paid-up capital of Rs. 2,32,97,380 and Rs. 19,81,300, respectively, were registered during the year.

2. The following table shows the number of companies and the amount of paid-up capital in each province in the last two years :

PROVINCE.	NUMBER OF COMPANIES.		PAID-UP CAPITAL IN RUPEES.		Increase or decrease per cent in capital in 1902-03.	Provincial proportion of paid-up capital to all paid-up capital in 1902-03.

TOTAL ...	1,405	1,440	38,25,98,530	39,30,19,770	+ 2.7	100

3. The average paid-up capital per company of the joint stock companies in each province during the last four years was as follows :

		1899-1900.	1900-01.	1901-02.	1902-03.
		Rs.	Rs.	Rs.	Rs.
Bombay	...	4,27,030.	4,56,240	4,71,950	4,73,799

Punjab	...	1,42,530	1,45,120	1,55,580	1,70,307
Burma	...	1,12,050	1,75,320	2,02,980	1,85,841
Madras	...	75,540	67,470	66,150	64,690

These figures show that, during the year under review, the average has increased in all the Provinces except Burma and Madras. The large decrease of Rs. 17,140 in the average of paid-up capital in Burma is due to the fact that, of the four new companies registered during the year, three had no paid-up capital at all. The decrease in Madras is mainly due to the large number of pawn societies, or *chit* associations, registered in the Tinnevely District, the paid-up capital of which is apparently realised by small monthly collections.

The following table shows the distribution of the aggregate capital in the principal classes of joint-stock
86 :

(i) Over 19 crores of rupees, or nearly 49 per cent. of the total paid-up capital, is invested in mills and presses, chiefly for working or pressing cotton, jute, wool, and silk. Of this amount Bombay accounts for over 11 crores and Bengal for over 5 crores, the capital being chiefly invested in the cotton industry in the case of Bombay, and in jute mills and presses in the case of Bengal.

(ii) Trading companies have a paid-up capital of over 7½ crores, of which nearly a quarter of a crore is invested in coasting and river steamer companies, and over 3½ crores in railways and tramways.

(iii) The amount invested in tea, coffee, and other plantations is nearly 3½ crores, of which over 3½ crores is held in Bengal, as most of the tea companies which own gardens in Northern and Eastern India are registered in Calcutta. One new tea company was registered in Bengal during the year, and a company was formed for the cultivation of the rhea plant and the preparation of its fibre.

(iv) Of the capital of over 2½ crores invested in mining and quarrying companies, Bengal holds over 2½ crores, most of which is employed in coal-mining. 4 coal companies were registered during the year in Bengal.

5. The following table shows, so far as reported, the total number of joint stock companies at work in India, with their nominal and paid-up capital as it stood at the end of each of the last fifteen years :

8. In paragraph 8 of Resolution No. 6648-S.R., dated the 17th December 1902, reviewing the reports on the working of the Act during the year 1902-03, it was pointed out that the working of the Indian Companies (Branch Registers) Act, 1900 (IV of 1900), had not been noticed in many of the reports, as required by the orders contained in the communication from this Department No. 2579-S.R., dated the 28th May 1900; and it was requested that those orders might be observed in future. In the reports now under review, the majority of the Registrars report that the provisions of the Act have not been taken advantage of, but the reports of some Provinces are still silent on the subject. The Governor General in Council desires again to draw attention to the orders quoted above, and to express the hope that they will be observed in future.

ORDERED, that the foregoing Resolution be published in the Supplement to the *Gazette of India*.

E. N. BAKER,
Secretary to the Government of India.

IRRIGATION.

Simla, the 10th September, 1903.

Review of Irrigation in India in 1901-02.

Read—

Note by R. N. Burn, Esq., Accountant General, Public Works Department, on the accounts of Revenue and Expenditure of Irrigation Works in India 1901-02.

Provincial Revenue and Administration Reports of Irrigation Works for triennia ending 1901-02.

Irrigation Works are divided into two main classes—Major and Minor Works,—the former being sub-divided into (I) Productive, and (II) Protective Works. Capital and Revenue Accounts are kept for all Major Works, and the revenue due to them, whether direct in the form of water-rates and miscellaneous receipts, or, indirectly, on account of enhancements of land revenue due to irrigation, is shown in the Annual Finance Accounts.

A.—MAJOR WORKS.

I.—Productive Works.

2. The most important irrigation works in India are those classed as Productive Works or works the capital cost of which has been wholly or mainly provided from loan funds on the expectation that they would prove directly remunerative, and that the net revenue derived from them would fully cover all charges for interest within a reasonable time after their completion. This expectation is never likely to be realized in respect of any of the four works constructed in Bengal, of the seven in Bombay (Deccan and Gujarat) and of the Kai Canal and Barur Tank in Madras. The capital outlay recorded against these thirteen works at the end of the year under review amounted to Rs. 9,75,35,410 on which the net revenue realized during the year yielded a return of 0.90 per cent. compared with 0.81 and 0.80, averages of the past two triennia. The interest charges to the end of the year exceeded net revenue by Rs. 8,95,93,822, the excess for the year being Rs. 29,34,026. The area irrigated by these works during the year was 942,108 acres.

3. These unfavourable financial results are, however, more than balanced by the attainment on the 25 remaining productive works now in operation, the net revenue on which during the year was equivalent to a return of 9.13 per cent. on the capital outlay. The general financial results of all the works of this class are shown separately by provinces in the following statement. The totals are brought into comparison with those of the two previous years:

† Part of the works in the Punjab.

The addition, during the year under review, of the Jhelum Canal in the Punjab and the Dad Canal in Sind to the number of Productive Works in operation accounts for an abnormal increase in the capital outlay as compared with 1900-01.

The area irrigated has never been exceeded though the percentage return is less than those of previous years.

4. The enormous increase of area irrigated under the head of Productive Works is shown in the following table, where the areas for the year under consideration are compared with the averages of the last three triennia, i.e., 1901-02 to 1893-94. Every province shows a marked increase with the exception of Bombay, which has made no progress. The Punjab Native States are also stationary.

Total	4,491,838	4,398,507	3,729,503	2,111,248

The Jhelum Canal, which was opened during the year, irrigated 65,367 acres. No revenue, however, was earned as the water was given free of charge. Excluding the Jhelum Canal, the net revenue of the productive works in the Punjab rose from Rs. 98,83,920 in 1900-01 to Rs. 1,03,08,279 in the year under review, or 11·52 per cent. on the capital outlay. The highest percentage attained was on the Sidhnai Canal, which earned a net revenue of 24·50 per cent. on the capital outlay against 8·70, 16·62 and 19·25 per cent., the averages of the past three triennia. The return on the capital outlay of the Chenab Canal was 18·88 per cent. compared with 14·13, 7·44 and 2·12 for the three triennia; this canal is still developing and the ultimate percentage of profit has not yet been reached. The great decrease in net revenue in the case of the Native States was due to shrinkage of the irrigated area in 1900-01 owing to favourable rainfall and to abnormal working expenses intimated by the Nabha State.

6. In the United Provinces of Agra and Oudh the averages of area irrigated are as below :

Name of work.	AREA IRRIGATED

Total	2,452,743	2,308,149	2,389,290	1,409,951

The area irrigated by the Eastern Jumna Canal exceeded all its previous records. The net revenue, however, from these canals was less than that of 1900-01 by Rs. 15,27,459 and represented a return of 5·84 per cent. on the capital outlay. In the preceding five years the return was never less than 7 per cent. The decrease was due to the contracted area of irrigation in 1900-01, the realizations on account of which are included in the receipts of the year under review.

The relative percentages of profit compared with those of the past three triennia are given in the table below :

Name of work.	PERCENTAGE.			
	1901-02.	AVERAGE OF TRIENNium.		
		1899-1900 to 1901-02.	1896-97 to 1898-99.	1893-94 to 1895-96.

Agra Canal	4·01	5·52	6·06	3·05
Eastern Jumna	22·98	25·31	29·66	21·44

The Eastern Jumna Canal is the most remunerative in the United Provinces; the net revenue realised from this canal up to the end of 1901-02 has exceeded the interest charges by the large sum of 228·8 lakhs of rupees, while during a period of 37 years ending with 1901-02 the return on the capital outlay never fell to less than 17 per cent. and was over 31 per cent. in five years.

7. In Madras, comparing the year with the averages of the past three triennia, excepting the Periyar where the figures are for two triennia only, we have an increase for all works :

Total	2,896,307	2,805,296	2,627,744	2,438,459

The areas irrigated on the first three of these canals were the largest on record. Taken collectively also the area irrigated by the productive works in Madras was the largest on record, the increase being due to the favourable character of the season. The net revenue yielded by these works in 1901-02 was 9'55 per cent. on the capital outlay compared with 9'05 per cent. in 1900-01.

The percentage returns on the different systems for the year compared with the three previous triennia are—

Srivaikuntam	6'41	6'39	4'40	4'76
Periyar	3'84	3'25

The Kurnool Canal still continues the most unremunerative work in the province, but the return from it is gradually increasing, the net revenue in 1901-02 being Rs. 1,12,23 against Rs. 67,654 in 1900-01. The heavy capital expenditure on it will, however, prevent it from ever becoming remunerative. The prospects of the Periyar Project are steadily improving, and there is hope that when the distributing works are completed, its return will still further improve.

8. For the canals in Sind the figures are—

Mahiwah	10,363	3,454	Nil.	Nil.
TOTAL	968,831	912,804	690,835	565,749

The net revenue fell to 5.92 per cent. on the capital outlay compared with 7.66 per cent. in 1900-01. The falling off is partly due to the character of the inundation and partly to the large expenditure on the Dad and Mahiwah, which have not yet become productive, being taken into account in 1901-02 for the first time. The improved Dad Canal and the Mahiwah Canal, which were brought into operation during the year, irrigated an area of 56,241 and 10,363 acres, respectively.

Percentage returns on capital outlay are—

Begari	18.82	21.00	17.51	15.45

9. In Bombay (Deccan and Gujarat) the return on the capital expenditure was 1.87 per cent. compared with 1.84, 1.60 and 2.06 for the three triennia. The works are small compared with those of other provinces: the extent of the area irrigated by them continues steady.

10. In Bengal, the irrigated area was the largest on record, the comparative growth is as follows:

Name of work.	AREA IRRIGATED			
	During 1901-02.	AVERAGE OF TRIENNium.		
		1899-1900 to 1901-02.	1896-97 to 1898-99.	1893-94 to 1895-96.

Total	841,126	761,478	739,620	548,603

The Hijili Canal, which is a purely navigation canal, paid 0·69 per cent. on the capital cost compared with 0·53, 1·62 and 0·20, the previous triennial averages. The navigation receipts on the Bengal canals have suffered from the competition of the Bengal-Nagpur railway.

11. In addition to the 38 productive works now in operation, four new works were under construction during the year, *vis.*, the Mandalay and Shwebo Canals in Upper Burma, and the Naulakhi and Nasrat Canals in Sind. The total outlay on these works to the end of the year (excluding interest charges) amounted to Rs. 57,03,469, of which Rs. 17,18,644 were expended during the year. In addition Rs. 68,88,513 were spent on works now in operation, principally on extensions or improvements which are likely to prove remunerative and to increase the efficiency of these works and also on completing the new canals opened during the year. The total capital expenditure on irrigation works during the year, therefore, amounted to Rs. 86,07,157 against Rs. 91,80,167 in the previous year. The new works opened during the year are the Jhelum Canal in the Punjab and the Dad and Mahiwah Canals in Sind.

No capital expenditure was incurred during the year on navigation works.

II.—PROTECTIVE WORKS.

12. Protective irrigation works are those which have been sanctioned in consideration of their value as famine protective works, but without any expectation of their becoming directly remunerative. The cost of their construction has been met from the famine grant. There are at present five of these works in operation, particulars of which are shown in the statement below :

The Swat River Canal, although sanctioned as a protective work, has highly remunerative one. The Betwa Canal has seldom paid even its working cost but improvements to it are under contemplation, which, it is hoped, will render remunerative. The Nira Canal has proved of great utility, and the area irrigated was about the same as irrigated in 1900-01, which was the largest on record. The two works are not likely to prove remunerative.

The area irrigated during the year is well above the average of the last three triennia for all provinces as is shown by the following statement :

Compared with the year 1900-01 the general results are almost identically the same, but there are considerable variations in some of the provinces, the largest of which are noted below.

In respect of the average value of the crops, the United Provinces have decreased from Rs. 39'2 per acre owing principally to decrease in the value of sugarcane and wheat, and Madras from Rs. 36'7 per acre which is due to decrease in the value of rice, and Bombay from Rs. 77'2 per acre owing to the smaller prices obtained for sugar. Sind has increased from Rs. 15'6 per acre and Bengal from Rs. 34'4 per acre.

Only in Bombay has there been any large variation in the average assessment, which in this case has increased from Rs. 4·8 per acre owing to an increase in the area of high rated crops.

Working expenses have risen in Sind and Bombay from Rs. 0·4 and 2·5 per acre, respectively. In both cases there has been an increase in the charges for repairs and establishment. In the United Provinces and Bengal they have fallen from Rs. 1·7 per acre owing to an increase in the irrigated area.

These variations account for the variations in the percentage of working expenses on gross revenue.

The total area irrigated has increased by 821,185 acres and the estimated value of crops by Rs. 75,80,515.

B.—MINOR WORKS.

III.—Works for which Capital and Revenue Accounts are kept.

14. All expenditure incurred in the construction and development of minor irrigation works is met from revenue. These works are treated as provincial in all provinces except Sind, Bombay, Baluchistan, Rajputana and the Punjab, in which all but a few works are Imperial. Capital and Revenue Accounts are kept for 79 of the larger and more important minor works, and the financial results attained during the year under review are shown in the following statement:

15. The capital outlay during the year on Irrigation Works amounted to Rs. 5,13,707. The expenditure in Rajputana was Rs. 50,610; in the Punjab, Rs. 61,131; in Madras, Rs. 2,46,290; and in Bombay, Rs. 59,055. In the other provinces the expenditure was less than Rs. 50,000 in each case.

16. Comparison of the area irrigated during the year and the averages of the three previous triennia gives:

(a) The transfer of Lower Sutlej and Chenab Inundation Canals from Minor Works for which Capital and Revenue Accounts are kept to Minor Works for which only Revenue Accounts are kept, largely accounts for the apparent reduction in area irrigated.

(b) Includes area irrigated by Ghaggar Canals in Bikaner State, 7,153 acres.

(c) Excludes 1,352 acres old irrigation from the Bundelkhand Lakes included in acreage, paragraph 14.

The net revenue in the Punjab was 25.09 per cent. on the capital outlay compared with 16.57, 21.41 and 19.96, triennial averages; this increase was mainly due to the Upper Sutlej Inundation Canals, which during the year under review yielded a return of 43.20 per cent. against 16.74, 10.56 and 16.66, triennial averages. In the case of the United Provinces the net revenue was 1.72 per cent. in 1901-02 compared with 3.23, 5.61 and 2.96, triennial averages. The decrease was principally due to contracted irrigation in the winter of 1900-01, and partly to a small increase in the working expenses.

Rajputana gave a return of 3.01 per cent. against—1.37, 3.06 and 39.4, triennial averages.

The working expenses exceeded the gross revenue in Bengal by Rs. 6,155 and in Bombay by Rs. 44,223. In this latter province the maintenance charges are always high owing to the small areas irrigated by the works and in a great measure to the expenditure necessary to maintain their storage reservoirs.

The area shown in Burma is not under irrigation, but represents the area of cultivation on lands reclaimed by river flood embankments, the revenue of which is credited to the capital account of the works. This area in 1901-02 exceeded that in 1900-01 by 5,052 acres.

IV.—Works for which only Revenue Accounts are kept.

17. There are numerous Minor Works for which separate Capital Accounts are not kept, either because the works are too small, or because they have not been constructed by the British Government, which has simply undertaken their improvement and maintenance. For such works only Revenue Accounts are maintained; they are credited with a share of the land revenue depending on their maintenance and are debited with all expenditure incurred on construction, extension, improvements and

maintenance. Particulars for the year 1901-02 are shown by provinces in the statement below :

V.—Works for which neither Capital nor Revenue Accounts are kept.

18. There is a third important class of Minor Works in the Madras Presidency for which neither Capital nor Revenue Accounts are kept. These include over 28,000 tanks and 6,000 irrigation channels, the improvements and repairs of which are executed by the Public Works Department, or, in the case of the smaller works, by civil officers: the expenditure during 1901-02 amounted to Rs. 22,15,956, of which about one-quarter was spent by civil officers. The areas charged as irrigated by these small works in 1901-02 aggregated 3,334,518 acres, or more than all the Major Works in the Presidency taken together, compared with 3,111,002, 3,144,652 and 3,380,392 averages of previous triennia, and the revenue derived therefrom amounted to Rs. 85,38,570, the figure for the previous year being Rs. 79,85,620.

19. The following table summarizes the results of irrigation for all India during 1901-02 and compares them with those of the two previous years :

(a) Percentages calculated on works of classes I, II and III.

The total area fell little short of 20 million acres and is the largest on record, while the value of the crops raised by the works for which capital accounts are kept is estimated at nearly Rs. 42 crores, or nearly 95 per cent. of the capital outlay expended on them.

Accompaniment to Public Works Department Review No. 1213 C. W.—I., dated 10th September 1903.

**Note by R. N. Burn, Esq., Accountant General, Public Works Department,
upon the accounts of Revenue and Expenditure of Irrigation Works in
India for 1901-1902.**

(The figures in the statements embodied in this note are taken from the Finance and Revenue Accounts of the Government of India, Administrative Accounts of the Public Works Department, and the statement of financial results of Irrigation operations in India.)

1. Irrigation Works in India are divided into Major and Minor Works; Major Works being further sub-divided into Productive or those which are expected to pay the cost of upkeep as well as interest on Capital outlay, and Protective, which are calculated to guard against a probable future expenditure in relief of distress. For the purposes of this note Minor Works are sub-divided into—

- (a) Works for which Capital and Revenue Accounts are kept.
- (b) Works for which Capital Accounts are not kept.

Works for which Capital and Revenue Accounts are kept.

2. The general financial result of all works—both Irrigation and Navigation—for which Capital and Revenue Accounts are kept is as follows:—

	Productive works.	Protective works.	Minor works.	TOTAL.
	Rs.	Rs.	Rs.	Rs.
CAPITAL OUTLAY—				
During 1901-1902	86,07,157	5,77,820	6,68,453	98,52,530
To end of 1901-1902	35,89,58,787	2,30,30,975	5,64,83,458	43,84,73,220

„ „ 1899-1900	6.72	2.41	3.74	6.10

* N.B.—This is not the difference between the capital outlay to end of 1901-1902 and that to end of 1900-1901, due to transfers of works between works for which Capital and Revenue Accounts are kept and works for which neither Capital nor Revenue Accounts are kept.

PRODUCTIVE WORKS.

3. There are 42 works so classed, one of which, the Hijili Tidal Canal in Bengal, is a purely navigation work. Of these 42 canals, four were not open by the end of 1901-1902, and thirteen, amongst which are all the canals in Bengal and in the Deccan and Gujarat, have failed to fulfil the conditions of productive works.

4. The capital invested on the productive works at the end of 1901-1902 amounted to Rs. 35,32,58,787, and the net revenue during that year to Rs. 2,37,80,490, or a return of 6.72 per cent. on the capital outlay, against 7.09 per cent. in the previous year. The decrease is due to a falling-off of the revenue in the United Provinces where seasonable rainfall reduced the area irrigated during the *rabi* season of 1900-1901, the realizations on account of which are included in the receipts for 1901-1902. This decrease was partly compensated by an increase in the area irrigated during the same *rabi* season by the Chenab Canal in the Punjab and by the year 1901-1902 being favourable for canal irrigation in Madras.

5. The projects noted in the margin were not opened for irrigation during 1901-1902.

Mandalay Canal. Shwebo Canal.	Naerat Canal. Naulakbi Canal.	The Jhelum Canal was opened during the year, but no revenue was realized from it. When these projects are completed and the irrigation from them and other canals is fully developed, the net profit from productive works may be expected to show a considerable increase.
----------------------------------	----------------------------------	---

6. At the end of 1901-1902 there were 34,940 miles of open productive irrigation canals, an increase of 566 over the mileage open at end of the previous year. This increase is due to the opening of the Jhelum Canal in the Punjab, of the Dad Canal and Mahiwah Project in Sind, and to additions to open works. The acreage irrigated during 1901-1902 amounted to 11,297,331 acres, an increase of 714,216 over that of the previous year. This is made up of increases of 124,855, 597,912, 63,530, and 7,574 in Bengal, the United Provinces, Madras, and Bombay, respectively, and a decrease of 79,715 in the Punjab.

7. Statements I and II show in detail the financial results of individual productive works and the gross revenue, the irrigated area and the mileage open. It will be seen from Statement No. I that, after paying interest on capital, the highest net profit was obtained from the projects in the Punjab. Next follow Madras, the United Provinces, and Sind.

PROTECTIVE WORKS.

8. As the term implies, canals so classed are constructed on a consideration of the protection they give against famine, without any expectation of a return sufficient to pay interest and working expenses. There are eleven canals so classed, five of which are still under construction; and of the eleven, six are located in the Deccan and Gujarat.

The capital expenditure on these eleven canals to the end of 1901-1902 amounted to Rs. 2,30,30,975 or to Rs. 2,12,56,573 if the expenditure on unopened works and on the Gokak Canal is deducted. These opened canals gave a net revenue of Rs. 5,89,146, of which the Swat River Canal in the North-West Frontier Province accounted for Rs. 4,07,305 and the Nira Canal in Bombay Rs. 1,69,736, the former canal having repaid the maintenance and interest charges of the year and return a net profit of Rs. 2,47,686 equal to 5.99 per cent. on the capital invested in it.

9. At the end of the year there were 1,359 miles of open protective canals, or 12 miles more than what were in operation at the end of the previous year. The area irrigated during the year amounted to 351,293 acres, 157,829 of which were irrigated by the Swat River Canal. The acreage irrigated during the year was in excess of that irrigated in 1900-1901 by 11,878 acres, the increase being due chiefly to the area irrigated by the Betwa Canal in the United Provinces being 15,507 acres more than in the previous year.

10. Statements III and IV show in detail the financial results of individual protective works, and the gross revenue, the irrigated area and the mileage open of each.

MINOR WORKS.

Works for which Capital and Revenue Accounts are kept.

11. There are 82 works so classed, 33 of which are in Bombay and 29 in Madras. Of these 82 works, six are for navigation, four in Madras and two in Bengal.

12. On the irrigation works alone the capital outlay to end of 1901-1902 amounted to Rs. 3,55,96,336, and the net revenue during that year to Rs. 32,11,833, or a return of 8.95 per cent. on the capital invested. This favourable result is contributed to chiefly by the canals in Burma, the Punjab, and Sind; the Ghar Canal in Sind alone gave a return of 107.62 per cent.

13. During 1901-1902 these Minor Irrigation Works irrigated 2,428,375 acres, a decrease of 197,081 or 7.51 per cent. on the area irrigated during the previous year.

14. The capital outlay to end of 1901-1902 on the six navigation canals amounted to Rs. 2,05,87,122, and the net return during the year to Rs. 79,862. The whole of this was brought in by the Calcutta and eastern canals, which gave a return of 1.77 per cent. on the capital invested in them. All the other navigation canals worked at a loss.

15. Statements V and VI show the financial result, the gross revenue, the irrigated area and the open mileage of individual minor works.

Works for which Capital Accounts are not kept.

16. Works so classed are all small works, many of which were constructed at the time of the native rule in India. No detailed accounts of these works are kept, and the enhanced land revenue due to them is assessed and collected along with the ordinary land revenue and accounted for in the Civil Accounts.

17. The following statement shows the receipts and expenditure on these works, and compares the transactions of the year 1901-1902 with those of the previous four years:—

18. The introduction of water-rates on the Chenab Inundation Canals in the Punjab, which were formerly worked by cher labour, accounted for the greater part of the increase of Rs. 1,17,229 in the receipts during 1901-1902. The increase of Rs. 3,68,385 in the expenditure of the year occurred chiefly in Burma (Rs. 2,48,260), the Punjab (Rs. 1,23,072), and Madras (Rs. 57,585). The increase in Burma was due to much larger expenditure on remodeling canals in the Kyaukse District and on additional works for Myaungyan-Minhla Tank and Salim Canal Project; that in the Punjab to the abolition of the Zarinagha Fund of the Chenab Inundation Canal series, and the transfer of that series to this head; and that in Madras to larger grants having been made available for expenditure on agricultural works, as well as to the execution of certain urgent works in the Livi Islands in the Kistna District. Bombay was the only province in which the expenditure was less (Rs. 87,793) than that of the previous year, and this was due to fewer debits to this head of the normal value of famine relief work.

General.

19. During the year 1901-1902 surveys and investigations were carried out to a considerable extent throughout India, under the orders contained in Government of India, Revenue and Agricultural Department, Resolution No. 3—61-1-P., dated 13th March 1901, with the object of obtaining information to place before the Commission appointed to enquire into the

20. The general result of irrigation works for which Capital and Revenue Accounts are kept is brought out in Statement VII. At the end of 1901-1902 the State had spent on capital outlay Rs. 41,02,70,944, and during the year received a net revenue of Rs. 2,75,63,489 equivalent to 6.72 per cent. on the capital invested. The area irrigated and protected amounted to 14,076,999 acres, or 21,995 square miles.

GOVERNMENT OF INDIA.
FINANCE AND COMMERCE DEPARTMENT.

REPORT UPON THE OPERATIONS OF THE PAPER CURRENCY DEPARTMENT
DURING THE YEARS 1902-03.

No. 141, dated Calcutta, the 31st July 1903.

From—The Officiating Head Commissioner of Paper Currency, Calcutta,

To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to submit a report upon the operations of the Paper Currency Department during the year 1902-03.

2. Mr. Cox was Head Commissioner throughout the year until the last few days of March when he was succeeded by Mr. Barrow. In Bombay Mr. Barrow held charge as Commissioner from April to August 1902 and again from November 1902 to March 1903 when he was succeeded by Mr. Branson. Mr. Brigstocke held charge from August to November. In Madras Mr. Crawley was Commissioner throughout the year except for the first few days of April when Mr. Dobbie was in charge. In Burma Mr. Hamilton was Commissioner from April to December when he was succeeded by Mr. Keene. At Allahabad and Lahore respectively Messrs. Harrison and Gamble were Deputy Commissioners throughout the year. Officers in charge.

3. Excluding the value of notes which, though they had been paid off at some office, had not yet been returned for cancellation to their offices of issue, the gross note circulation rose from 31.66 lakhs on the 1st April 1902 to 35.72 lakhs on the 31st March 1903, which was not only the maximum circulation for the year, but is the largest gross circulation ever recorded. The average gross circulation 33.74 was also the highest on record. This result was due partly to the high Government balances in the Treasuries and Reserve Treasuries which rose to over 18 crores in June and July 1902 and again at the end of March 1903, partly to the heavy balances held during the slack season and again at the close of the busy season by the Presidency Banks, and partly to an actual increase in the active circulation in the hands of the people. These causes of increase are to a large extent due to a year of general prosperity. Thus on the one hand there was a large surplus in the Treasuries owing to heavy revenue collections, and on the other hand a superabundance of loanable capital accompanied by a very small Government loan which only took a portion of the capital from the market, led to an accumulation of funds in the hands of the Presidency Banks. These surplus funds are usually held by the Banks in the form of Currency notes (as they deposit their coin when the demand is slack in the currency reserve) and go to increase the circulation figure. At the same time the Presidency Banks' balances were not extraordinarily high during the slack season in the year under report, although higher than of recent years. It was the high minimum balances held by them during the year which was most noticeable. The marginal figures show the maximum and minimum balances held by the Presidency Banks in notes during the past few years. The maximum balances were in the year under report held as usual in the months of August and September and again in the month of November. In the Government Treasuries, on the other hand, the amount held in notes rose to its maximum in June and July and fell as usual to a minimum in November and December. The gross circulation of Currency notes.

4. While the gross circulation depends on a variety of factors as indicated above the active circulation, which means the circulation in the actual hands of the public after deducting the amount held in the Treasuries and Presidency Banks from the total gross circulation, although it is of course greatly affected by general conditions of prosperity, depends also largely on the public taste and education and is the only true indication of how far Government Currency notes are actually increasing in popularity among the people. The active circulation.

5. The *active* note circulation worked out in the manner indicated above is given below for the last three years in lakhs of rupees :

6. The rise in active circulation in the past year has been very marked, and it will be seen that the figures of recent years, although the increase is not extraordinary, show a steady tendency upwards and indicate that there is a gradual but important increase in the use of notes by the public. The marginal figures give the active circulation for the past 10 years in lakhs. The average of the first five of these years is 19,07 only, while the average of the last five is 21,42.

7. The variations in the gross circulation of Currency notes are in the following statement distributed among the various circles in thousands of rupees :—

All the circles except Calicut have shared in the increase, the largest contribution having been made by Bombay, where the increase was chiefly in notes of Rs. 5, Rs. 10, Rs. 50 and Rs. 100. In Calcutta the rise was chiefly in notes of Rs. 10 and Madras shows a considerable increase in all the lower values.

9. It is not possible to bring out for each circle the active circulation by the method employed in paragraph 5, in respect of the circulation for all India, because both Treasuries and Presidency Banks hold notes issued in circles other than their own. The Reserve Treasuries, however, hold practically the whole of their balances in home-circle notes, and in the following table the circulation is accordingly reduced by the note balances of the Reserve Treasuries, and is compared with the corresponding figures for the two preceding years in lakhs of rupees :—

11. Dividing the gross circulation between notes of Rs500 and upwards, and notes below Rs500, the values at the end of each of the last three years have been in thousands of rupees :—

Each Circle still adheres to its preference for particular denominations. But ₹10 notes show a falling off compared with those of other denominations, and this follows a smaller falling off last year. Rupees 100 notes have, on the other hand, regained their popularity.

For several years up to 1897-98 the average value shown in this table went on decreasing, but the averages on 31st March 1899, 1900 and 1901 showed small increases for all India. A decrease followed last year which has now been partially recovered.

The net receipts from the public were thus over three and one-third millions sterling, of which the whole came in between October 1902 and March 1903 during the busy export season. During the rest of the year, the payments to the public exceeded the receipts. It will be observed that the balance of the Gold Reserve Fund held in gold in India was *nil* on the 31st March last. This was due to the whole amount transferred to the Fund in India during the year having been remitted to England through the medium of Council Bills. The balance of the Gold Reserve Fund held in England at the end of the year was £3,810,331, which was all invested in 2½ per cent. Consolidated Stock (Consols) (now 2½ per cent. Consolidated Stock) of the nominal value of £4,052,561.

The details of the gold held in India on the last day of the year are as follows :—

On the corresponding date in 1902 the silver coin balance amounted to ₹11,15,54,180, and the gold coin and bullion to ₹10,53,58,819. There has, therefore, been a decrease in the silver coin balance, while the gold balance has risen to the very high figure of over 14½ crores. This was due to large importations of gold in the months of December 1902 to March 1903. In view of this large importation of gold and the decreasing stock of silver coin, it was decided at the end of February to purchase about ₹45 lakhs worth of silver in London so as to be prepared for the coinage of rupees, should circumstances require it. No portion of the silver so purchased, however, reached India in time to be coined into rupees during the year under report.

17. The half-yearly verifications of the Currency balances on the 30th September 1902 and 31st March 1903 were held for all Circles and Sub-circles, the balances being verified, in accordance with the orders issued on the subject, by a gazetted officer unconnected with the Currency Department.

18. The nominal value of the investment stood, as at the close of the previous year, at ₹10,20,81,500, which is held at a book-value of ₹9,99,99,945-10-0. Of the nominal value, ₹8,15,95,000 consist of 3½ per cent. and ₹2,04,86,500 of 3 per cent. securities. The interest realised and credited under the head "Profits on Note Circulation" during the year is ₹34,70,420, of which ₹28,55,825 is the amount realised on 3½ per cent. investments and ₹6,14,595 on the 3 per cent. portion.

The issues of notes over the Counter were greater than those of the previous year by 13,83 lakhs and the receipts by 10,06 lakhs. The transactions between Head Office and Agencies were more by 3 lakhs odd in the case of issues and by 6 lakhs odd in the case of receipts. These transactions vary with the amount of telegraphic transfers made between Treasury and Currency for Resource purposes.

The total issues and receipts for the last three years are as follows :—

The issues have increased by about 16,67 lakhs and the receipts by 13,79 lakhs as compared with the previous year, the difference being made up as follows :—

The following table gives the circulation of the six larger circles, and the mean value of their receipts and issues during the year, with the percentage of the former to the latter during the last three years. As usual the transactions in Burma are very high, compared with the average circulation because of the larger operations there during about three months of each year in connection with export of rice :—

The total encashments of Foreign Circle Notes exceeded those of the last year by over 14 lakhs. The increase being the net result of an increase of 1,43 lakhs at Calcutta against decreases of 43 lakhs at Allahabad, 23 lakhs at Lahore, 12 lakhs at Bombay, 46 lakhs at Karachi, and 5 lakhs at Madras. The chief feature of the year was, besides the large numbers of Foreign Circle Notes of all circles except Rangoon cashed at Calcutta, the falling off in the encashment of Calcutta notes at Allahabad and Lahore and of Bombay and Calcutta notes at Karachi. The Karachi notes cashed at Bombay, on the other hand, increased while there was a large decrease in the Rangoon Notes cashed at Calcutta. The cause of these variations is to be found in the varying trade demand in various years which leads to the transfer of funds from those provinces in which trade is comparatively dull to those in which it is brisk. The following statement shows in lakhs of rupees the net transfers by means of Foreign Circle Notes between each of the circles during the last two years. The plus figures indicate that transfers to the circle exceeded those from it, and the minus figures represent an opposite movement:—

The net result was an increase in the coin reserve of 4,06 lakhs. This increase exactly corresponds with the increase in the circulation, there having been no addition to the investment of the reserve during the year. The receipts and issues were less than those of the previous year by 2,07 lakhs and 4,34 lakhs, respectively, the difference being made up as follows :—

There has been a further large diminution in the amounts of shroff-marked coin received as such in the United Provinces and Punjab. This is due mainly to coins of the issue of 1840 bearing shroff-marks being now included in column 5 of the statement as explained in last year's report; and the low figures in column 2 seem to indicate that the practice of shroff-marking is still confined for the most part to the coins of the older mintages. The total amounts of 1835 coins withdrawn to the end of the year is about 2,30 lakhs, and that of 1840 coins 9,85 lakhs. Mr. Harrison's estimate

of the total amount of 1840 coins to be recovered is about 23 crores.

It will be observed that the above figures show a considerable decrease from those of last year under the heading of "Coins reduced by reasonable wear" and the total amount of reduced coins is also considerably less, but as a matter of fact there is some doubt whether these figures are correctly compiled. Moreover, since the alteration in our rules which was effected in 1899, whereby light weight coins are received after cutting at various rates according to the amount of weight which they have lost, the headings of this return should, I think, no longer stand as they do at present. Under the new rules coins believed to have been reduced otherwise than by reasonable wear need no longer be rejected by Treasuries, but can be paid for at the fixed rates unless the deficiency in weight amounts to more than 25 per cent. The returns should therefore no longer distinguish between coins reduced by wear and otherwise than by wear. It is not quite possible for the Treasuries to so distinguish them accurately, and even if they could accurately distinguish them, there is, I think, not sufficient object in any longer showing them as they have been shown hitherto. It will be more useful to show the coins received on payment under the new rules separately from those which are rejected, because they have lost more than 25 per cent. in weight. The latter will be very few in number, but a comparison of the figures shown under the former head with similar figures for previous years will give a fair indication of how far our coins are sweated or otherwise illegally reduced. It is therefore proposed to adopt the plan I have indicated in future. It was not possible to do this for the year under notice, as the returns had not been prepared on that basis.

age.

28. With regard to counterfeit coins the figures in the margin give the usual statistics for the past ten years. They indicate a further increase in the number of counterfeits discovered in the Treasuries and Currency offices in course of examination of coin received by them. It is, however, doubtful how far the increase is a true one, as it is uncertain how far it is due to the alteration in the rules regarding the remittance to Treasuries and the record of counterfeits discovered on Railways which was introduced in 1901. Thus the figures for 1901 and 1902 as given in the marginal table include respectively about ₹11,000 and ₹22,000 of counterfeits found in the traffic earnings of the Indian Railways, complete statistics of which are now separately furnished by the Railway authorities concerned. Before the alteration of the rules it is quite possible that many of the counterfeits found on Railways escaped record, and this seems more probable from the fact that the number recovered doubled in the year under notice, the rule being for the first time in force for a whole year in 1902 and only having been in force for half a year in 1901. It will not be until next year when the figures of two complete years during which the rules were the same can be compared that we shall be able to arrive at a definite conclusion as to how much of this increase shown is real and how much merely apparent. From the figures given it will be seen that more than one-third of the total number of counterfeits cut and broken during the year was found in the earnings of Railways and of this about 30 per cent. were detected in the earnings of the North Western Railway alone, which indicates that counterfeiting is largely prevalent in the Punjab. The number of counterfeits received at the mints for examination during the year was 1,720, of which 79 only were struck from dies and all the rest were castings.

29. In paragraph 28 of last year's report a table was given showing the experience of the several Currency offices as regards the proportion of counterfeits discovered in remittances of coin received by them, and it was observed that the wide variations in the statistics of the different offices apparently indicated laxity in the examination of coin in some of the offices. I thought it therefore desirable to undertake an experiment with the object of

arriving at some idea of the true amount of counterfeits in the circulation and of what the percentage of error is in the examination of coin received over the counter at the different offices. Of course this experiment could not, in the time at disposal, be made very far-reaching, but it might be continued in future years and the results can be corrected when a sufficiently large amount of coin has been tested.

The five principal Currency offices in India proper were accordingly asked to accumulate a portion of their receipts over the counter and after recording the number of counterfeits found therein to send them to the Mints for examination. The following statement gives the result of the experiment :—

1	2	3	4
Currency office.	No. of coins examined.	Total number of counterfeits detected during examination.	PROPORTION OF COUNTERFEITS PER LAKH.
Calcutta	10,00,497	166	16.592
Allahabad	3,63,000	55	15.151
Lahore	3,50,000	56	16.000
Bombay	10,29,024	153	14.868
Madras	1,52,000	40	26.316

The figures above do not apparently support the view expressed in paragraph 28, to the effect that counterfeiting is unusually prevalent in the Punjab, but it was noticed at the Mint that a large portion of the coin sent from Lahore for examination was of very recent mintages, probably owing to new coin being more largely in circulation at Lahore at the time. This new coin would naturally contain a smaller proportion of counterfeits, as it has been found by experience that the older issues are the most largely counterfeited. The total percentage of counterfeits found was highest at Madras. Leaving the latter out of account, it would seem that the number of counterfeits per lakh is about 15, the differences in all provinces except Madras being slight. The high percentage in Madras may have been accidental, the amount examined being very small. It will be interesting to see if similar results are arrived at next year.

31. The total rupee coinage of the year amounted to 11,27 lakhs, of which 5,13 lakhs were coined at Calcutta and 6,14 lakhs at Bombay. The coinage at Calcutta was made entirely from withdrawn Government rupees. The receipts of the Bombay Mint consisted of 3,46 lakhs of silver obtained from Native States (Indore coins, 7 lakhs of silver received as fee for coining British dollars and 2,61 lakhs of silver from withdrawn Government rupees. The net profit on the coinage of rupees available for transfer to the Gold Reserve Fund amounted to about 39½ lakhs of rupees, and nearly the whole of this was paid to the Fund and invested in Sterling Securities.

agencies. 34. The Currency Agencies in all Provinces except the Punjab and at Mandalay in Burma are strictly Currency chests opened for resource purposes, whereas at the Agencies proper exchanges with the public take place. The chests permit of the transfer of Treasury funds from one place to another without actual movement of coin and thus supply a very speedy means of withdrawing Treasury surpluses to head-quarters. On 31st March 1903 the number of Currency chests was 148, and they contained balances amounting to 4,20 lakhs or 50 lakhs less than on the corresponding date in the previous year. The decrease was due to a necessity for greater concentration of coin at the Presidency towns in the last three months of the year in view of the large importations of gold mentioned in para. 16 above.

The following table distributes the totals in details of Agencies :—

The increase as compared with the previous year occurs under half notes lost by accident and under mutilated notes. Notes lost by theft are not included in the above statement as no claim lies against the Department on their account. Up to 1881 lost notes of all denominations were permitted to be *stopped*, that is to say, they were entered in a list kept in every Currency office, and when presented for payment, the presenter, if not known, was pointed out to the Police who were told the circumstances connected with the note. The growth of the stopped list had in 1881 become so great that the exchange business with the public was greatly impeded and it became necessary to limit stoppages to notes of Rs 50 and upwards. Twenty years' further growth of the reduced lists once more produced serious embarrassment in the counter work of the busier offices, and some further limitation has consequently been introduced. The number of stopped notes of the Calcutta Circle now outstanding in the Revised list is 987. The list is reprinted weekly and copies sent to all other Circles, which similarly send copies of their lists to Calcutta. During the year the Calcutta office cashed 338 stopped notes, of which 311 were handed over to the Police for investigation. There were six prosecutions in connection with these, of which one only resulted in a conviction. With regard to wholly destroyed notes, where evidence is produced of the destruction of a note, payment of its value is not made until after 20 years, but its value is invested and the accumulated interest is paid to the owner together with the value of the note. The number of notes and the amount of such investments ordered to be made during the past three years is given below :—

forgeries.

36. The forged notes presented during the year have been the following:—

There were three new forgeries during the year. One is of R20 notes of the Karachi Circle bearing the serial number $\frac{G}{29}$; the second is of the Bombay Circle R5 notes of the C. A. series with varying numbers, and the third belongs to the Rangoon Circle R100 notes bearing the serial number $\frac{Q. A.}{23}$. The forgery of the Karachi Circle R20 notes is, on the whole, a good one, the colouring being good and the water mark imitated by an impression, but the figures are somewhat irregular. The forgery of the Bombay Circle notes for R5 is a mere pen-and-ink drawing and looks very clumsy. Besides these, a note of the forgery of the Bombay Circle R100 notes with the serial number $\frac{C.}{8}$, which was discovered prior to 1865, made its appearance. The forgery is but a poor imitation not likely to deceive any body at all accustomed to deal with notes.

The Rangoon forgery is a clumsy imitation. Further specimens of the forgery of Calcutta Circle, R10 notes referred to in last year's report, appeared during the year. These had new and varying serial numbers. The total number presented was not, however, very large.

Three cases of forgery were tried, two are still under trial and one is under enquiry in the Calcutta Circle. Two of the three completed cases ended in convictions and sentences of various terms and one in an acquittal. At Allahabad there were three prosecutions for passing notes for R1,000 bearing the serial number $\frac{X.}{41}$, and one for uttering R10 notes of the $\frac{L. A.}{45}$ series, both purporting to be of the Calcutta Circle. In all these cases the accused were sentenced to rigorous imprisonment except in the last in which there was an acquittal for want of evidence. There is another case still under trial for passing a note of R1,000 of the Calcutta Circle $\frac{X.}{41}$ series. In Bombay a case in connection with a R1,000 note of the $\frac{D.}{41}$ series which occurred in 1900-01 was tried and a conviction was secured. At Rangoon a man was convicted and sentenced to 5 years' rigorous imprisonment for possessing forged notes of the $\frac{Q. A.}{23}$ series for R100. There were no prosecutions elsewhere, and nothing remarkable about the forgeries. The past year has been a successful one in the matter of criminal prosecutions for offences of this nature.

fraudulent claims.

37. Most of the fraudulent claims, made upon the Currency Department during the year, were of the usual kind, in which pre-enters of half notes falsely declared that they had recently lost the corresponding halves although the latter had already been deposited with the Currency Department by other claimants. In Bombay a case occurred in which a portion of a right half of a note was presented on the allegation that the other half had been eaten up by rats, but the left half having already been presented by another claimant, who stated that he had torn and thrown away the right half by mistake, the presenter of the torn right half was prosecuted and sentenced to one day's simple imprisonment with fine or 3 months' rigorous imprisonment in default. In another case in Bombay a conviction for criminal misappropriation was secured by one claimant on a half note against a counter claimant who presented the other half with a false story regarding the loss of the first half. In Bombay and Calcutta two cases remained under enquiry at the end of the year. At Allahabad a conviction has been secured in a case in which the allegation that certain notes had been destroyed by fire turned out to be false, as one of them was subsequently presented by another man. There is another case under trial in which it was discovered that all the notes had already been cancelled by the Currency office. The District Magistrate of Coorg convicted a man for making a false claim on a half note of the Calicut Sub-Circle, the sentence being a fine of R40 with three months' rigorous imprisonment in default. On the whole, the prosecutions for fraud have ended successfully.

38. Another fraudulently altered note for R100 of the kind referred to in paragraph 38 of last year's report was paid during the year at the Ajmer Treasury. The original claimant has been asked to refund this amount also.

As in the previous year, the remittances were mainly connected with the seasonal demands in the various Provinces, and with the withdrawal and replacement of the 1840 rupees. The special features of the year were—(1) Large remittances amounting in all to about a crore made to Delhi to meet the heavy coin demands in connection with the Coronation Durbar, and (2)—Remittances aggregating 1,65 lakhs from Calcutta to Rangoon to meet an unprecedentedly heavy demand for the Rice trade.

40. It was stated in paragraph 51 of last year's report that on the 31st March 1902 all the Provinces were fairly well supplied with rupees. Consequently, the only important remittances that had to be made during the first quarter to Upper India to meet the demands in connection with the opium payments and the export trade consisted of a supply of 75 lakhs from Calcutta and Ajmer to Allahabad and its Agencies, and of 20 lakhs from Ajmer, and Sambhar to Delhi and Umballa. As 32 lakhs of withdrawn coin were remitted to the Calcutta Mint from the United Provinces and Punjab during the quarter, the net supply of rupees amounted to 63 lakhs only against 2,32 lakhs supplied in the previous year.

41. In the second quarter demands spring up at Calcutta in connection with the jute trade and it was found possible to meet these demands by the recoinage at the Calcutta Mint of withdrawn 1840 rupees, 1,21 lakhs of which were received from Upper India, 26 lakhs from Bengal, and 10 lakhs from Burma and Madras. The only important remittance made during the quarter was one of 18 lakhs from Ajmer to the Lahore Agencies at Delhi and Umballa.

42. In the third quarter, Delhi was further supplied with 44 lakhs from Ajmer and the Allahabad Agencies; and a remittance of 40 lakhs had to be made from Bombay to Karachi, the exports of wheat and wheat-flour from this port during the quarter amounting to over a crore of rupees against 60 lakhs in the corresponding period of the previous year.

43. In January 1903 Delhi had again to be supplied with 40 lakhs of rupees from Currency Agencies in the United Provinces to meet requirements in connection with the Coronation Durbar. Heavy remittances amounting to 1,65 lakhs were also, as stated above, made to Rangoon from Calcutta to meet the demands in connection with the rice trade which were unprecedentedly large owing to an early and a fairly good crop and an exceptional demand for the Far East in consequence of the failure of crops in Japan and Southern China. The demands were indeed so heavy that the transfers obtained from Calcutta on Rangoon, Akyab and Moulmein amounted to nearly 7 crores, while the maximum amount drawn in any previous year was 4½ crores. To enable the Calcutta Currency office to meet the Rangoon requirements, 1,20 lakhs of surplus rupees were withdrawn from the Bengal Treasuries and chests, and the accumulations of withdrawn coins in Upper India and Bengal amounting to about 70 lakhs were moved to Calcutta for prompt recoinage. A remittance of 50 lakhs was also made during this quarter from Madras Agencies to Bombay to meet the demands in connection with a brisk export trade in cotton and seeds; and in March 1903, 26 lakhs were sent from Calcutta to Allahabad to strengthen the stock of rupees in the United Provinces, in view of the heavy coin requirements in the next two months.

44. The important Treasury remittances of the year consisted of the removal to the Mints at Calcutta and Bombay of the 1840 coins withdrawn from circulation in the various Provinces. 90 lakhs of surplus rupees were also remitted during the year from the Bengal Treasuries to Calcutta, about two-thirds being withdrawn in the last three months to replenish the reserve which was being rapidly reduced owing to the abnormal demand for rupees to finance the Burma rice trade.

The net exports of merchandise during the year were about 7 crores more than in the previous year, and there was a considerable increase in the net exports of rupees chiefly in the last three months to meet demands for currency in Ceylon. The result was a net absorption of rupees, during the year, of 2 lakhs against a net return from circulation of 68 lakhs in the previous year. Burma absorbed the large sum of about 2 crores, the exports of rice from the Province amounting to over 13 crores against 8½ crores in the previous year. In Bombay, the net absorption during the year was considerably less than in the previous year, probably owing to a return from circulation of coins issued in the famine years. In the Punjab, there was a considerable decrease in the net absorption as compared with the previous year, owing to an unfavourable wheat and a poor rape-seed crop, the slackness in the trade demand more than counterbalancing the increased consumption in connection with the Coronation Durbar. In Madras, the large increase in the export trade in cotton led to a considerable decrease in the net amount returned from circulation in that Province.

47. In the first quarter there was a net absorption of 72 lakhs in the Punjab in connection with the traffic in grains and seeds, and of 48 lakhs in Madras to finance the brisk export trade in cotton and seeds. There was, however, a large return from circulation in Bengal in connection with the heavy revenue collections and the increased imports of piece-goods, and also in Bombay, owing to a great diminution in the arrivals of cotton from the districts; on the whole there was during the quarter a net return from circulation of over 3 crores of rupees.

48. In the second quarter, the jute demands in Bengal resulted in a net issue of 2,14 lakhs; but large withdrawals from circulation took place in the Punjab and Bombay owing to a great falling off in the export trade in seeds, and Burma gave up 58 lakhs out of the total absorbed in the previous rice season.

49. In the third quarter, there was a considerable absorption of rupees in the Punjab, apparently in connection with the Coronation Durbar and the Military Manœuvres that accompanied it, and the trade demands in Bombay in connection with the export of cotton, grain and seeds led to a large absorption of 4 crores in that Presidency in the last six months of the year.

50. The net issues of rupees from the Rangoon Currency Office during the rice season in the last quarter of the year was 5,27 lakhs which is the highest on record. A considerable portion of the issues, however, came back to Treasuries as revenue, leaving only 2,60 lakhs in circulation; and large withdrawals of coin also took place during this quarter in connection with the revenue collections in Bengal and Madras.

53. The total Treasury transactions in notes during the three years are shown below in lakhs of rupees:—

54. The following statement gives information as to the ability of Treasuries to cash notes during the past three years:—

	1900-01.	1901-02.	1902-03.
	Number of Treasuries.		
Where encashment of notes was not refused on any day in the year	128	157	163
Where encashment was rarely refused	72	55	50
Where encashment was generally refused	25	16	16
TOTAL	225	228	229

• Treasuries at branches of the Presidency Banks are excluded from this statement. It is not to be understood from the above figures that a majority of Treasuries could have cashed large values of notes, but merely that they did so in the case of small quantities presented by the ordinary non-trading public. Traders knowing that it would be useless to ask for large sums in silver in exchange for notes do not make the attempt.

• 55. Statement VI in the Appendix shows the proportions of Treasury and Bank balances which in each Province were held in the form of Currency Notes. Excluding Reserve Treasuries the percentage of balances held in notes was:—

	1901 Balance in		1902 Balance in		Percentage of notes.	
	Notes.	Cash.	Notes.	Cash.	1901.	1902
	In thousands of rupees.				Per cent.	
Calcutta Circle	45,15	1,19,15	40,76	1,05,85	27	27
Bombay „	23,46	75,05	21,92	76,89	24	22
Madras „	14,26	75,39	14,49	67,97	16	17

56. The figures of receipts and expenditure in Statement IV of the Appendix are only approximate as the accounts of 1902-1903 are not yet closed. The charges of the year are less than those of 1901-1902 by Rs. 3,34,000, as the cost of the late Agra Bank building was included in the figures of that year and are more than those of 1900-1901 by Rs. 1,42,000, chiefly owing to increases in the cost of note forms and cost of repairs, etc., to Currency buildings. One important item of expenditure, which has recently been sanctioned and which will fall probably to a large extent in the accounts of the current year, is the extension of the Currency Office, Bombay, where the accommodation has, for some years, been found insufficient. Plans of the new building have been drawn up and the land for the same is now being acquired. An increase in the establishment of some of the Currency Offices rendered necessary by the expansion of work has also been recently partially or wholly sanctioned.

57. There was one important measure of legislation carried out during the year under report whereby the existing law on the subject of encashment of Currency Notes as contained in Act XX of 1882 was so far modified (by Act VI of 1903) as to permit the encashment of Rs. 5 notes of any circle of issue except Rangoon at all Currency circle offices (except Rangoon) and made such notes legal tender everywhere in India except in Burma.

• In connection with this amendment of the law it is proposed to issue a universal five-rupee note in a slightly altered form and of a slightly larger size. The new note is now under preparation in England.

date and amend the Law relating to the Extradition and Rendition of Criminals was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

2. We have suggested considerable alterations in

the form of the Bill, having re-arranged its main provisions under different Chapters relating respectively to (1) fugitive criminals in the case of Foreign States, *i.e.*, States to which the provisions of the Extradition Acts, 1870 and 1873, apply; (2) fugitive criminals in the case of States other than Foreign States; and (3) fugitive offenders in His Majesty's dominions.

With regard to (1), these fugitive criminals are dealt with in Chapter II of our revised Bill, which we propose should be declared, by means of an Order in Council to be issued under section 18 of the Extradition Act, 1870, to have effect as if it were part of that Act. In this Chapter, which is intended to substitute an Indian procedure for that contained in sections 7 to 12 of the Extradition Act, 1870, we have included the substance of clauses 3, 4 and 10 of the Bill as introduced with such modifications and with the addition of such further provisions as seem to us to be necessary in order to make the Chapter a sufficiently complete reproduction of the provisions of the Statute which it is designed to replace.

As to (2), Chapter III of the Bill as revised by us is generally speaking a reproduction of the provisions of clauses 3 to 6 and clauses 8 to 13 of the Bill as introduced, with such modifications as have been suggested to us by the criticisms contained in the papers.

Lastly, as to (3), Chapter IV of our revised Bill represents clause 15 of the Bill as introduced. This Chapter also requires, in our opinion, to be confirmed by an Order in Council, to be issued under section 32 of the Fugitive Offenders Act, 1881, directing that it shall take effect as if it were part of that Act.

The remaining Chapters V, VI and VII of our revised Bill deal respectively with crimes committed at sea (clause 7 of the Bill as introduced), execution of commissions issued by Criminal Courts outside British India (clause 14 of the Bill as introduced), and supplemental matters, including rules and repeals (clauses 16 and 18 of the Bill as introduced).

3. With reference to the details of our revised Bill, we would call attention to the following points :

CHAPTER I.

Clause 2.—We have omitted the definitions of "conviction" and "convicted person" because, as the provisions of the Bill which relate to extradition to Foreign States are to form part of the Extradition Acts, 1870 and 1873, from which these definitions have been taken, the definitions, which have no application save in the case of such States, are no longer necessary. The definition of "Foreign States" is new but requires no explanation.

CHAPTER II.

Throughout the Chapter we have used the expressions "fugitive criminal" and "extradition crime" instead of "the accused" and "extradition offence" in order to attract the definitions in section 26 of the Statute of 1870. We think it better not to attempt to substitute, in connection with cases governed by the Statutes, the equivalent offences under Indian law for the list of crimes contained in those Statutes.

Clause 3, sub-clause (3).—Following the provisions of section 9 of the Extradition Act, 1870, which this sub-clause will represent in this country, we have provided for the Magistrate taking evidence as to whether the crime of which the prisoner is accused or alleged to have been convicted is an offence of a political character as well as to whether it is an "extradition crime."

Clause 3, sub-clause (5).—We have provided in this sub-clause for the taking of bail when a *prima facie* case is not made out in support of a requisition or if the case is one which is bailable under the provisions of the Code of Criminal Procedure, 1898.

Clause 3, sub-clauses (6) and (7).—The provisions made in these sub-clauses for the submission by the fugitive criminal of a written statement for the consideration of the Government and for a reference to the High Court by the Government of any important question of law raised in such written statement (which provisions are reproduced from clause 3, sub-clauses (5) and (6), of the Bill as introduced) are intended as the Indian substitute for the right to apply for a writ of *habeas corpus* given to a fugitive criminal by section 11 of the Statute.

Clause 3, sub-clause (9).—This sub-clause is a reproduction of clause 10 of the Bill as introduced. Having regard to the limited powers of the Indian Legislature, it seems doubtful whether it would be permissible to reproduce the wider provisions of the last paragraph of section 11 of the Statute.

Clause 3, sub-clause (10).—This sub-clause reproduces for India the provisions of section 12 of the Statute, which requires the discharge of a fugitive criminal committed to prison if not surrendered within two months of such committal.

Clause 4.—The object of this clause, which is based on clause 4 of the Bill as introduced, is to provide for the exercise, by Magistrates in India, of the power to issue warrants for the arrest of fugitive criminals of their own motion, which is conferred on Police Magistrates and Justices of the Peace in the United Kingdom by section 8 (2) of the Statute.

Clause 5 is designed to confer on the authorities in British India the power to refuse to order a Magistrate to issue a warrant for the apprehension of a fugitive criminal where the crime is of a political character, and to discharge any fugitive criminal from custody at any time.

Clause 6 is new. Its object is simply to prevent any difficulty being raised as to the construction of the terms "Police Magistrate" and "the Secretary of State" used in section 3 of the Statute of 1870 which will be applicable to proceedings for extradition from India under this Chapter when it becomes law. The clause preserves so much of the Extradition (India) Act, 1895, as is now necessary.

CHAPTER III.

Clause 7.—In order to legalise what we are informed is the common practice of handing over direct to the Native State Court a person who is arrested and conveyed into a Native State in pursuance of a warrant issued by the Political Agent, we have substituted for the words "an officer to be named in the warrant" the words "a person or authority indicated in the warrant", which are, we think, sufficiently wide to cover all possible cases.

Clause 8, sub-clause (3).—As it may not always be convenient that a person re-arrested under a warrant issued by the Magistrate under this sub-clause should be handed over to the "officer named in the bond" as provided in the Bill as introduced, we have enabled the Magistrate to direct in the warrant for re-arrest that he shall be handed over to "any person authorized by the Political Agent to take him into custody."

Clause 9.—In order to meet the case of other than Foreign States we have by this clause applied to such States the provisions of clause 3 of our revised Bill, which were of general application in the Bill as introduced. The clause further makes it a condition [sub-clause (2)] that, where there is a Political Agent in or for any such State, the requisition for the surrender of the accused person must be made through the Agent.

Clause 10.—This clause corresponds to clause 4 of the Bill as introduced. We have limited the power of issuing warrants to Magistrates of the first class or Magistrates empowered by the Local Government in this behalf. We have also in sub-clause (3) conferred power on the Local Government to sanction the detention of an arrested person for more than two months, as it seems to us desirable that it should possess this power in special cases.

Clause 11.—This clause is new. It has been substituted for clause 9 (1) of the Bill as introduced, to which exception has been taken in many quarters. It provides for the surrender of a person accused of, or undergoing sentence for, offences committed in British India to a Native State when such State undertakes to re-surrender such person on the termination of his trial for the offence for which his surrender was asked, but it provides that no such condition shall be deemed to prevent or postpone the execution of a sentence of death.

Sub-clause (2) is designed to meet certain legal difficulties which have been thought to stand in the way of surrender in such cases by providing for the suspension of the British sentence while the accused is under trial in the Native State and for its revival on his re-surrender to the British Government for the portion which was unexpired at the date of his surrender.

Clause 13.—We have extended the operation of this clause, which corresponds to clause 8 (2) of the Bill as introduced, to attempts to commit, as well as abetment, of, offences.

CHAPTER IV.

We have proposed no alteration in this Chapter, which reproduces clause 15 of the Bill as introduced.

CHAPTER V.

We have limited the provisions of this Chapter, which relates to offences committed at sea (clause 7 of the Bill as introduced), to requisitions made by the Governments of States outside India, and we have restricted the exercise of powers under the clause to Magistrates authorized by the Local Government in this behalf.

CHAPTER VI.

We have altered sub-clause (2) of clause 14 of the Bill as introduced, which is reproduced in this Chapter, so as to make it clear that it is only where the evidence is required by a Foreign Court or tribunal outside India that the fact of the offence being of a political character is to be treated as a bar to proceedings under the section. We have also omitted sub-clause (3), as we think that the question whether an offence is of a political character should be left to the decision of the Court.

CHAPTER VII.

Clause 22.—We have omitted sub-head (a) of sub-clause (2) of this clause, which corresponds to clause 16 of the Bill as introduced, as the matter for which that sub-head proposed to give power to make rules was one concerned with foreign jurisdiction rather than with extradition. We have also omitted the reference to the Thagi and Dakaiti Department

from sub-head (c) [formerly sub-head (d)] of the same sub-clause and have generalized the language so that all officers of Government can be authorised under the sub-head.

Clause 23 is a reproduction of section 17A of Act XXI of 1879, which appears to have been inadvertently omitted from the Bill as introduced.

THE FIRST SCHEDULE.

For the reasons given by us above, the operation of the Schedule, containing the list of extradition offences, is now limited to the case of States other than Foreign States (see Chapter III of our revised Bill). We have re-arranged the offences in accordance with the order of sections in the Penal Code, and we have modified the power of specifying new extradition offences so as to enable the Government to specify such offences either for all States or for particular States as it may desire.

THE SECOND SCHEDULE.

We have proposed the repeal of the whole of the Foreign Jurisdiction and Extradition Act, 1879, as the portion of that Act which relates to foreign jurisdiction has, since the Bill was introduced, been superseded by the India (Foreign Jurisdiction) Order in Council, 1902.

WE, the undersigned, Members of the Select Committee to which the Bill to make better provision for the organization and administration of municipalities in the Central Provinces was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

2. We have suggested a number of modifications in the provisions of the Bill as introduced. Most of these are unimportant, being of a formal nature, and only the following appear to call for any explanation.

Clause 14.—We do not think it desirable that the power to remove a president, vice-president or member of a committee should ever be delegated to a Commissioner, and we have therefore limited this clause accordingly.

Clause 35.—In accordance with the suggestion of the Chief Commissioner, we have amplified sub-clause (a) (*ix*) so as to make it clear that a tax can be levied in respect of cess-pools cleansed by municipal servants, and, in order to prevent any question being raised as to the nature of the additional taxes contemplated by sub-clause (b), we have expanded that clause so as to cover "any tax not authorized under clause (a)."

Clause 44.—We have modified sub-clause (3) so as to make the absence of sufficient moveable property of the defaulter, and not the absence of the defaulter himself, the ground for authorizing the Magistrate having jurisdiction within the limits of a municipality to grant a certificate enabling the arrears due to be recovered within the jurisdiction of another Magistrate where such property exists.

Clause 50.—We have specifically included veterinary dispensaries among the institutions for the construction, establishment and maintenance of which the municipal fund may be applied.

Clause 51.—In view of an objection raised by the Chief Commissioner to the provision in sub-clause (a) which requires a private banker with whom the municipal fund is deposited to give security in every case, we have by the addition of the words "if any" after "security" conferred a discretion on the Local Government to take security or not in any particular case as it may think fit.

Clause 66.—The alteration suggested by us in sub-clause (4) is designed to make it clear that fresh sanction for the erection or re-erection of any building is not required when a building which has been so sanctioned is begun within six months of the date of the sanction.

Clause 81.—We have modified the last portion of sub-clause (i), *firstly*, by making it include the bringing before a Magistrate of articles for human consumption and animals, as well as drugs, thus providing for the case in which the owner or person in charge does not consent to their immediate destruction or disposal; and, *secondly*, by omitting the words which relate to the nature of the enquiry before the Magistrate, as we consider that this is a matter which can more appropriately be provided for in clause 133. We have also expanded sub-clause (a) so as to include cases in which a committee applies to purchase any drug as well as any article intended for human consumption.

Clause 98.—We have added the words “at any time” before the words “during the five years next preceding” in the proviso to this clause in order to prevent any question being raised as to its intention.

Clause 102.—We have added words in sub-clause (1) (a) to make it clear that by-laws may be made to regulate the exposure for sale of any articles of food, and we have in the proviso limited the requirement of notice in the case of existing shop-keepers to premises which have been used for a period of not less than one year prior to the making of new by-laws.

Clause 105.—As the words “under the control of unlicensed agents” in sub-clause (1) (j) appear to us to be ambiguous as well as unnecessary, we have omitted them and thus generalised the sub-clause so as to provide for the regulation of all buildings occupied by coolies. In accordance with the suggestion of the Chief Commissioner, we have added new clauses giving power to make by-laws [sub-clause (g)] as to the stationing of carts and picketing of animals and as to encamping on ground under the control of the committee and as to the causing or permitting any animal to stray and [sub-clause (r)] as to regulating traffic in the streets.

Clause 108.—In order to remove a doubt to which reference has been made by the Chief Commissioner, we have added a new sub-clause enabling sub-committees to give any notice required to be given under the terms of Chapter VI by the committee, where the by-laws so provide.

Chapter VII (Offences and Penalties).—We have omitted clauses 114 (keeping animals so as to be injurious to health) and 125 (picketing animals and collecting carts), as these matters can be provided for by by-laws under the powers conferred by clause 105.

Clause 133 (clause 135 of Bill as introduced).—The alterations we have suggested in this clause are consequential on those we have proposed in clause 81. As modified by us the clause empowers the Magistrate to dispose of adulterated drugs as well as of articles or animals unfit for human consumption when the owner or person in charge has objected to their destruction by the municipal officer.

Clause 156 (clause 158 of Bill as introduced).—We have recast sub-clause (5), which in the Bill as introduced provided that nothing in the clause shall affect any contract between an owner and occupier, because it seems to us to be undesirable that the owner and occupier of property should have the right of contracting that the latter shall not be entitled to deduct from the rent any amount due by the former which may have been recovered from him by a municipality.

Clause 159 (clause 161 of Bill as introduced).—At the suggestion of the Chief Commissioner, we have provided for the institution of prosecutions by sub-committees as well as by committees.

Clause 165 (clause 167 of Bill as introduced).—We have inserted words in sub-clause (a) and added a new sub-clause (c), in order to give effect to a proposal made by the Chief Commissioner that power should be taken to impose restrictions (subject to the payment of compensation) on the use of property in the vicinity of reservoirs.

CASE OF THE KING-EMPEROR *V.* BAIN.

Before the business of the Council was proceeded with, the Hon'ble SIR
DENZIL IBBETSON made the following remarks :

" My Lord, before we enter upon the business of the day, I desire, with Your
Lordship's permission, to say a few words in connection with the criminal case
of the *King-Emperor v. Bain* which has recently been before the High Court
at Calcutta, and which has attracted much public attention. I do not propose
in any way to discuss the merits of the case. But it is evident from what has
appeared in the public Press that there is much misapprehension as to the facts,
some of which are within the knowledge of Government alone ; and, as it seems
desirable that this misapprehension should be removed; I propose briefly to trace
the history of the proceedings.

"Towards the end of last December Mr. Bain, who was the Assistant Manager of a tea-garden in Cachar, was charged before the Deputy Commissioner of that district with the culpable homicide of one of his coolies named Lalsa. The Deputy Commissioner held the usual inquiry, which resulted in his committing Mr. Bain to the Sessions Court. He was tried in February last by the Sessions Judge of Cachar and a jury composed of five Europeans, of whom four at least appear to have been planters of the district. It was alleged by the prosecution that Lalsa and two women, who were respectively his wife and niece, having absconded and been caught, Mr. Bain had with his own hands flogged Lalsa with a stirrup-leather, so that he collapsed and presently died; and that he had also caused the two women to be beaten. On these allegations the accused was charged, in respect of Lalsa with the offence of culpable homicide not amounting to murder and of voluntarily causing grievous hurt, and in respect of the women with abetting the offence of voluntarily causing hurt. The charge of culpable homicide, however, was not pressed at the trial. For the defence it was denied that Mr. Bain had either beaten Lalsa or caused the women to be beaten, and it was asserted that the charges were the result of a conspiracy. The jury, after hearing the evidence and being duly charged by the Judge, returned a unanimous verdict. They acquitted Mr. Bain of abetting hurt to the women. As regards Lalsa, they acquitted the accused on the charges of culpable homicide and grievous hurt, but they found him guilty of causing simple hurt; and the Sessions Judge, accepting this verdict, sentenced Mr. Bain to six months' simple imprisonment. This was on the 20th February. No appeal was made against this sentence, and Mr. Bain was removed for his term of imprisonment to Calcutta.

"The proceedings in the case had been reported to the Government of India by telegram in accordance with standing orders which have been in operation since 1897; and, on receiving intimation of the result of the trial, that Government, on the 27th February, telegraphed for a copy of the judgment. The order containing the findings and sentence was despatched on the 4th of March, but the heads of the Judge's charge to the jury did not reach the Government of India until the 30th March. These papers were considered by the Department concerned. They regarded as conclusive the unanimous finding of the jury upon the matters of fact which were in issue, namely, that Mr. Bain had beaten Lalsa, but had not caused the women to be beaten, supported as this finding was by the Judge's recorded opinion that the evidence on the former point was very strong, both direct and circumstantial, that the evidence on the latter point, while fairly strong, was far weaker than that on the former, and that the statement for the defence was improbable and absolutely unsupported by any evidence. In the absence of the record, they saw no reason to question the acquittal on the charge of grievous hurt. But they regarded the sentence of six months' simple imprisonment as inadequate to the offence of which the accused had been found guilty; and they felt a special responsibility for the due protection from injury or ill-treatment of persons who are employed upon the Assam tea-gardens under legislation which the Government of India have themselves enacted, and the operation of which they are in consequence under a peculiar obligation to safeguard from injustice or abuse. They proposed, therefore, to address the Chief Commissioner on the subject.

"The concurrence of the Viceroy, who was then on tour, having been obtained, the Chief Commissioner was addressed in a letter dated the 28th April. The views of the Government of India were explained to him, and he was asked to send for and examine the record, and, if he thought proper, to move the High Court to enhance the sentence. In the event of his considering it inadvisable to adopt this course, he was asked to send the record to the Government of India and to state the considerations which had led him to that conclusion. The Chief Commissioner's reply reached the Government of India on the 25th May. He was of opinion that the offence demanded a severer sentence than that which had been passed, and that the term of imprisonment might have been extended, or the imprisonment might have been with hard labour. But, regarded as a deterrent, he thought the sentence adequate, and on general grounds of expediency he was disinclined to apply for its enhancement. He therefore forwarded the record in the case.

The matter was again considered by the Department concerned. For reasons already stated, they were not disposed to accept the Chief Commissioner's conclusions as regards an application for enhancement. And upon a careful examination of the complete record, which was now for the first time in their possession, they thought it most desirable that the charge of grievous hurt should, if the Law Officers of Government advised such a step, be further investigated. In order to enable Government to arrive at a decision on this point, they proposed accordingly to consult the Advocate General. A doubtful point of fact was cleared up by a telegraphic reference to Assam, and on the 10th June the Solicitor to Government was addressed. The doubts which the Government of India entertained were explained, and he was directed to consult the Hon'ble the Advocate General as to whether, in his opinion, it was desirable to file an appeal against the acquittal on the charge of grievous hurt, and also whether, either in connection with such an appeal or independently of it, he would recommend an application for the enhancement of the sentence.

The Advocate General's opinion reached the Government of India on the 17th of June. Since any summary of it might be the subject of misrepresentation, I propose to quote it in full:—

'I have perused the copy of the depositions on the trial and the notes of charge and other papers. Where the trial is by a jury, an appeal will lie, even at the instance of Government, on a matter of law only, and in this case an appeal will only lie if the Judge has misdirected the jury by failing properly to explain to them the law on the subject of grievous hurt. As to this the notes of charge are very meagre; and he may possibly have made good in his full charge certain deficiencies appearing on the notes. He lays down in the notes as one of the important questions of fact '(b) if so, did the beating amount to grievous hurt'; and upon this he says "evidence as to (b) somewhat doubtful, since this depends upon direct evidence which is weak as to detail." I think he is in error and has misdirected the jury here, because it does not depend on the direct evidence alone, but on the direct evidence coupled with all the medical evidence, which is most material. He again refers to this question in the latter part of the notes as follows:—"(b) If they believe the man was beaten for the best part of an hour, they should convict under section 325." In this I also think he misdirected the jury, for he in effect told them that if they should not find that the man was beaten for the best part of an hour, they should not convict him under section 325; whereas he ought to have told them that the actual duration of the beating was immaterial upon this question, and he ought to have explained to them the law as to what constituted grievous hurt under the eighth head of section 320. But the High Court may think that he may have supplemented in his full charge the defects in the notes; and, if the appeal against the acquittal fails, the Court would have no power upon the appeal to enhance the sentence on the conviction for simple hurt. Still the High Court has, in the case of *Mehter Ali v. Empress*, I. L. R. 11 Cal. 530, in dismissing the appeal, directed as a Court of Revision that the sentence should be enhanced. I am therefore of opinion that it will be desirable to file an appeal in the High Court against the acquittal under section 325, and to add to the petition of appeal a prayer that, in case the Court should hold that there were no sufficient grounds for the appeal, the Court should, in the exercise of its revisional jurisdiction, enhance the punishment on the conviction for simple hurt.'

"Acting upon this advice, which was the sole opinion received, the Government of India directed the Chief Commissioner of Assam to instruct the Law Officers of Government to file an appeal against the acquittal on the charge of causing grievous hurt to Lalsa, and in the alternative to move the High Court, in the exercise of its revisional jurisdiction, to enhance the sentence on the conviction for simple hurt. The Government of India have not before them the memorandum of appeal which was actually presented; but they understand that it contained an additional plea of misdirection by the Sessions Judge on the charge of abetting the beating of the two women, and an appeal against the acquittal on that charge also. The appeal came before a Divisional Bench of the High Court, consisting of Mr. Justice Banerjee and Mr. Justice Handley, on the 6th July, and after a prolonged argument, in which both sides were represented by counsel, by whom both the law and the facts were fully discussed, the Bench held, in an elaborate decision which was delivered on 11th August by Mr. Justice Banerjee, that material misdirection was established in regard to both charges, namely grievous hurt to Lalsa, and abetment of hurt to the women. They therefore set aside the verdicts of acquittal on both these charges; and, since the same misdirection must be held to have vitiated the verdict of conviction on the

charge of simple hurt to Lalsa, which relates to the same matter, they set aside that verdict also, and directed a fresh trial upon all three charges. On the application and for the convenience of the accused, the re-trial was ordered to be held, not in Cachar, but on the Original Side of the High Court in Calcutta.

"The case came on for trial on 31st August before Mr. Justice Sale, who, before the special jury had been empanelled or any evidence proffered, made certain observations on the case, the substance of which has appeared in public print. At the conclusion of Mr. Justice Sale's remarks the Advocate General, feeling that he had no option but to withdraw from the prosecution after what the learned Judge had said, and acting in the exercise of the discretion conferred upon him by section 333 of the Criminal Procedure Code, entered a *nolle prosequi* on all the charges. The Judge thereupon directed that Mr. Bain should be discharged and that the discharge should amount to an acquittal on all charges, and the proceedings in Court terminated.

"Such is a bare statement of the facts as known to the Government of India. No instructions, official or unofficial, were issued, and no steps were taken by them, other than those which have been mentioned in this statement. The course of action adopted has been in accordance with the recognized departmental procedure, with the view of their responsibility entertained by the Government, and with the recommendations of their constitutional adviser in legal matters."

His Excellency THE PRESIDENT said:—"In connection with one remark that has fallen from my Hon'ble Colleague Sir Denzil Ibbetson, I should like to remove a further misapprehension that appears to prevail. I have noticed frequent references, some even on public occasions, to orders that are believed or alleged to have been issued at a recent date by the Government of India in connection with cases between Europeans and Natives. These orders are variously supposed to relate to the reporting of these cases to Government and to the administration of criminal justice. As regards the latter, I may say at once that no orders have been issued of any sort whatsoever, official or unofficial, public or private, and any statement or belief to the contrary is without foundation. The matter does not fall within the scope of the Executive Government. As regards the reporting of cases, the Hon'ble Sir Denzil Ibbetson referred in his statement to the orders of 1897, and it is upon this point that I desire to add a word. It was found by Lord Elgin's Government that very often they only learned of important occurrences in different parts of India from the newspapers, and that the official accounts of the same incidents did not reach them till months after they had taken place. This was due to the failure of Local Governments to report or to the great delay in doing so. Accordingly, on 24th August, 1897, Lord Elgin's Government issued orders to the Local Governments requiring them to issue instructions to their local officers to send to the Government of India duplicates of the telegrams in which they reported matters of importance to the Local Government or Administration, and among the matters of importance which were specifically mentioned in the orders were 'all collisions between Europeans of all classes and Natives.' During the first fortnight that I was in India, *viz.*, in January, 1899, it was represented to me by the Home Department that these orders had not been altogether successful, because the Local Governments did not like their local officers reporting to the Government of India over their heads—a proceeding which seemed to them both to impugn and to divide their own responsibility. We felt that these objections were reasonable, and accordingly one of my first acts was to authorise the issue of a letter, dated 23rd January, 1899, saying that we withdrew the orders about local officers reporting to us direct, and that we left to the Local Governments the duty of repeating to us the telegrams which they had received from them. Two years and a half later it was reported to us that the terms of Lord Elgin's orders of August, 1897, which referred to all collisions, were being so interpreted as to send up to the Government of India a number of absolutely trivial cases, the reporting of which wasted time and trouble, and was alleged to cause irritation. On looking into the case there seemed to be some foundation for these complaints, and accordingly in July, 1901, I authorised the issue of orders from the Military Department, modifying the orders of 1897, and laying down that we did not require reports of unconfirmed assaults or of assaults of a positively insignificant character. These orders, which related to soldiers, were

repeated in November, 1901, in a letter to the Local Governments, making the same modification in the case of civilians.

"How useful the new orders were in both cases has been shown by subsequent experience. The number of civil and military references decreased in the year 1902 by close upon three-fourths as compared with the corresponding figures for 1900 and 1901.

"It would thus appear that the orders have now attained a form which is free from the objections that attached to their original shape, and that answers the purpose for which they were devised. The necessity of receiving prompt information on matters that may develop a serious aspect, which was the principle upon which Lord Elgin's Government insisted, has been and must be maintained, but the rules have been freed from the drawbacks that were found to have arisen from their too strict interpretation in practice. These are the only Government orders that exist on the subject."

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 a.m. on Thursday, the 17th September 1903, based on the India Daily Weather Reports of the period.

There has been a general burst of rain over practically the whole country during the week under review.

On the 11th two barometric depressions were shown,—one over the western desert, the second over east Bengal. The former determined heavy rain to North-West India, the heaviest falls having been $4\cdot10''$ at Dera Ismail Khan; $2\cdot73''$ at Sambhar; $2\cdot15''$ at Cherat; $2\cdot02''$ at Ludhiana and over $1''$ at many stations in North-West India and Kashmir. The latter determined heavy rain to parts of Bengal, the largest fall reported having been $3\cdot13''$ at Barisal. By the 12th the depression in the north-west had filled up, but further light to heavy rain had fallen over Kashmir, the Punjab and Rajputana. The Bengal depression had travelled west-north-westward to Chota Nagpur and rain continued over Bengal, the largest amount registered having been $6\cdot35''$ at Calcutta. By the 13th the depression had reached the neighbourhood of Benares and moderate rain was falling over the United Provinces and West and South-West Bengal, though it had ceased over the Punjab and Rajputana. The reports of the 14th showed that the depression had reached Allahabad and that rain continued to fall in the storm area, but that in all other parts of Northern India the weather was fine. On the 15th the storm lay near Cawnpore. Rain continued to fall in the neighbourhood of the disturbance, Gorakhpur reporting over $4''$ and Bahraich, Bareilly and Lucknow over $2''$, but elsewhere over Northern India the weather was fine or only slightly showery. By the morning of the 16th the storm had disappeared, leaving the weather unsettled in the Kumaon Himalayas, but fine in other parts of Northern India. A fresh storm was appearing over the north-west of the Bay and the north-east of the Peninsula on this day. This storm had reached the south-east districts of the Central Provinces by the morning of the 17th and rain was increasing over north-east and central India.

The rainfall table shows that the week's rainfall has been less than usual over Burma, Assam, Gujarat and the west Satpuras and in the Dinajpur, Jubbulpore and Indore subdivisions, but was in excess in all other places. The excess was more than $5''$ in the Bahraich subdivision and more than $2''$ in the Burdwan, Simla and Cawnpore subdivisions, while the deficiency was as much as $4''$ in the Dinajpur subdivision and about $2''$ in the Jubbulpore and Indore subdivisions.

The seasonal rainfall is still however more or less short of the normal over Burma, Bengal and the greater part of Northern India, the subdivisions reporting the largest deficiency being Patna (-36%), Lahore (-38%), Cawnpore (-23%) and Ranchi (-27%)

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
12th September 1903.

Madras.—The rainfall was fair to good generally. Water for irrigation is sufficient, except in parts of the Deccan, Nellore, Salem and Madura. Ploughing, sowing and transplanting are going on generally. Standing crops are good, but some damage has been done through excessive rain in Godavari, Kistna and Tanjore. Pasture is sufficient and fodder is procurable. The condition of cattle is good. The price of rice is stationary. The price of dry grains has fallen generally.

Bombay.—Good rain fell during the week in parts of the Panch Mahals, Broach, the Konkan, Khandesh and Nasik. The rainfall was moderate in parts of Kaira and Surat; slight in parts of Ahmedabad, Sholapur and the Carnatic and very slight in parts of Karachi, Sukkur, Ahmednagar, Poona and Satara. More rain is needed for standing crops in parts of Larkana, Thar and Parkar, Ahmedabad, Kaira, the Deccan and the Carnatic. The sowing of autumn crops is completed in Hyderabad and Baroda; is almost over in Ahmedabad and continues in parts of Surat and Rajkot. Transplantation is completed in Hyderabad, the Panch Mahals and Kaira and is progressing in parts of Ahmedabad. Weeding generally continues in parts of Gujarat, the Konkan, Rajkot, Wadhwan and Baroda. Standing crops have been slightly damaged by insects in parts of Sukkur, Larkana, Hyderabad, the Upper Sindh Frontier, Sholapur and Belgaum; by locusts in parts of the Panch Mahals and Khandesh and by excessive rain in parts of Surat and Thana. They are suffering from insufficient moisture in parts of Karachi, Ahmedabad, Poona, Bijapur and Belgaum and are generally in good condition elsewhere. The harvesting of the autumn crops has commenced in parts of Karachi and Ratnagiri. The sowing of cotton is completed in Broach, is nearly over in Bijapur and continues in parts of Ahmedabad, Surat and Rajkot, but is retarded for want of sufficient moisture in parts of Belgaum and Dharwar. Cotton is in good condition in parts of Hyderabad, Ahmednagar and Sholapur. The preparation of lands for spring cultivation is progressing in parts of Larkana, the Upper Sindh Frontier, the Deccan, Bijapur and Dharwar. The sowing of spring crops has commenced in parts of Sholapur and has been retarded for want of rain in parts of Poona, Bijapur and Belgaum. The fodder-supply is sufficient. Agricultural stock is in good condition and sufficient, except in parts of Sholapur. The water-supply is sufficient, except in parts of Bijapur. Prices have fallen in four districts and are stationary elsewhere.

Bengal.—The rainfall during the week was general and moderately heavy in places. More rain is needed in the districts of Burdwan, Midnapore, Murshidabad, Rajshahi, Dinapore, Patna, Gaya, Shahabad, Saran, Muzaffarpur, Darbhanga, Monghyr, Bhagalpur, Purnea, the Sonthal Parganas and Balasore. The harvesting of autumn crops is going on. Transplantation of winter rice continues. Sugarcane is doing well. Fodder and water are generally sufficient. The price of common rice has risen in five districts; has fallen in fourteen and is stationary in the rest.

United Provinces—Rain has fallen in every district. Five and-a-half inches were recorded in Partabgarh and $4\frac{1}{2}$ in Dehra Dun and Meerut; elsewhere the falls average from half an inch to 3 inches. Prospects are good, but more rain is said to be needed in parts of Muttra. The harvesting of early autumn crops continues and weeding is in progress. Fields continue to be prepared for spring crops. The transplantation of rice has been completed. Damage to standing crops by floods is reported from Gorakhpur, Jaunpur, Allahabad, Fyzabad and Partabgarh. Markets are full, and prices continue stationary or falling.

Punjab.—Rain has fallen in all districts, except Mooltan. Ploughing of spring crops has commenced in Hissar and Mooltan; and is in progress in Amritsar and Shahpur. The condition and prospects of standing crops are generally good. The recent rain has been very beneficial to crops. Serious damage was done to autumn crops in Lahore by high floods from the Ravi. Crops have also been damaged by excessive rain on low-lying lands in Amritsar and riverain villages in Sialkot. Cattle are generally in good condition. Fodder is said to be sufficient in all districts. The price of wheat is falling generally. The prices of other food-grains are generally unchanged.

North-West Frontier Province.—Excellent rain, averaging Hazara 5 inches, Peshawar 2, Kohat 4, Dera Ismail Khan 2, Bannu 1 inch, has fallen throughout the

province during the week, and has been very beneficial to the standing crops and also to the spring cultivation. An excellent autumn crop is now practically assured, and a very large area will be sown for the spring crops. Irrigation from canals and hill torrents continues satisfactory, but irrigation bunds have been much damaged by heavy floods. The condition of cattle is good. Fodder is abundant and stocks of food-grains are sufficient. Prices are rising slightly in Peshawar, but are stationary in Dera Ismail Khan.

Burma.—There has been general rain; plentiful in Lower Burma and moderate in Upper Burma. Prospects have improved in affected districts, though more rain is still needed in Chiyh in Sagaing, Yamethin and Meiktila. Agricultural operations have been completed in most districts of Lower Burma, and are in progress throughout Upper Burma, including places where they had been temporarily suspended before. The reaping of sesamum commenced in Pakokku and continues in other districts. Some damage was done to crops by floods in two townships each of Tharrawaddy and Amherst; young crops in the Singaing township of Kyaukse are likely to be damaged from the same cause. In Mandalay crops in the Shwetachaung tract have been entirely destroyed by the long continued inundation and paddy in the Mogaing tract is poor. The condition of the crops is bad in the Tigyaing and Pinlebu townships of Katha. Stocks of food-grains are running low in several villages of Shwebo. In the Yindaw and Pyawbwe townships of Yamethin scarcity is anticipated and famine is feared. The price of paddy has risen largely in Upper Chindwin. Slight changes occurred in six districts. Elsewhere it is stationary.

Central Provinces.—Light to moderate rain has fallen during the week, the heaviest falls being in Saugor, Chhindwara, Bhandara and Raipur. The partial break has proved generally beneficial to crops. Weeding operations and the preparation of land for spring sowings have been resumed. Slight damage to cotton, *juar* and *til* in heavy soils by excessive rain is reported from Saugor, Seoni, Narsinghpur, Nimar, Betul and Bhandara. Some damage by grasshoppers is reported from Raipur and Nimar. The general condition of the crops is good. Prices are fairly steady with a slight tendency to rise in Saugor, Damoh and Jubbulpore, and to fall in Hoshangabad and Balaghat. The numbers on relief were as follows:—Gratuitous relief—Raipur, adults, 4,298; children, 841; total, 5,139. Bilaspur, adults, 533; children, 83; total, 616. Bhandara, adults, 986; children, 78; total, 1,064. Balaghat, adults, 255; children, 90; total, 345. Total on gratuitous relief, 7,164. Poor-houses—Raipur, adults, 11; children, 23; total, 34. Total on all forms of relief, 7,198.

Assam.—The rainfall was scanty. The weather was consequently hot. Ploughing for and transplanting of late rice and harvesting of early rice are nearly finished. The plucking and manufacture of tea and cutting of jute are in progress. Some land is being prepared for pulse. The outturn of early rice is good in Goalpara, Darrang, Nowgong and the Garo Hills; poor in Kamrup and fair in other places. The prospects of jute are good in Sylhet and Goalpara, and fair in the Garo Hills and of tea and sugarcane fair to good, except in Kamrup, where the prospects of sugarcane are reported poor. Tea blight is prevalent in Cachar and Darrang. Prices:—Common rice—Silchar, 14; Sylhet, Gauhati and Tezpur, 13; Dhubri, 11; Nowgong, Sibsagar and Dibrugarh, 10 seers per rupee.

Mysore.—One inch and 55 cents of rain fell in the Civil and Military station of Bangalore. The rain was good throughout the province. General prospects are good. Prices are slightly fluctuating. Cattle are healthy, except in parts of Mysore and Hassan. Water and fodder are sufficient.

Coorg.—Rainfall 2 inches and 50 cents. Prices of food-grains are stationary. Water and fodder are ample.

Berar.—The average rain during the week was 78 cents. The weather is cool and occasionally cloudy. Crops generally are in fair condition. The preparation of land for spring crops continues. Weeding is in progress. Fodder and water are sufficient. Prices are almost stationary.

Hyderabad.—The rainfall during the week was 20 cents. Autumn crops are in good condition and harvesting has commenced in one taluka. Early rice sowings are practically over. The standing crop is good and is being weeded. Spring sowings have commenced in parts. Prices:—Wheat, 9½; rice, 9 and *juar*, 31½ seers per *halli* rupee.

Rajputana.—Good rain has fallen throughout the province. From 3 to 14 inches were recorded at Ajmer, Jaipur, Shahpura, Deoli, Kherwara, Abu, Kotah, Tonk, Bundi and Jhalawar. Agricultural operations are in progress. Standing crops are good. Crops were slightly damaged by locusts in Bikanir, Marwar, Jaipur and Kishengarh; and by excessive rain in Mewar. The condition of cattle is good. Fodder is sufficient. Prices of food-grains are falling in ten States, are steady in four and are rising in the rest. The cheapest price was: Kotah, 60; and the highest: Sirohi, 16 seers the rupee.

Central India.—The rainfall was general and sufficient. Agricultural operations are in progress everywhere. Crops are good in Gwalior, Bhopal, Bundelkhand and Baghelkhand; and fair in Malwa, Bhopawar and Indore, but have been slightly damaged by vermin and rain in parts of Malwa, Bhopawar and Indore. Agricultural stock and pasturage are generally good. Prices are steady in Gwalior, Bundelkhand and Bhopawar; normal in Bhopal, Baghelkhand and Indore and low in Malwa.

SALE OF STAMPS BY VENDORS.

Duties of Vendors.

IX.—No person other than a vendor as defined in these rules shall sell stamps, other than one-anna adhesive stamps, unless specially authorised thereto by notification of the Local Government.

X.—Every vendor shall sell stamps in accordance with these rules for the value expressed upon them, and for no more.

XI.—Every vendor shall accept payment for any stamp sold by him in any currency which would be accepted on behalf of Government at a district treasury.

XII.—No vendor shall sell stamps of any kind, the use of which has been discontinued or prohibited by competent authority, but any stamp of any kind the use of which may have been so discontinued may be dealt with according to the proviso to section 54, Chapter V of Act II of 1899.

XIII.—Every licensed vendor may, subject to the conditions of his license and the requirements of these rules, purchase from an *ex-officio* vendor and sell to any person stamps of any kind or value covered by his license.

XIV.—Subject to the provisions of Chapter V of the Stamp Act, 1899, no licensed vendor shall obtain (by purchase, exchange or otherwise) any stamps from any person other than an *ex-officio* vendor.

XV.—If the duty on any document has to be denoted in the form of impressed sheets, it shall be so denoted by the smallest number of impressed sheets available by which the duty required can be made up.

XVI.—If the amount of the stamp duty to be denoted is such that it can be denoted by single impressed sheet and such impressed sheet is available, it shall be supplied.

XVII.—Whenever under these rules and directions more than a single impressed sheet is supplied to denote the value of the stamp duty required, the vendor shall write upon each impressed sheet supplied a certificate stating that he is unable to supply a single impressed sheet of the required value and that the number of impressed sheets supplied is the smallest he can furnish to make up that value.

XVIII.—A copy of every certificate endorsed under the preceding rule shall be entered in the vendor's vend register, and shall be dated and signed by the vendor making it:

Provided that, no such certificate shall be given by a licensed vendor in any case in which the stamp required exceeds in value the value of the sheet of highest value which such vendor is authorised to sell.

XIX.—Every vendor shall truly and correctly endorse in the English or Urdu or Hindi character on every impressed sheet sold by him to the public the following particulars:—

- (a) the serial number for the year of the entry of sale of such impressed sheet in the vend register;
- (b) the date of the sale of the stamp;
- (c) the name, (if a native) father's name and residence of the purchaser; if the purchaser is purchasing on behalf of another person, then also the name, (if a native) father's name and residence of the person for whom the impressed sheet is purchased; and
- (d) the value of the impressed sheet sold (to be entered in words), and shall sign the endorsement.

XX.—No vendor shall knowingly endorse on any impressed sheet sold the name of any person other than the actual purchaser, or the person on whose behalf the stamp is being purchased; or deliver any stamp sold to any person other than the person whose name is so endorsed thereon.

XXI.—Every vendor shall truly and correctly enter in his vend register the particulars of every impressed sheet sold by him to the public at the time when the sale takes place.

He shall also invite the purchaser to attest the entry by his signature or thumb impression, or both, and in the event of the purchaser refusing so to attest the entry of sale, the vendor shall record the fact of such refusal, and if the purchaser wishes, the reasons for the refusal.

XXII.—Every licensed vendor shall exhibit conspicuously at his place of vend a sign-board, bearing his name and the words "Licensed vendor of non-judicial stamps." He shall also have at the same place, for reference on application by intending purchasers, a copy of these rules and, if the Collector by general or special order so directs, a copy of the Indian Stamp Act.

XXIII.—When stamps are returned into the Collector's store on—

- (1) resignation of license,
- (2) revocation of license for any fault of the licensee,
- (3) death of the vendor,
- (4) application of the vendor for leave to restore any stamps,

the stamps shall be taken back at their full value less a deduction of one anna in the rupee; but when they are returned on—

- (5) expiration of license,
- (6) recall of stamps by Government,
- (7) revocation of license for any other cause than that mentioned in (2)

they shall be taken back at the full value less only any discount allowed on their sale to the licensed vendor.

XXIV.—Every licensed vendor shall keep such stock of one-anna adhesive stamps as the Collector may consider sufficient to meet the demand likely to be made upon the licensed vendor for their supply.

REMUNERATION OF VENDORS.

XXV.—(i) No *ex-officio* vendor shall, as such, be entitled to any discount or commission on the value of any stamps supplied to him for custody and sale upon the sale thereof.

(ii) Licensed vendors shall be entitled to discount on the value of stamps purchased by them from an *ex-officio* vendor at the rates specified in the following schedule: Provided that discount shall not be allowed on the value of any stamp of a kind not specified in the said schedule, nor on the value of any single stamp of denomination higher than R50, nor when the total value of the stamps purchased at one time is less than R5.

The Commissioner, Ajmer-Merwara, and every Revenue Officer not below the rank of a Collector and every Revenue Officer below the rank of Collector who is specially authorised in that behalf by the said Commissioner, Revenue Officer or Collector, may at any time inspect the stock of stamps, the registers and accounts of any vendor.

This license may be revoked at any time by the Collector of the district in which it is granted or by any Revenue Officer to whom such Collector is administratively subordinate. STAMPS.

No. 1123-618-III.—In supersession of the Hon'ble the Chief Commissioner's Notification No. 1332, dated the 27th December 1897, the following rules prescribed in the Resolution of the Government of India, in the Finance and Commerce Department, No. 1439-S. R., dated the 27th March 1895, as amended by Resolution No. 2655-S. R., dated the 13th June 1899, for the custody, supply and sale of all kinds of stamps and stamped papers, are published for general information. Those portions of the rules which apply to General and Court-fee stamps are adopted and issued by the Hon'ble the Chief Commissioner, Ajmer-Merwara, under the authority conferred on him by section 74 of the Indian Stamp Act, II of 1899, and section 27 of the Indian Court Fees Act, VII of 1870.

SEPARATE REVENUE DEPARTMENT.

MISCELLANEOUS.

Rules for the custody, supply and sale of Stamps of all descriptions, namely, General, Stamps used to denote the duties payable under the Stamp Act, 1899, Court-fee Stamps used to denote the fees payable under the Court Fees Act, 1870; Telegraph Stamps and Postage Stamps.

CENTRAL DEPÔTS.

1. There shall be three central depôts for stamps of all descriptions in charge of the Superintendents of Stamps at Calcutta, Madras, and Bombay, respectively. These central depôts shall maintain a stock of stamps sufficient for two years' consumption. The Superintendents of Stamps in Madras and Bombay shall, for this purpose, forward not later than the last week in September in each year indents for the supply of the various descriptions of stamps required in the following year for the territories dependent on them for the supply of stamps to the Superintendent of Stamps, Calcutta. The Superintendent of Stamps, Calcutta, shall prepare a general consolidated indent for stamps of all descriptions, showing separately the demand for the following year for each of the three presidencies, including in it the indents of the Superintendents of Stamps, Madras and Bombay; and shall forward this general indent to the Government of India in the Finance Department for transmission to the Secretary of State so as to reach him not later than the 1st November in each year. The Superintendent should forward a copy of the section of the general indent relating to Postage stamps to the Director-General of the Post Office, and of the section relating to Telegraph stamps to the Director-General of Telegraphs.

2. Stamps for the Bengal Presidency, including the North-Western Provinces and Oudh, the Punjab, Central India, Rajputana, Assam and Burma, and local depôts, subordinate to Calcutta, and stamps for copies for use in the Central Provinces, shall be supplied from the central depôt, Calcutta, on the indent of officers in charge of local depôts.

3. Stamps for the Madras Presidency, including Coorg, and local depôts subordinate to Madras, shall be supplied from the central depôt at Madras, on the indent of the officers in charge of local depôts.

4. Stamps for the Bombay Presidency, including Sind, Berar, the Central Provinces (save as provided in rule 2), and local depôts subordinate to Bombay, shall be supplied from the central depôt, Bombay, on the indent of officers in charge of local depôts.

5. The Superintendents of Stamps, Calcutta, Madras and Bombay, on receiving an indent from a local depôt, shall have the indent examined to ascertain that the indent is such as to insure the local depôt having a proper supply, and may comply with the indent in full or in part as he thinks fit. If he thinks that the indent should be increased, he should request the officer who submitted the indent to submit a supplementary indent. The Presidency Post Offices of Calcutta, Madras and Bombay may indent for supplies on other the central depôts.

LOCAL DEPÔTS.

6. Every Treasury throughout India, including those attached to political and salt agencies, shall be a local depôt for the custody and sale of stamps of all descriptions. Local Governments may establish local depôts at places where there is no Treasury.

7. Each local depôt shall, unless the Local Government otherwise directs, maintain a supply of stamps equal to the probable consumption of five months. Local Governments may direct that the supply to be maintained either generally or in respect of any particular kind of stamp or in certain local depôts shall be equal to the probable consumption of such other period as they deem expedient.

8. As soon as the number of stamps in the local depôt falls below the number issued from the depôt in the preceding six months, the officer in charge of the depôt shall prepare an indent for a supply equal to the probable consumption of three months. The indent shall show in separate columns for each denomination of stamp of which a supply is required the total of the balance in the local depôt and any branch* depôts subordinate to it, the

* For branch depôts the figures of the latest periodical return received at the local depôt showing detail of stamp balances, may be used for the purpose of calculating the total required for entry in each column.

quantity sold in the preceding six months, and the quantity indented for, which should be approximately one-half of the quantity sold in the preceding six months. The periods of "six months" and "three months" of this rule may, like that of five months in Rule 7, be altered by Local Governments to such other periods as they may deem expedient. This indent will be forwarded direct to the Superintendent of Stamps, Madras, Bombay or Calcutta, as the case may be; but the Local Government of any Province may direct that the indents shall be forwarded through any other officer, such as the Superintendent of Stamps of the Province, or that a copy of the indent shall be forwarded to such officer.

9. If the supply of stamps in any local depôt should run short before the receipt of the supply from the central depôt, the officer in charge of the local depôt should indent for a supply from a neighbouring depôt, sending a copy of the indent to the Superintendent or Commissioner of Stamps of the Province, or such other officer as the Local Government may direct. It is the duty of the Superintendent of Stamps, Madras, Bombay or Calcutta, to report to the Local Government (or such authority as the Local Government may direct), in the case of General and Court-fee stamps, to the Director-General of the Post Office in the case of Postage stamps, and to the Director-General of Telegraphs, in the case of Telegraph stamps, any case in which it may come to his knowledge that the stock of stamps in any local depôt of any description has fallen below the prescribed amount.

10. As soon as possible after the arrival of a supply of stamps from the central depôt or from another local depôt, the officer in charge of the local depôt shall personally examine the outward appearance of the boxes or packets and satisfy himself that they bear no marks of having been tampered with. He shall then have the boxes or packets opened in his presence, and the contents of each box or packet counted either by himself, or, in his presence, immediately on its being opened. At the head-quarters of a district, where the Treasury is the local depôt, the boxes or packets should invariably be placed immediately on arrival in the strong room of the Treasury and there opened, one at a time, in the presence of the Treasury Officer, who must be present all the time the boxes or packets are being opened, and their contents examined and counted. In no case must a second box or packet be opened until the contents of the first have been completely examined and verified and placed in the proper receptacles as required by Rule 13. The number and value of stamps received shall be compared by the officer in charge with the invoice submitted or with the passed indent and a receipt shall be sent as soon as possible to the officer who sent the stamps.

11. Local Governments may issue such orders as may be thought necessary regarding the detailed counting of stamps received in a local depôt, and as to the descriptions of stamps which the officer in charge must count with his own hands. Such orders may include instructions that a certain percentage only of sealed packets marked as containing a certain number of stamps need be opened and counted at the time of receipt, and the remainder, if the percentage opened are all found correct, left with seals unbroken to be counted as they are required on being given out from double lock. The officer in charge is responsible for observing any such instructions, and for satisfying himself as to the number of stamps received before signing the receipt. The inside wrappers of packets of stamps which bear the initials of the officers through whose hands the packets passed before issue from England should invariably be preserved till the whole contents of the packets have been examined and found correct.

12. If any of the stamps received are found to be unfit for issue, they should be at once returned to the Superintendent of Stamps. Stamps which are through any accident rendered unfit for issue at any time after receipt should be similarly returned to the Superintendent as soon as their unfitness is discovered. The necessary entries on account of stamps so returned should be made in the monthly statement (Rule 34), and in the *plus* and *minus* memoranda (Rule 36).

13. Immediately after the stamps received have been counted, they shall be placed in proper receptacles in store under double lock in the presence of the officer in charge, arranged in parcels and packets containing known quantities, the amount and value of each denomination being entered at the same time in a register* maintained to show the receipts and issues to and from the store under double lock. These entries shall be checked by the officer in charge at the time the stamps are deposited, and the correctness of the arithmetical calculations of additions to balance, as well as of the values compared with quantities,† shall be verified and initialled by him at the time. The register shall then be placed with the stamps in the double lock receptacles and shall not be removed therefrom, nor shall any entries be allowed to be made therein except in the presence of the officer in charge.

14. The Treasurer, or such other officer as the Local Government may direct, shall be the *ex-officio* vendor of all descriptions of stamps in each local depôt. Sales to the public

* Double lock Stamp Store Registers, — prescribed by the Punjab Government.

† *N.B.* — In all cases where stamp registers have to be checked, the actual check of quantities against values is a very important one; the correctness of the calculations of value must be tested in detail either by actual multiplication or by use of correctly prepared tables, and this check should never be omitted. This remark applies also to such of the following rules as prescribe a check of this kind. It is not necessary that the complete checking should be done by the officer himself. It will be sufficient if the officer personally check 10 per cent. of the entries in each class of stamps, leaving the remaining entries in each class to be checked by a subordinate under his supervision.

or to licensed vendors shall not be made direct from the stores under double lock, such sales being made by the *ex-officio* vendor from the supply entrusted to him for this purpose to be kept by him under single lock as prescribed in the following rules.

15. The stock to be made over to the *ex-officio* vendor to be kept by him under single lock should ordinarily be sufficient for the probable demand of one month. The *ex-officio* vendor will maintain a register of receipt, and issues from single lock in the same form as the double lock register, and on a fixed date near the beginning of each month he will prepare an indent for the quantity required for the month in a form showing the balances in his hands, an average month's consumption and the quantity required. When this indent is presented to the officer in charge, he will examine the single lock register, check the correctness of the arithmetical calculations made therein and compare the balance, shown with the actual balance in the *ex-officio* vendor's hands. If he approves the indent, he shall then give out the quantity required from the store under double lock, check the correctness of the entries made in the double lock register, see that they correspond with those made in the single lock register, initial both registers and return the double lock register into the double lock store. The same procedure shall be followed if any stamp should be required at any intermediate date. Local Governments may reduce the period of one month mentioned in this rule to one week, or any other period less than a month, if they consider this desirable, with reference to the amount of the Treasurer's security or for any other reason.

16. From the stock so made over to his charge and kept by him under single lock, the *ex-officio* vendor shall sell stamps to the public and to licensed vendors for cash. He shall maintain the single lock register in the form mentioned in the preceding paragraph in such language as the Local Government may direct, entering therein both in quantities and values the receipts from double lock, the daily sales and balance in his hands of each denomination at the end of each day. He shall pay daily into the Treasury the cash received by him for stamps sold, the amount realised on account of each of the four descriptions of stamps—namely, General, Court-fees, Postage, and Telegraph—being paid in separately. The account of the daily sales should be inspected and the correctness of the calculations shown therein checked every day by the officer in charge of the dépôt.

17. The rules regulating the grant of discount and the grant of licenses to licensed vendors for the sale of General and Court-fee stamps vary in different Provinces, and are prescribed by Local Governments, subject to the general rule that no change in the rates of discount shall be made without the previous sanction of the Governor General in Council.

18. Local Governments may direct that the sales to the public of General and Court-fee stamps by *ex-officio* vendors shall be limited to stamps of a value higher than a named amount, the sale to the public of stamps of lower value being left to licensed vendors.

19. Telegraph stamps shall be sold to the public for cash by the *ex-officio* vendors, provided that the quantity of stamps sold to one person at one time shall not be less in value than Rs 5, and that the quantity sold shall not include less than one rupee worth of any particular denomination. On such sales no discount is allowed.

20. Telegraph Masters shall obtain supplies of Telegraph stamps from the local dépôts, subject to the same conditions in regard to the quantity supplied at one time as those of the preceding rule, and shall sell to the public Telegraph stamps of all descriptions and to any value. No discount is allowed to Telegraph Masters for the sale of stamps; but they are allowed permanent advances of Telegraph stamps without payment, the amount of the permanent advance being fixed by the Director-General of Telegraphs. When the permanent advance of Telegraph stamps has once been taken, subsequent issues to Telegraph Masters are made only on cash payment. But when the local dépôt is closed for holidays of more than one day's duration, officers in charge of local dépôts are authorised to issue Telegraph stamps to Telegraph Masters without payment in excess of the value of the permanent advance, these temporary advances being adjusted when the Treasury re-opens by the return of the stamps, or the payment of their value if sold.

21. Service postage stamps shall be sold for cash from local dépôts to Government officials and to persons specially authorised to purchase and use Service stamps on a written application. On such sales no discount is allowed.

22. Ordinary postage stamps shall be sold to the public for cash from local dépôts, provided that the value sold to any person at one time shall not be less than Rs 5 and shall not include any fraction of a rupee, and that embossed envelopes and post-cards shall be sold in complete packets only. No discount is allowed on such sales. Soldiers' envelopes are sold from certain selected local dépôts only to Commanding Officers in complete packets, no discount being allowed.

23. The officer in charge of every post office, receiving office, tahsil, thána, and police station at which letters are received for despatch, and every person licensed under the rules framed under the Stamp Act, 1899, to sell General stamps, are required to keep a supply of ordinary postage stamps, for sale to the public, sufficient for the probable demands of one week. To such persons ordinary postage stamps, except soldiers' envelopes, are sold from local dépôts for cash on the same conditions as to quantity as those prescribed in the preceding rule; and on such sales discount at the rate of quarter of an anna in the rupee is allowed.

NOTE.—In the case of all stamped envelopes or postal wrappers the discount or commission is calculable on the face value of the stamp.

A special extra commission of quarter anna in the rupee has been sanctioned, with effect from 11th November 1892, on all sales of the large size registration envelopes.

24. The officers in charge of post offices, receiving offices, tahsils, thánas and police stations at which letters are received for despatch, are also required to keep a supply of one anna revenue stamps for sale to the public. To such officers one anna revenue stamps are sold from local depôts on the same conditions as to quantity as those prescribed in rule 22. On such sales discount at the rate of one anna in the rupee is allowed.

25. A District Officer may authorise the grant of discount at the rate of quarter of an anna in the rupee to any *bona fide* retail vendor of ordinary postage stamps, provided he is not employed in a Government Treasury. Such authority shall be in writing, and shall remain in force for one year. It may contain conditions in all or any of the following respects, namely, the maintenance of a sufficient supply of stamps of all or any specified denominations of postage stamps for retail sale; the sale of the stamps at one or more particular shops or places, and the prohibition of sales at other shops or places; and the days and hours of sale. The District Officer shall keep a register showing the name, residence and occupation of every person to whom he grants such authority.

26. Superintendents and Inspectors of Post Offices within their respective jurisdictions and any other officers of the Post Office authorised in that behalf by the Postmaster-General or Deputy Postmaster-General, are empowered to examine the stock of postage stamps kept by any of the persons required or authorised to keep postage stamps for sale to the public under rules 23 and 25.

BRANCH DEPÔT.

27. Every subordinate branch or tahsil treasury shall be a branch depôt for the sale of stamps of all descriptions. But in any case where the sale of stamps from such a branch depôt is insignificant and equal facilities exist for the supply of stamps from a depôt, in the same station as the branch depôt, the Local Government may direct the closing of the branch depôt.

28. The Sub-Treasurer or such other officer as the Local Government may direct, shall be the *ex-officio* vendor of stamps at a branch depôt.

29. The officer in charge of the branch depôt shall obtain his supplies from the local depôt to which the branch depôt is subordinate, in the same manner as the *ex-officio* vendor at the local depôt obtains his supplies, except that the indent and the stamps must be sent by post or messenger to and from the local depôt, and that the examination of the balance in hand and the comparison of the amounts shown with those shown in the indent shall be done by the officer in charge of the branch depôt. In cases where there is likely to be a distinct saving of cost or greater security of the stamps in transit, the Local Government may empower the Board of Revenue or other superior revenue authority to sanction the despatch of stamps direct from the central depôt to branch depôts, such supplies being passed through the accounts of the local depôt and treated by the Superintendent of Stamps as supplies to the local depôts to which the branch depôts are subordinate.

The receipt and examination of stamps on arrival from a local, central or other depôt should be conducted in the manner laid down in rule 10.

The *ex-officio* vendor shall obtain his supplies from the officer in charge of the branch depôt in the same manner as the *ex-officio* vendor at the local depôt obtains his supplies from the officer in charge.

30. The supply to be kept in a branch depôt should be equal to the probable demand for three months; but Local Governments may direct that the supply shall be equal to the demand of any other period instead of three months which they may consider expedient. The stock should be kept up to this amount by indenting and obtaining supplies from the local depôt from time to time as may be necessary.

31. Local Governments shall fix the period a supply sufficient for which shall be kept under single lock by the *ex-officio* vendor, and the remainder of the stamps in the branch depôt shall be kept under double lock of the officer in charge of the branch depôt and of the *ex-officio* vendor, and given out to single lock as required.

32. Sales from branch depôts will be made, subject to the same rules as those from the local depôts.

RETURNS TO AND BY THE SUPERINTENDENTS OF STAMPS AND ACCOUNTANTS-GENERAL.

33. On the last open day of September and March each year, the officer in charge of each local depôt will count, or have counted in his presence, the stamps in his depôt, both those under double lock and those under single lock, and will require the officers in charge of the branch depôts subordinate to him similarly to count the stamps in the branch depôt. He will attach to the monthly statements for September and March rendered to the Superintendents of Stamps, Calcutta, Madras, or Bombay or in the Provinces noted in the margin, to the Local Superintendent or Commis-

which amounts agree with the balances shown in the monthly statement for September to March to which this certificate is attached. (If there is any difference add "with the exception of the following differences" the explanation of which is as follows.)

34. Monthly statements showing the receipts and issues of each local depôt, including the transactions of the subordinate branch depôts, shall be prepared by the officer in charge of the local depôt, and forwarded in the first week of the succeeding month to the Superintendent of Stamps, Calcutta, Madras or Bombay, or the local Superintendent or Commissioner of Stamps or other officer specified in Rule 33, separate statements being prepared for General stamps, Court-fee stamps, Telegraph stamps and Postage stamps.

These statements shall show for each denomination of stamp the values of the balance in hand at the beginning of each month, of the quantities received from the Superintendent of Stamps or other officer during the month, of the quantities sold during the month, and of the balance in hand at the end of the month. The statements may be forwarded direct to the Superintendent of Stamps, Calcutta, Madras or Bombay, or the local Superintendent or Commissioner of Stamps, or through any officer named by the Local Government.

35. The statements shall be checked by the Superintendent of Stamps, Calcutta, Madras or Bombay, or by the local Superintendent or Commissioner of Stamps, or other officer specified in Rule 33, by comparison with previous statements and the accounts of the central depôts, and shall be used by him to check indents and to watch the balances in the local depôts. If the monthly statements of transactions show that the balance of any kind of stamp in any local depôt is falling too low, the attention of the officer in charge should be called to the fact. 40. The Local Governments, in Bengal, Madras and Bombay, shall arrange for a periodical verification by counting of the stock of stamps in the respective central depôts. The verification shall be carried out in the manner and form prescribed by the Comptroller-General to whom the result will be reported.

(ii) When in any case the Court-fee chargeable amounts to or exceeds R10, such fee shall be denoted by impressed stamps, adhesive stamps being only employed to make up fractions of less than R10.

(iii) If in any case the amount of the Court-fee chargeable involves a fraction of an anna, such fraction shall be remitted.

IV.—(i) The amount of the Court-fee to be denoted on any document shall be so denoted by the smallest number of stamps available for the purpose.

(iv) If the amount of the Court-fee to be denoted is such that it cannot be denoted by a single stamp, or if a single stamp of the required value is not available, a stamp of the next lower value available shall be used and the deficiency made up by the use of one or more additional stamps (the number thereof being the smallest possible with reference to the stamps which are available) of the next lower value or values so as to make up the exact amount of the Court-fee to be denoted.

(v) So far as the purchaser of Court-fee stamps is concerned, the certificate of an authorised vendor, written on any impressed stamp, of the number of stamps and the value of each stamp sold to him to make up the amount of Court-fee to be denoted in the particular case, shall be deemed to be conclusive proof that the requirements of these rules have been duly complied with.

RENEWAL OF DAMAGED OR SPOILED STAMPS.

V.—(i) Any impressed stamp, and any adhesive stamp used in combination with or affixed to an impressed stamp, which may become damaged or spoiled, may be renewed as hereinafter provided.

AJMER TREASURY;

Contented.

Assistant Commissioner, Ajmer.

Extra Assistant Commissioner and Treasury Officer, Ajmer.

No. 1128-618-III.—The following rules are issued under section 30 of the Court Fees Act, VII of 1870, to regulate the cancellation of Court-fee stamps in the Courts in Ajmer-Merwara :—

Cancellation when to be effected. I. Cancellation of Court-fee stamps shall be effected,—

- (a) when a document bearing a Court-fee stamp is received by a Court competent to receive the same ;
- (b) when a Court-fee stamp is paid in as a process fee ;
- (c) when a Court-fee stamp is affixed to a document issued by any Court or office ;
- (d) when the record of a case in which Court-fee stamps have been filed is finally made over to the Record-keeper for safe custody.

II. In the case of stamps falling under clauses (a) and (b), cancellation shall be effected immediately on receipt of the document or stamp, by such officer as the Court may, from time to time appoint in writing in the manner prescribed by section 30 of the Court Fees Act. As an additional precaution, the signature of the cancelling officer, with the date, shall be written across each label at the time of cancellation, in durable ink.

Mode of effecting cancellation. III. In regard to stamps on documents falling under clause (c) the Government of India have directed, in Financial Department Resolution No. 3373, dated the 24th September, 1875, that the Court or office issuing copies, certificates, or other similar documents liable to stamp-duty under the Court Fees Act, shall, before issue, cancel the labels affixed to them by punching out a portion of the label in such a manner as to remove neither the figure-head nor that part of the label on which its value is expressed, and that, as an additional precaution, the signature of the officer attesting the document, with the date, shall be written across the label, and upon the paper on the other side of it.

Cancellation by Record-keeper. IV. The rules for the cancellation of Court-fee stamps by the Record-keeper are contained in a resolution of the Government of India in the Financial Department, No. 1763, dated the 24th July, 1873, in which it is ordered that the Record-keeper of every Court shall, when a case is decided and the record consigned to his custody, punch a second whole, or, in the case of stamps falling under clause (c), rule I of these rules, a third whole, in each label, distinct from the first, *and note the date of doing so at the same time.* Special attention is requested to the words in italics, as the direction therein contained is not always complied with. The Record-keeper's punching should not remove so much of the label as to render it impossible or difficult to ascertain its value or nature.

Examination of file. Deficiencies to be reported. V. Whenever the custody of a record containing Court-fee stamps is transferred from one official to another before final disposal, the receiving officer shall examine the Court-fee stamps in the file, and either certify on the index of papers that they are complete, or immediately bring to notice any deficiency, as the case may require.

Record-keeper responsible for all stamps on files. VI. Record-keepers will be held personally responsible that the stamps appertaining to the files under their charge are complete, and that they have been duly cancelled in accordance with the above instructions. Should a file be sent into the record-room in which the stamps are incomplete or not duly cancelled, the Record-keeper shall report the circumstance at once to the head of the office, and shall defer entering the case in its appropriate register until orders have been passed in the matter.

Examination of Court-fees by officials through whose hands files pass. VII. When a record containing Court-fee stamps is taken out of the record-room for any purpose, each official through whose hands the file passes must note on the index of papers, or on the list of files where such a list is with the file, that he has examined the Court-fee stamps in the file, and that they are complete, or, if they are not complete, at once report the fact for orders.

8. A brief description of some of the accidents resulting in loss of life, injury to persons or serious damage to rolling-stock is given below:—

(i) East Indian railway.—On the 9th May, a collision occurred between a down goods train and a down mixed train between Pirpainti and Sahebgunge. The driver of the goods train having brought his train to a stand on a sharp curve, uncoupled the engine and ran into Sahebgunge for water. In the meantime the down mixed train came round the curve and collided with the goods train. A passenger and four railway servants were injured.

(ii) On the 29th June, No. 13 up mixed train left Rampur Haut at 14.58 hours and encountered a storm near the down distant signal, and after travelling about a mile in it, 13 of the 15 vehicles which composed the train, were overturned by the force of the wind. Thirteen passengers were killed and fifteen injured.

(iii) On the 3rd August, the up Punjab mail train pitched into the rear of a goods train owing to the former having been allowed to pass through Bansipur station on the receipt from Kiul of the "in report" of the goods train which was, however, standing outside the distant signal at that station. A railway servant was killed and three passengers and two railway servants were injured and the rolling-stock was considerably damaged.

(iv) Eastern Bengal State railway, 5' 6" gauge.—On the 13th July, a collision occurred between No. 105 Eastern Bengal State railway up mixed train and No. 237 up East Indian railway goods train standing at Ballygunge partly outside the distant signal, owing to the former train having been allowed to leave Tolly's Nullah, before the line was cleared back from Ballygunge. Five passengers were injured.

(v) Bengal-Nagpur railway.—On the 29th March, a collision occurred at Gomharria station between No. 87 down goods train and No. 1 down mail train owing to the former train having started without signals and fouled the crossing as the latter was passing the station. Fourteen passengers were injured and the rolling-stock was considerably damaged.

(vi) On the 14th June, during shunting operations, No. 2 up mail collided with the engine and certain wagons of No. 103 down goods train in the Sini station yard. One railway servant was killed and another injured.

(vii) Oudh and Rohilkhand State railway.—On the 11th November, a collision occurred at Sanoda between a down girder train and an up goods train, the trains having been allowed to enter the same section during an interruption in telegraphic communication. Twelve coolies were killed and twenty-three injured, and the rolling-stock was considerably damaged.

(viii) North Western State railway.—On the 24th May, while entering Sambhu station No. 6 down passenger train collided with an up special goods train which was allowed to stand foul of the crossing. Six passengers and six railway servants were injured, and the permanent-way and rolling-stock were considerably damaged.

(ix) On the 26th May, the engine, tender and two covered wagons on No. 43 up goods train were derailed over an inundation canal between McLeodgunj Road and Orki by coming in contact with sand which had accumulated on the track during a heavy storm. One railway servant was seriously and two were slightly injured. The engine and tender were considerably damaged.

(x) On the 9th June, a collision occurred between No. 30 down mixed train and No. 29 up mixed train standing on the station line at Sangla Hill owing to the former train having entered the station against signals. Thirteen passengers were slightly injured and the rolling-stock was considerably damaged.

(xi) On the 25th July, No. 3 up mixed train was derailed by a violent storm between Gurzai and Khushalgarh. Three passengers were killed and eleven injured, and the rolling-stock was considerably damaged.

(xii) On the 28th July, No. 43 up mixed train ran into a sub-platelayer's trolley between Khairpur and Begmanji stations. The sub-platelayer was killed.

(xiii) On the 31st July, No. 19 up mixed train while entering Khatauli station was derailed at the facing points owing to the flange of the right leading wheel of the engine having worn sharp and to the speed of the train being in excess of the limit. The train was being admitted on to the platform or loop line. The engine buried itself up to its buffer beam in the bank, and the four vehicles behind it were completely wrecked. Eighteen passengers were killed and twenty-seven passengers were injured, of whom ten subsequently died of the injuries received.

(xiv) On the 25th November, No. 69 up goods train while entering Amritsar station collided with a shunting engine, owing to the driver of the goods train having run against signals. The shunting engine was derailed and the tender was separated and carried forward in front of the train engine which, after bursting the points, collided with certain wagons standing on the transshipment line. One railway servant was killed and another injured.

(xv) Great Indian Peninsula railway.—On the 19th March, a collision occurred at Talvadya station between an up passenger train and a down goods train, owing to the former having run against signals. Seven passengers and a railway servant were slightly injured and the rolling-stock was damaged.

(xvi) On the 20th May, an up mixed train on leaving Paldhi station was, owing to points having been incorrectly set, let into the dead end siding line and ran through the buffer stop into a gate house. The second guard and one of the wives of the gateman in the gate house were seriously and the second wife, two postal sorters and one fireman were slightly injured.

(xvii) On the 20th July, a collision occurred between a down passenger train and an up passenger train at the Bhore Ghaut Reversing station, owing to the driver of the former train having disregarded signals. Twenty passengers and a railway servant were injured.

(xviii) Indian Midland railway.—On the 6th August, a collision occurred between an up mixed train and a down mail train at Punch, owing to the former entering the station against signals and at an excessive speed. Ten passengers and a railway servant were slightly injured, and the rolling-stock was considerably damaged.

(xix) Madras railway.—On the 12th September, No. 81 mail train left Mangapatnam at 3-29 A.M., with 147 passengers, 4 sorters, 2 guards and 3 engine-men. At mile $\frac{205}{7.8}$ a short distance north of Mangapatnam there was a skew bridge with three openings of 30 feet on the square. The line to the south of the bridge is on a curve of 19,800 feet radius, and on a falling gradient of 1 in 568. On the night in question there was, in a limited area, a sudden and violent fall of rain such as had never been approached in magnitude during the existence of the railway. The flood rose to the tops of the girders of 11' 8" over the river bed, washed away 2 spans of girders and overturned pier No. 2. The mail train with the exception of the rear brake-van was precipitated into the gap, and 75 passengers and 4 railway servants were killed, while 6 passengers were injured. In addition to the destruction caused to the bridge, the line was breached at miles $205 \frac{14}{15}$ and 207-6.

(xx) Rajputana-Malwa railway.—On the 15th May, a ballast train parted between Basya and Rajgarh stations owing to the train not having been properly coupled up and the rear portion collided with the front portion. Four coolies were killed.

(xxi) Assam-Bengal railway.—On the 20th November, No. 3 up mixed train was derailed near Feni station, owing to the line having been deliberately opened out and slewed over by some persons unknown with the object of wrecking a train. Three railway servants were injured, and the rolling-stock was damaged.

(xxii) Southern Mahratta railway.—On the 21st April, certain coaching and goods vehicles, a postal van and two brake-vans running on No. 42 down mixed train were thrown off the line by a heavy cyclone at mile 420-11 between Donakonda and Kurichedu stations. Eight passengers and two railway servants were injured, and the rolling-stock was considerably damaged.

(xxiii) On the 29th June, a collision occurred between No. 43 up mixed train and No. 58 down goods train at Maddikera station, owing to the former train entering the main line instead of the platform line. The driver and a mail sorter were injured, and rolling-stock and permanent-way were damaged.

(xxiv) On the 23rd August, No. 91 up mixed mail train parted between Yeshwantpur and Yelahanka stations, due to defects in couplings. The driver who was not aware of the parting on observing a danger signal exhibited by the gatekeeper at mile 165-11 as also by a passenger in the train, applied the brakes with the result that the rear portion of the train collided with the front portion, capsizing and derailling certain vehicles. Six passengers were killed and twelve passengers and two railway servants were injured, and the rolling-stock was considerably damaged.

(xxv) On the 3rd December, while No. 1 up mail train was entering Saunshi station, a composite bogie carriage on the train was derailed and capsized owing to the points having been open. A passenger was seriously injured and rolling-stock and permanent-way were damaged.

(xxvi) Burma railways.—On the 21st April, a collision occurred between No. 1 up mail train and a special down goods train at Thawutti station, owing to the latter train, which was received on the platform line and was then being shunted into the third line with the view to receive No. 6 down mixed train on the platform line and allow No. 1 up mail to run through the station, having been stopped before its engine was clear of the third line south points. Two children were killed and a passenger and two railway servants were injured, and rolling-stock was considerably damaged.

RESOLUTION.

With an increase of 539 miles, or 2.14 per cent. in the mean mileage worked, and of 4,902,609 miles, or 5.45 per cent., in the train-mileage run, it is noticed that the number of train accidents increased by 150 and the total number of persons killed and injured thereby rose from 30 and 144 to 177 and 292, respectively. While the increase in the number of accidents is unsatisfactory, it is noticed that the increase in the numbers killed and injured was due mainly to the accidents at Mangapatnam, Khatauli and Rampur Haut, and referred to in paragraph 8, sub-paragraphs (xix), (xiii) and (ii). The total number of casualties to both passengers and servants from all causes (train accidents and accidents from causes other than accidents to trains) increased under killed from 1,114 to 1,231 or by 10.50 per cent., and under injured from 970 to 1,141 or by 17.63 per cent.

Secretary to the Government of India.

INDIA OFFICE;

London, 4th September, 1903.

Revenue,

No. 134.

To His Excellency the Right Honourable the Governor General of India in Council.

MY LORD,

In continuation of my Revenue Despatch No. 94 of the 30th July 1896, I forward 100 copies of an Order in Council, made on the 10th August 1903, revising the dues leviable in respect of the Basses and Minicoy Lighthouses, together with a corresponding number of the table of charges.

The new arrangements will have effect from the 1st October next, and I request that copies of the Order in Council and of the tables may be distributed to Collectors of Customs at the various ports in India.

The commission payable to Collectors of Customs from and after the 1st October next will be $7\frac{1}{2}$ per cent., in lieu of 5 per cent. as at present.

I have the honour to be,

MY LORD,

Your Lordship's most obedient, humble Servant,

GEORGE HAMILTON.

AT the Court at *Buckingham Palace*, the 10th day of *August* 1903.

PRESENT:

The KING'S Most Excellent Majesty in Council.

WHEREAS by Section 670 of the Merchant Shipping Act, 1894, it is enacted that when any lighthouse, buoy, or beacon has either before or after the passing of that Act been erected or placed on or near the coasts of any British possession by or with the consent of the legislature of that possession, His Majesty may by Order in Council such dues (in that Act referred to as Colonial Light dues) to be paid in respect of that lighthouse, buoy, or beacon by the owner or master of every ship which passes the same and derives benefit therefrom as His Majesty may deem reasonable, and may by like Order, increase, diminish, or repeal such dues, and those dues shall from the time mentioned in the Order be leviable throughout His Majesty's dominions and further that colonial light dues shall not be levied in any British possession unless the legislature of that possession by address to the Crown or by Act or Ordinance duly passed, signifies its opinion that such dues ought to be levied:

And whereas the Great Basses Lighthouse, the Little Basses Lighthouse and the Minicoy Lighthouse are Lighthouses which have been duly erected under and pursuant to the said section:

And whereas by Orders in Council dated respectively the 22nd day of May 1883, the 1st day of May 1892, and the 29th day of June 1896, His Majesty duly fixed the dues leviable in respect of the said Lighthouses for the classes of ships therein respectively mentioned:

And whereas under section 10 of the Public Works Loans Act, 1881, and the Acts there-referred to certain loans became due to the Public Works Loan Commissioners in respect of the said Lighthouses and it was by the said section enacted that so long as that were the case the dues payable in respect of the said Lighthouses should be altered only with the consent of the Commissioners of His Majesty's Treasury:

And whereas it has been made to appear to His Majesty that all loans made by the Public Works Loan Commissioners for the purposes mentioned in the said Acts have been repaid and that it is expedient that the amount of the said dues should be reduced in manner hereinafter mentioned:

NOW, THEREFORE, His Majesty, in exercise of the powers vested in him by the said section 670 of the Merchant Shipping Act, 1894, is pleased to direct that from and after the first day of October 1903, or from the time of the receipt of notice of this Order, if that be later, the officers authorised to collect light dues, the dues thenceforth to be levied shall be as follows, that is to say, in respect of the Great Basses Lighthouse and the Little Basses Lighthouse, three-sixteenths of one penny per ton, and in respect of the Minicoy Lighthouse one-eighth of one penny per ton, of the burden of every ship on every voyage in which she passes or derives benefit from the said lights respectively, and such dues shall be levied in lieu of the dues leviable under the said recited Orders in Council or any of them.

A. W. FitzRoy.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 a.m. on Thursday, the 24th September 1903, based on the India Daily Weather Reports of the period.

The weather has been generally quiet and undisturbed during the week under review. The rains practically ceased over the extreme north-west of India on the 13th, and, though there were showers in Kashmir and on the north-west Himalayas on the 18th, the weather has been generally rainless during the week under review over the greater part of the north-west dry area and over the north-west Himalayas from Simla westward. In other parts of the country showers have been received and the Bay has maintained its character for storm development, as another storm appeared over that area during the past week. The storm which had passed from the Bay into the south-east districts of the Central Provinces at the close of last week was central slightly to the west of Chanda on the first day of the week under review. Rain had fallen generally over the Deccan, the Central Provinces, Berar, the Circars coast and north-east India as far west as Bihar, the more important falls having been 3.28" at Hanumkonda and over 2" at Silchar, Berhampore and Jalpaiguri. The reports of the 19th showed that the storm had continued to move westward and that it was central over the north-west of the Peninsula. Rain had fallen in north-east India, the Deccan, the Circars coast and the north-west of the Peninsula, the more important falls having been over 4" at Mergui and Jalpaiguri and over 2" at Dibrugarh. The storm moved very slowly and on the morning of the 20th the centre still lay over north Bombay. Rain had been received over the Konkan, Gujarat, north-east Bengal, Assam and Tenasserim. Mymensingh and Mergui reported 3", Dinajpur and Mormugao over 2" and Dwarka, Rajkot, Veraval and Bhuj over 1". The storm moved out into the Arabian Sea during the 20th and on the morning of the 21st was advancing westward across the north of the Arabian Sea. Showers had been received over Lower Sind, Gujarat, the south of the Peninsula and part of north-east India, but the amounts were unimportant. On the 22nd the barometer was rising over the whole country and the depression which had been traced across the Peninsula had disappeared, but a fresh depression was shown over the Bay and the weather was showery over a large part of the country. The more important falls of rain were 3" at Benares, Pachmarhi and Seoni and over 2" at Narayanganj, Dehra and Bangalore. The reports of the 23rd and 24th apparently showed that the depression over the Bay was filling up, but nevertheless showery weather continued over a large area. The principal rainfalls were 2.3" at Calicut on the 23rd and 4.1" at Dhubri and over 2" at Hyderabad (Deccan) and Sholapur on the 24th.

The rainfall table shows that there has been actually or practically no rain during the week over the north-west dry area and the Lahore subdivision of the west Gangetic plain and less than half an inch over the Burdwan, Simla and Cawnpore subdivisions. Elsewhere moderate rain has been received, the average actual amount ranging from 0.55" in the Jaipur subdivision to 4.27" in the Dinajpur and to 4.00" in the Narayanganj subdivisions. The week's rainfall was less than usual in the Burma coast and wet divisions, the north-west dry area and the Calcutta, Darbhanga, Burdwan, Simla, Cawnpore, Lahore, Cuttack, Ranchi, Raipur and Indore subdivisions. In all other places the week's rainfall was in excess.

The seasonal conditions are practically unaltered.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
19th September 1903.

Madras.—The rainfall was good to heavy generally, except in Tinnevely and parts of Madura. Water for irrigation is insufficient in parts of the Deccan, Nellore, Salem and Madura. Ploughing, sowing, transplanting and weeding are in progress. Standing crops are in good condition, but some damage has been caused by heavy rains in parts of Godavari, Kistna and Tanjore. Pasture is sufficient. Fodder is generally procurable. The condition of cattle is good. Prices have fallen or are stationary.

Bombay.—Good rain fell during the week in parts of Broach, the Konkan, Ahmednagar, Poona, Sholapur, Satara and the Carnatic. The rainfall was moderate in parts of Ahmedabad, the Panch Mahals, Kaira, Surat and Khandesh; and very slight in parts of Karachi and Hyderabad. The rainfall was generally sufficient, but more rain is needed for the standing crops in parts of Larkana, Ahmedabad, Khandesh and Belgaum. The sowing of the autumn crops is completed in Baroda; and is almost over in Ahmedabad and Surat. Transplantation is completed in Ahmedabad and Kaira. Weeding continues in parts of Kaira, the Konkan, Belgaum, Rajkot, Wadhwan and Baroda. Standing crops have been slightly damaged by insects in parts of Sindh, Ahmedabad, the Panch Mahals and Sholapur; by rats in parts of Karachi, Hyderabad and Sholapur; by locusts in parts of Ahmedabad, the Panch Mahals, Thana and Khandesh; and by excessive rain in parts of Surat, Sholapur and Bijapur. They are suffering from insufficient moisture in parts of Thar and Parkar and are generally in good condition elsewhere. The harvesting of the autumn crops commenced in parts of Sukkur, Hyderabad, Thana and Ratnagiri, and continues in parts of Karachi and Khandesh. The sowing of cotton is almost completed in Surat and continues in parts of Belgaum and Dharwar. Cotton is in good condition in parts of Hyderabad, Ahmednagar and the Carnatic, but has been slightly damaged by excessive rain in parts of Surat. The preparation of lands for spring cultivation is progressing in parts of Sukkur, Larkana, the Upper Sindh Frontier, Khandesh, Satara and Dharwar. The sowing of spring crops has commenced in parts of Sholapur and Satara and continues in parts of the Upper Sindh Frontier, Broach, Ahmednagar, Poona, Bijapur and Belgaum. The fodder-supply is sufficient. Agricultural stock is in good condition and sufficient, except in parts of Karachi, Sholapur and Bijapur. The water-supply is sufficient, except in parts of Bijapur. Prices have fallen in eight districts and are stationary elsewhere.

Bengal.—The rainfall continued general and moderately heavy in places. More rain is still needed in the districts of Burdwan, Bankura, Midnapore, Murshidabad, the 24-Parganas, Jessore, Rajshahi, Patna, Gaya, Shahabad, Muzaffarpur, Darbhanga, Monghyr, Bhagalpur, Purnea, the Sonthal Parganas, Hazaribagh, Palamau and Singhbhum. The harvesting of the autumn crops continues. Transplantation of winter rice is approaching completion. Sugarcane is doing well. Lands are being prepared in some places for spring crops. Fodder and water are generally sufficient. The price of common rice has risen in six districts, has fallen in nine and is stationary in the rest.

United Provinces.—An average rainfall of 5 inches is reported from every district. Fyzabad received 12 inches, Gonda and Basti 8 and Bara Banki, Sultanpur and Mirzapur each over 7 inches. In the districts of the Upper Doab and in Moradabad, Muttra, Agra and Mainpuri only have the falls been less than an inch. More rain is still required in parts of Muttra. The autumn crops are in good condition and are being harvested. Weeding continues and the preparation of fields for spring crops is in progress. Standing crops in low-lying lands have been injured by floods in Fyzabad. Supplies are adequate and prices are stationary or falling.

Punjab.—Rain has fallen in the Hissar, Delhi, Umballa, Jullunder and Lahore districts. A slight fall is also reported in parts of Ferozepore. Ploughing for spring crops is in progress and sowings have commenced in the Hissar, Ferozepore, Sialkot and Mooltan districts. The condition and prospects of standing crops are generally good. Crops have suffered by river floods in a few villages of Tahsil Ajnala. Cattle are generally in good condition. Fodder is said to be sufficient in all districts, except in parts of Lahore. The price of wheat is falling in Umballa and Lahore, but is rising slightly in Jullunder and Amritsar. The prices of other food-grains are fluctuating.

North-West Frontier Province.—There has been no rain. Good rain during the previous week has practically secured a good autumn crop and given a good start to the spring cultivation. Sowings of oil and rape seeds have commenced in Dera Ismail Khan. Flood and canal irrigation is generally satisfactory. Cattle are in good condition. Fodder is abundant and stocks of food-grains are ample. Prices are rising slightly in Peshawar, but are falling in Dera Ismail Khan.

Burma.—The rainfall was moderate in Lower Burma and light in Upper Burma. Shwebo received 98 cents, Sagaing 2 inches and 14 cents, Lower Chindwin 67 cents, Meiktila 3 inches and 48 cents and Yamethin 27 cents and later information reports more rain in Yamethin which dispels apprehension of famine or even scarcity in that district. The transplanting of wet-weather paddy is completed in Toungoo and Thayetmyo. Agricultural operations are in progress throughout Upper Burma, but are suspended in the Shwetachaung tract of Mandalay owing to inundation. The reaping of dry-weather paddy is finished in Pakokku and of early wet-weather paddy in the Sagaing township of Kyaukse and the Southern Shan States. The reaping of early sesamum is completed in the Yamethin subdivision of Yamethin, and continues elsewhere. The sowing of *juar* and maize is in progress. The sowing of late sesamum has begun in Myingyan. The recent rain has done much good to the standing crops everywhere, and prospects have much improved in Sagaing, except in a few places, where no rain has fallen and where prospects are still bad. Grass has sprung up in Sagaing and there is water now in most places in Thayetmyo, where however plants are withering for want of rain. Rain is badly wanted also in the Seikpyu township of Pakokku and in the Thabekkyin township of the Ruby Mines district. The price of paddy has fallen considerably in Rangoon. Slight changes have occurred in two districts. Elsewhere prices are stationary.

Central Provinces.—The rainfall has been uneven; the heaviest falls exceeding 5 inches in Seoni and Chhindwara, but elsewhere the falls have been much lighter. Some damage by grass-hoppers is reported from Seoni, Chhindwara, Chanda and Bhandara; some damage by grass-hoppers is reported from Nimar, Raipur and Sambalpur. Prospects are generally good. Weeding operations are generally completed. The harvesting of minor millets has commenced. The preparation of land for spring sowings is in progress. Prices show a tendency to fall, particularly in the rice districts. The numbers on relief were as follows:—Gratuitous relief—Bilaspur, adults, 489; children, 69; total, 558. Bhandara, adults, 318; children, 44; total, 362. Total on gratuitous relief, 920. Poor-houses—Raipur, adults, 6; children, 22; total, 28. Total on all forms of relief, 948.

Assam.—Rain fell in all districts. The ploughing for and transplanting of late rice and harvesting of early rice are nearly finished. The plucking and manufacture of tea are in progress. Cutting of jute is finished in Sylhet, but still continues in Goalpara, Kamrup and the Garo Hills. The sowing of pulse has commenced. The late rice is somewhat damaged by insects in Kamrup. Sowing is in progress in Sibsagar and Lakhimpur. The outturn of early rice is good, except in Kamrup, and of jute good in Sylhet and Goalpara, and fair in Kamrup and the Garo Hills. The prospects of tea and sugarcane are fair to good, except in Kamrup, where prospects of sugarcane are reported poor. Tea-blight is prevalent in Darrang and Nowgong. Prices:—Common rice—Silchar, 14; Sylhet and Tezpur, 13; Dkubri, 12; Gauhati and Sibsagar, 11; and Nowgong and Dibrugarh, 10 seers per rupee.

Mysore.—Four inches and 3 cents of rain fell in the Civil and Military Station of Bangalore. The rain was good generally throughout the province. General prospects are good. Prices have fallen in two districts. Cattle are healthy, except in parts of Mysore and Hassan. Water and fodder are sufficient.

Coorg.—Rainfall 3 inches and 25 cents. Prices of food-grains are stationary. Water and fodder are ample.

Berar.—The average rain during the week was 1 inch and 61 cents. The weather was cool and cloudy. Crops generally are in a satisfactory condition. The preparation of land for the spring crops continues. Weeding is in progress. Fodder and water are sufficient. Prices are almost stationary.

Hyderabad.—The rainfall during the week was 3 inches and 24 cents. Harvesting of the autumn crops is in progress. Early rice is being weeded. The standing crops are in good condition. Lands for spring sowings are being prepared, and sowings continue. Prospects are generally good. Prices:—Wheat, 9½; rice, 9 and *juar*, 31½ seers per *halli* rupee.

Rajputana.—The rainfall was general throughout the province, except in Sirohi and Ajmer-Merwara. Agricultural operations are in progress. Standing crops have been

slightly damaged by locusts in Marwar, Sirohi, Jaipur, Kishengarh and Ajmer; by insects in Jhalawar; and by excessive rain in Mewar, the hilly tracts and Kotah. The condition of cattle is generally good. Fodder is sufficient. Prices are falling in six States, are steady in eight States and are rising in Jhalawar. The cheapest price was: Kotah, 60 seers; the highest: Sirohi, 14½ seers the rupee.

Central India.—The rainfall was partial in Bhopal, Malwa and Bhopawar; it was general elsewhere and sufficient everywhere. Agricultural operations are in progress everywhere. Crops are in good condition in Gwalior, Bhopal, Bundelkhand and Baghelkhand and fair in Malwa, Bhopawar and Indore, but have been slightly damaged by vermin and rain in parts of Malwa, Bhopawar and Indore. Agricultural stock and pasturage are generally good. Prices are steady in Gwalior, Bundelkhand and Bhopawar; normal in Bhopal, Baghelkhand and Indore; and are low in Malwa.

Kashmir.—The weather was bright and clear. Prices are stationary. **JAMMU:**—Rain fell during the week. The condition of the standing crops is good. Fodder is sufficient. Lands are being prepared for the next spring crop. In some places excessive rain has been injurious to the standing crops in some parts of the province. Prices are fluctuating. The price of wheat is from 13 to 24 and of maize from 14 to 30 seers the rupee.

Nepal.—Rainfall 0.99 inch. The weather is cloudy and close. Upland rice is being harvested; lowland rice is in good condition. Price of rice is 5½ seers for the rupee.

DEPARTMENT OF REVENUE AND AGRICULTURE

No. 1732—96-3.

Simla, the 24th September, 1903.

The following circular, regarding the opening of forests to grazing in times of famine, is published for general information.

J. O. MILLER,
Secretary to the Government of India.

Circular No. 21—96-3.

J. O. MILLER, Esq., C.S.I.,
Secretary to the Government of India,

LOCAL GOVERNMENTS AND ADMINISTRATIONS
(EXCEPT ASSAM, COORG, NORTH-WEST FRONTIER PROVINCE,
BALUCHISTAN AND BERAR).

Dept. of Rev. and Agri.
Famine.

Simla, the 23rd September, 1903.

SIR,

I am directed to refer to the recommendations of the Famine Commission of 1901 contained in paragraph 216 of their Report on the subject of the opening of forests to grazing in times of famine.

2. The Commission, while holding that no pressure should be put on the people to send cattle to the forests owing to certain risks which they pointed out, were of opinion that the forests should be opened to all who were prepared to take these risks. They further recommended that in cases when the supply of grass was likely to be limited and a demand for its export was likely to spring up restrictions should be placed on free grazing either by selection of the cattle which should be allowed access to the grazing grounds or by the imposition of a fee. The Inspector General of Forests was requested to consider these recommendations in consultation with Local Governments and the Inspector General of Agriculture. He has now submitted his opinion, together with a statement of the views expressed by Local Governments, and I am directed to communicate the following orders of the Government of India on the subject.

3. The replies of the Local Governments and Administrations show that there is nowhere any difference of opinion as to the general principle involved which is, that it is desirable to open forests in times of drought to grazing where practicable, but that grazing should not be unrestricted if the supply of grass is likely to be less than the demand. There is some difference of opinion as to the details of the arrangements that should be made for the regulation of grazing in accordance with this principle; and the Government of India consider that it is impossible to prescribe any specific rules on the subject, since so much must depend upon the degree and extent of the fodder famine that has to be relieved, the quantity and quality of the grass available, the demand for grass for export, the local conditions of the forests, and many other factors which will vary, not only in different parts of the country, but in the same place on different occasions. But they think that it is possible, and will be useful to lay down the general lines on which action should proceed.

4. In a famine the preservation of agricultural cattle is a matter of far greater importance than any revenue which might be obtained from grazing fees. If such fees are levied at all, they should be imposed on administrative grounds and not as a source of revenue.

5. The selection of cattle for admission to forests is beset with many difficulties and is practically impossible. In a province where the number of great landlords is large, it may be difficult to utilize their services for this purpose, and provision to this effect has been made by the rule in force in the United Provinces. But selection, when it has to be effected through subordinates on small pay, is open to strong and obvious objections. On the other hand, any limitation of the number of cattle admitted to the grazing grounds by the imposition of a grazing fee is open to the objection that it amounts to an automatic selection of the poorest, rather than of cattle; and that it excludes the cattle of the very people who, being poorest, are in greatest need of assistance. Moreover, any system of limitation, whether by selection or by the imposition of a fee, can be enforced only by prosecutions and impoundment, which are especially objectionable in times of distress. Probably the only cases in which differentiation is unobjectionable occur in dealing with (1) the cattle of villages in the vicinity of a forest, which have the first claims upon its pastures, and (2) the cattle of professional graziers and cattle-breeders, which may properly be charged for grazing, even when agricultural cattle are admitted free. But if it is found that cattle are resorting to a forest in numbers greatly exceeding its grazing capacity, it may become absolutely necessary to limit the numbers.

6. In view of the considerations set forth in the preceding paragraphs the course which seems to the Government of India most generally suitable for adoption is, to throw open to grazing areas in which grazing is ordinarily permitted, and to reserve the areas which are ordinarily closed to grazing, for the supply of grass for export. It may be necessary to supplement the latter by reserving portions of the former areas for grass-cutting; or it may be possible to throw open portions of the latter at once, when the supply is in excess of the demand for export. But, the needs of local cattle being provided for, the supply of grass for export should be the first consideration. When the grass has been cut from the areas thus reserved, they also may be thrown open to free grazing if necessary. Browsers should not be admitted without payment to any areas which contain forest growth of any importance, and should in no case be admitted to areas ordinarily closed to grazing. No grazing should be allowed in areas under plantation or regeneration, unless the trees are old enough to be safe from attack. The small relief that such areas might afford is too dearly purchased by sweeping away the results of years of patient care.

7. I am to request that, with the approval of ^{His Excellency the Governor} ~~His Honour the Lieutenant-Governor~~, the rules regarding the regulation of forests for the preservation of cattle in times of drought contained in the Forest Code may be revised, if necessary, in accordance with the suggestions contained in the preceding paragraphs. I am at the same time to forward for information a copy of the rules now in force in the Madras and Bombay Presidencies, in Bengal, the United Provinces and the Punjab.

I have the honour to be,

SIR,

Your most obedient Servant,

J. O. MILLER,

Secretary to the Government of India.

Circular No. 21—96-3.

Copy forwarded to the ^{Agent to the Governor General, Baluchistan} ~~Resident at Hyderabad~~ ^{Hon'ble the Chief Commissioner, North-West Frontier Province} ~~Chief Commissioner, Assam~~ ^{Chief Commissioner, Coorg} for information and guidance.

By order,
